Re: K-5 Math Adoption

Date: April 19, 2021

History/Relevance: We adopted Everyday Math, our current K-5 math curriculum, during the 2010-2011 school year. This was prior to the new Kansas College and Career Ready Standards (KCCRS). We have updated twice since the original adoption with new copyrights of the same materials. We are in need of an updated math curriculum that will better meet the needs of the new state standards. We also need a curriculum that will better utilize our 1:1 Chromebook initiative.

What: We are asking for approval to purchase a six year subscription for I-Ready math materials from Curriculum Associates. This also includes a diagnostic and intervention system which will be critical to filling gaps created by the Covid 19 pandemic.

Why: We are out of subscription with our current K-5 math curriculum. This causes us to have to purchase the student workbooks and online access each year. Entering into a new subscription would eliminate the need for this annual purchase.

Where: These resources will be in all elementary buildings and TCDS to provide math curriculum for grades K-5.

When: These resources will be in our buildings beginning in the 2021-2022 school year.

How: Once the resources are approved, we will provide training for staff and time to work through the new materials.

Who: This proposal will allow us to provide teachers resources aligned to both the demands of the KCCRS and the state assessment. It will provide up to date math curriculum for all students, grades K-5.

How Much: The total cost of this adoption, including teacher training, teacher resources, and students resources is $399,864.32. The quote is attached to this proposal.
