Re: Graduation Credit Reduction for Class of 2024

Date: April 14, 2021

History/Relevance: During the Covid Pandemic last school year 2019-20, we requested a credit reduction for the classes of 2021, 2022, & 2023 (the existing classes at the high school at the time) from 27 credits down to 24 credits due to the Covid shutdown of in person attendance.

What: This request is for that same grace for the current freshman class, the class of 2025, a graduation credit requirement of 24 credits.

Why: We were hopeful that full time learning for all classes could occur all year, but with the required remote learning from Oct to February, it has had a similar impact on the class of 2025.

Where: Campus High School

When: For the class graduating in 2025

How: We have several current Freshman that have failed classes from the remote learning time and are quite a ways behind on acquired credits.

Who: Class of 2025

How much: $0

Thank you,

David Morford
