OXFORD AREA SCHOOL DISTRICT

To ensure the safe and proper operation of the school district's system of student transportation, rules and regulations regarding student conduct shall be established and enforced consistent with the following guidelines:

A. The Superintendent of Schools shall establish rules and regulations governing student bus conduct and administrative procedure to effect their implementation.

B. All school rules and regulations regarding student behavior are in effect while students are being transported.

C. Students who violate established rules governing student conduct may be denied transportation. The denial of transportation shall be at the discretion of school authorities.

D. Denial of transportation shall not be considered an acceptable reason for nonattendance. Parents shall be responsible for student transportation in those cases where a student's transportation privileges have been suspended.

E. Consistent with this policy the bus driver is responsible for ensuring appropriate student bus conduct and has the authority to act in an appropriate and prudent manner to ensure compliance with established rules of conduct, maintain order and provide for the safe transportation of students.

F. Video tapes of student activity on school buses may be used to further the resolution of bus misconduct issues and for that purpose only. Every effort must be made to protect the privacy rights of those students not engaged in the misconduct. Parents of those students involved in the misconduct may view that portion of the tape involving the misconduct.
