

Welcome to AP Calculus AB!

We have a lot to accomplish next year, and we would like to get started right away in September! With that goal in mind, we would like you to complete some work over the summer so that you are ready to engage with Calculus right away. Summer work is most effective when you look at it in the last few weeks of August, so the material is fresh in your mind.

You should be able to access your summer work by using this link:

<https://www.deltamath.com/students?code=BD4X-C64V>

If that doesn't work, you will need to create an account with Delta Math. Please follow these instructions:

1. Go to [deltamath.com](https://www.deltamath.com)
2. Create a student account through your Concord Carlisle Google Account
3. Join Mr. Marshall's class by entering this code: **707698**
4. When you have enrolled in the class, you should see 3 assignments.

The assignment comes with optional videos if you need a refresher on how to do the work. You can also take advantage of online resources such as Khan Academy and Purple Math.

You should be familiar with

- Linear Functions
- Functions and Graphs
- Exponential Functions
- Inverse Functions and Logarithms
- Trigonometric Functions

You should expect to spend 4-5 hours total on this work. It is recommended that you complete this assignment in the last 2-3 weeks of Summer.

Please reach out if you need help signing up for Delta Math, or if you have any questions about what's expected.

This work is due the first day of school: **Monday, August 31, 2026**

There will be a quiz on this material on Tuesday, September 1st.

Enjoy your summer, and we look forward to seeing you in the fall!

Best,
Mr. Marshall, Mrs. Khan
