

Dear Families,

Welcome to Kindergarten at Envision Science Academy! We are so excited to begin this wonderful journey with you and your child. Kindergarten is a year filled with growth, learning, friendships, and fun experiences that help build a strong foundation for future success. As your child prepares to enter Kindergarten, there are a few important skills that families can begin practicing at home to help students feel confident and successful at school. Encouraging children to follow directions, share with others, take turns, use kind words, listen when others are speaking, and always try their best can make a big difference in helping them adjust to the school environment.

At Envision Science Academy, students are introduced to our school-wide SOAR pledge and learn how to practice these expectations each day:

- **S** – Showing self-control
- **O** – Own your learning
- **A** – Act responsibly
- **R** – Respect myself, others, and the environment

Throughout the year, students will learn how to apply these values both inside and outside of the classroom as they grow into confident and caring learners.

In Kindergarten, students are introduced to many important early literacy and math skills at the beginning of the school year. They will begin learning letter names and sounds, reading simple words and sentences, writing, counting, number recognition and shapes. As the year progresses, students will continue building on this knowledge through hands-on learning experiences, small group instruction, and engaging classroom activities.

There are also many exciting events and activities to look forward to throughout the school year, including:

- Field trips
- At-home and in-class projects
- The Kindergarten Parade
- Guest readers and enrichment activities
- And so much more!

We are honored to partner with you during this important year of learning and growth. Thank you for supporting your child as they begin their Kindergarten adventure. We cannot wait to meet our newest students and create a year full of meaningful memories together! See you soon at Open House!

Warmly,
The Kindergarten Team
Envision Science Academy
