Student Internet Access Acceptable Use Policy

USD 261 believes the use of the Internet can enhance our students educational experiences. The school district is also aware there are sites that contain inappropriate material. The use of the Internet is a privilege, not a right. Inappropriate use will result in the loss of this privilege as well as disciplinary action.

Students will promise to handle all computer equipment and accessories with care and to ask for help when not knowing what to do. The student will not use inappropriate conversation on the computer and will only go to sites bookmarked or approved by the teacher. Should the student arrive at an inappropriate website, they will immediately turn off the monitor and tell the teacher. The student will not tell or disclose personal information (such as name, etc.) while on the internet.

The student understands the consequences for not following these rules regarding acceptable use of the Internet will include loss of Internet access privileges and potential disciplinary action.

I agree that my child may participate in structured Internet activities. I will support the rules stated above regarding appropriate use of Internet privileges. I understand the Internet is an excellent resource. I am also aware that some Internet sites are inappropriate.

Teachers will monitor student use of the Internet and will communicate with the Parent/Guardian any infraction of the above mentioned Acceptable Use Rules. See BOE policy IIBG (also GAA and JCDA)

Update to Handbooks
Protecting Children in the 21st Century Act

The USD 261 Haysville Public School district complies with federal and state Children's Internet Protection Act (CIPA) laws and promotes Internet safety for all students through a curriculum that addresses cyber bullying and appropriate interaction with other individuals on social networking websites and chat rooms. It shall be the responsibility of all members of the USD 261 Haysville Public school staff to educate, supervise and monitor appropriate usage of the online computer network and access to the Internet in accordance with the CIPA laws.
