Re: Reopening Schools Plan

History:

Since the Governor announced that Kansas schools cannot reopen until after Labor Day, the Executive Team and other district and building leaders have been creating operational guidelines and curricular and instructional plans to provide for the safe return to school for staff and students.

What:

We are requesting approval for the operational guidelines for reopening schools and the instructional delivery models for staff and students. These will be provided in detail at the board meeting by Dr. Clint Schutte and Jennifer Reed. In addition, we will be requesting that you schedule a Special Board of Education Meeting next week in order to approve a new district calendar.

Why:

The pandemic and the state's response have put our school district in a position to consider providing parents with choices for how they would like their students to return to school. Staff and student safety are of the utmost importance as we design our reopening school options.

How:

Our operational guidelines will be implemented throughout the district on an ongoing basis. Our instructional delivery model will provide parents with a choice of having their students attend school in person or via a remote learning option. In addition, we will be taking into account staff return to work limitations and endeavoring to allow for a variety of work options as necessary.

Where:

Our reopening school model will allow for a face to face at school learning option as well as a remote learning option.

Who:

The staff will create a safe reopening school option that will provide high quality teaching and learning opportunities for students.

When:

Our reopening schools plan will start for students after Labor Day.
