The district has officially submitted an Application for Review with Evergy to move forward with installing solar panels at both the transportation building and the natatorium at Campus High School.

This review is a required step, and upon approval by Evergy, Hutton Construction will begin the process of installing the solar system at the Transportation building. Hutton will also begin the process of preparing the surface at Campus to have solar panels installed; however, this may not occur until later in the school year. We're excited about the long-term benefits this will bring to our district and community.

~ Jeff Hersh, Superintendent
