Updated April 2026

Dear Facility User/Renter,

We are pleased to announce that The Seneca Valley School District has implemented a lifesaving Cardiac Emergency Response Plan.

- In 2020, the American Heart Association reported over 7000 cases of out-of-hospital cardiac deaths in youths.
- Across the United States, even the best emergency medical services (EMS) systems take over 3 to 5 minutes to reach a cardiac arrest victim.
- Prompt action taken by bystanders can double or triple a victim's chance of survival.
- It has been shown that having a coordinated response plan to a cardiac emergency will reduce death.

Steps to take in a Cardiac Emergency:

See the attached response plan outlining the steps to take during a cardiac emergency at school or on school grounds. Please orient your team with this plan and determine who is going to perform the steps below.

- **Recognize Sudden Cardiac Arrest** *(assume cardiac arrest in anyone who is collapsed and unresponsive)*
- **Call 911** (and follow the directions given by operator)
- **Retrieve an Automated External Defibrillator (AED)** *(location of school AEDs attached)*
- **Begin Hands-Only CPR** *(push hard and fast in center of the chest about 100 times a minute)*
- **Direct EMS to the scene** *(send member of your team outside to direct EMS to the cardiac arrest victim)*

How can you be prepared?

Review the steps of a Cardiac Emergency Response.

Watch the 60 second *Hands-Only CPR video* at www.heart.org/handsonlycpr.

In the event of a cardiac emergency, after implementing response protocol, please notify **Jason Young (Supervisor of Safety and Security)** at **724-504-7099** for a post-event debrief.

Thank you for your support.

The person is having a cardiac arrest and may have the signs described above and should be treated the same.***
Steps of Cardiac Emergency Response Plan Before Emergency
Review steps of after-hours Cardiac Emergency Response Plan.
Review location of all AEDs.
Steps of Cardiac Emergency Response Plan During Emergency
If a person collapses, check to see if they respond. Shake the person by the shoulders and speak loudly to them to get a response from them.
Call 9-1-1 as soon as you suspect a sudden cardiac arrest- that the heart has stopped.
Begin CPR right away, pushing hard and fast in the center of the victim's chest 100-120 times/minute.
Get AED, Open and/or Turn on the Unit. Follow the VOICE Directions to apply pads to the victims' chest. Follow pictures on pads.
Have someone wait outside for EMS and direct them to the location
Transfer to EMERGENCY MEDICAL SERVICES (EMS)
Steps of Cardiac Emergency Response Plan AFTER Emergency
Contact School Emergency Contact immediately following the event.
Arrange to replace AED electrode pads immediately following the use of AED.
Allow emergency medical services or victims' hospital care team access to AED to get data from the machine/AED about the cardiac arrest. The information needed can be retrieved on-site. Do not remove AED from the School.
Schedule discussion of emergency with school staff after the event to review response performance and school's cardiac emergency response protocol.

SUMMARY:

If a person is found unresponsive

- **Call 911**
- **Start CPR**
- **Retrieve the AED, apply pads and follow instructions.**
