UNFINISHED BUSINESS

Solicitor: Mark Fitzgerald, Esq. – Mr. Fitzgerald reported that a Supreme Court case in Pennsylvania that answered whether policies that are in place for assessment appeals was constitutional. An apartment complex brought a case against Downington School District that it was discriminatory for school district to bring assessment appeals against commercial properties.

The Supreme Court gave clear guidance with a 4-3 decision that the school policies are constitutional. That is good news for school entities that some of their properties are appropriately assessed for revenue purposes.

NEW BUSINESS:

A. Monroe Career & Technical Institute – Mrs. Diane Serfass: The report is informational and is attached. She also shared that on May 14th MCTI held their senior awards at their building. During 2026, PSBA has focused its efforts on increasing school funding, reducing unfunded mandates, improving transparency laws, and ensuring districts receive the support needed to meet rising educational and operational costs.
2. 2026 Advocacy Day – Harrisburg
   Most recently, more than 100 school board members, superintendents, and education leaders gathered at the State Capitol in Harrisburg for PSBA's 2026 Advocacy Day. Participants met directly with lawmakers to discuss urgent challenges facing school districts and to advocate for meaningful legislative action. Key topics discussed included: fair and equitable school funding, rising special education costs, relief from unfunded state mandates, student mental health and safety supports and workforce shortages in education.
   PSBA emphasized that many districts continue to face increasing financial pressures while attempting to maintain quality educational programs and student services.
3. PSBA also issued a formal response to Governor Josh Shapiro's proposed 2026–27 state budget. The association acknowledged and appreciated the proposal's continued investments in: public education, student mental health initiatives, school safety programs and student support services.
   However, PSBA noted that additional improvements are still needed to fully address district concerns. Specifically, the organization stressed that many school districts continue to struggle with: inflationary operating costs, cyber charter tuition expenses, staffing shortages, increasing special education obligations, aging facilities and infrastructure needs. PSBA encouraged lawmakers to continue

working toward long-term, sustainable funding solutions that better reflect the actual costs school districts face.

4. Sunshine Week Testimony and Transparency Efforts
   During Sunshine Week, PSBA provided testimony supporting efforts to modernize Pennsylvania's public notice and transparency laws. The association advocated for: more efficient communication methods, updated public notice requirements, improved accessibility for community members, greater flexibility for districts using digital communication platforms, PSBA emphasized that transparency remains a critical component of effective school governance and community trust.
5. Continued Legislative Advocacy PSBA remains actively engaged with state officials on several ongoing legislative priorities, including: equitable special education funding, mandate relief for districts Cyber charter school funding reform, mental health support initiatives, school safety funding and workforce recruitment and retention. The organization continues to stress that districts cannot continue absorbing rising costs without additional state support or meaningful reform.
6. Overall Takeaway PSBA's recent advocacy efforts reflect growing concern among school districts regarding financial sustainability, staffing challenges, and increasing operational demands. The association continues to advocate for policies and funding solutions that support local school districts while maintaining transparency, accountability, and strong educational opportunities for students across Pennsylvania.

PLEASANT VALLEY CITIZENS – Agenda items/Non-Agenda items:
Bonnie Klingel from Eldred Township thanked the Board for their support of the Pleasant Valley Band and shared her thoughts on the Facility Usage Report program and the process to reserve space.

PLEASANT VALLEY SCHOOL DIRECTORS:
Mr. Walters also shared his concerns regarding the facility usage process and we should look into restructuring it.

Dr. Howard shared detailed packets with the Board and presented NWEA Data, noting that students are tested three times per year. She reviewed slides for growth versus achievement for both grades K to 12 and then by buildings. She explained the different tools the school district is using For example, math for the entire district from Kindergarten to Algebra 1 growth was 79%. The achievement percentages at the beginning of the year compared to the end of the year is showing we are closing the gap. The reading results showed growth at 63%. The achievement again shows we are closing the gap. Pleasant Valley Elementary demonstrated 85% growth in mathematics. Dr. Howard noted that there were not as big gains at the middle school but it is moving in the right direction. For the high school, only students in grades 9-12 Algebra were tested. High school students were tested in ELA and Life Science was just Biology. Next year, the high school will test all of the students in a math class.

Dr. Konrad said we are very intentionally to our students needs and to their buildings. Everyone came together to share insights to create groups to share students' achievements She explained how the Board can break it down in their packets.

Dr. Howard shared that all levels of support came together. She shared that we can click on the graph percentages and see the exact students who make up the percentages and need more help. The ongoing action plan is to continue to level the students, continue to use HMH curriculum resources, provide multi-tiered supports and continue to survey building staff regarding professional development needs. Dr. Howard shared what programs each building is using. She believes we will be in a better place next year as we are going in the right direction.

In response to an inquiry from Mr. Gesiskie regarding high school Math and Science scores, Dr. Howard clarified the sample size of the current data and reiterated that universal testing for all school math students will commence in the fall.

Mrs. Hopely asked what else is used and Dr. Howard shared that it is common assessments that we create and is not a snapshot of how they compare to other school districts. Mrs. Hopely asked for clarification on the schools that use NWEA and how we compete. Dr. Howard explained it is specialized when the students are tested. She also shared that the data will move with the students and we will be able to place students where they need to be. Dr.

Konrad shared they buildings are looking at the clean data and what are the groups and skills they may be struggling with.

Mrs. Hopely requested the implementation of a checklist system for vetting new programs and add-ons prior to acquisition. Dr. Howard shared that their review provides a full picture, but try to implement to see what works and we are listening to our teachers and need to make decisions and there will be times we will need more things. She thanked Mrs. Hopely for the feedback and will share with her team. Mrs. Hopely also inquired about their data or research for the difference between students reading short reading passages or books. Dr. Howard shared that it does not make a difference what you are reading but teaching the skills on how to read critically and analyze. Dr. Howard offered to meet individual with Mrs. Hopely for further discussion.

Mr. Gesiskie inquired about the Gemini contract. Mr. Van Voorhis reported that due to licensing model adjustments by Google Education Plus, the district is currently using Gemini tool at no cost, through future renewal contracts may be required if licensing structures change.

Mr. Gesiskie enjoyed attending the move up ceremony today at PVI and noted the chorus was great. He also helped at the high school's Lunch with Leadership today.

Mrs. Hopely shared she also enjoyed the program at PVI and marveled how the students applauded each other.

Mrs. Kresge expressed appreciation to Dr. Howard for the today's presentation. She also is grateful that the Board is listening to our teachers and providing what they need in the classroom. She also appreciates the teachers who come before the Board and letting them know what they need.

Mrs. O'Keefe shared the girls lacrosse won this evening and will host Delaware Valley at home on Saturday.

Mrs. Serfass congratulated the Class of 2026.

SUPERINTENDENT REMARKS: Dr. Konrad extended appreciation to Isabella for her contributions throughout the school year and offered best wishes for her upcoming enrollment at East Stroudsburg University (ESU). He congratulated the Class of 2026 and looks forward to the upcoming commencement celebrations.

Additionally, he commended the Board of School Directors for their dedicated volunteer service and governance, reminding everyone that they support the vision to move the district forward. He also expressed his pride in the staff for maintaining a consistent, student-first approach throughout the academic year.

Mrs. Kresge asked if we are celebrating the data with the staff. Dr. Konrad said we are going to share with the staff the results of the first year and to show them the growth and the achievement wins. Dr. Howard is sharing with the building principals tomorrow.

ADJOURNMENT:
There being no further business to come before the Board, Mr. Clark motioned, seconded by Mr. O'Keefe to adjourn the meeting at 9:28 PM.
