

Chemistry A-Level Year 11-12

Transition Project 2026

- In your first Chemistry lesson, you will be asked to complete a test based on the CGP Head Start book.
- This test aims to determine your dedication to the subject and how much support you may or may not need.
- If you are already a Southam College student, you can order this book directly from Southam College via ParentPay.
- If you are joining us from another school, you should purchase this book, for example from Amazon.

- You need to learn the information in the book as the test is based on it.
- You should aim for a pass mark of at least 60%.
- Please remember this book includes both GCSE and A-level content.
