II. Strategic Technology Planning

1. What is the overall district mission?

It is the mission of the Eastchester Union Free School District to provide a high-quality education in a safe, stable, and supportive environment that promotes respect, values individuality, and prepares all students to succeed academically, socially, and emotionally.

2. What is the vision statement that guides instructional technology use in the district?

The Eastchester Union Free School District views technology as an essential part of both teaching and learning, as well as the efficient operation of the school system. Students and staff use technology to access information, think critically, collaborate, and create meaningful work.

The District continues to expand the use of technology in ways that support instruction while also improving systems behind the scenes. This includes the thoughtful use of emerging tools such as artificial intelligence to enhance productivity, support personalized learning, and reduce routine administrative tasks.

Students are taught to use technology responsibly and effectively, building the skills needed to evaluate information, solve problems, and adapt in a changing digital environment. Staff use technology to support instruction, analyze data, and communicate clearly with students and families.

At the systems level, the District prioritizes reliable infrastructure, secure platforms, and better integration between systems. This work allows for more consistent access to tools, more accurate data, and more time for staff to focus on instruction and student support.

3. At the start of the 2026-27 school year, will the district provide a dedicated mobile device for every student in all grades?

Yes

Instructional Technology Plan - 2026-2029 Instructional Technology Plan**V. NYSED Initiatives Alignment**

Page Last Modified: 04/22/2026

V. NYSED Initiatives Alignment

1. How will the district's use of instructional technology support a comprehensive and sustained effort to improve student performance and academic standards, while also addressing the need to provide equitable learning opportunities "everywhere, all the time" (National Technology Plan)?

The District uses instructional technology as part of a broader effort to improve student learning and ensure access to educational resources both in and out of school. Through a 1:1 environment, reliable infrastructure, and consistent access to digital platforms, students are able to engage with content and complete work from any location when needed.

The District continues to focus on equity by ensuring that all students have access to devices, internet connectivity, and appropriate digital tools. At the same time, work is underway to better connect systems and reduce inefficiencies through automation and improved data integration.

Professional learning supports this work by helping staff use technology in ways that are practical and meaningful. This includes a growing focus on the responsible use of artificial intelligence to support both instruction and productivity. Together, these efforts support academic standards while preparing students for a technology-rich world.

2. **At the start of the 2026-27 school year, will the district offer full-time virtual instruction to any students? (Select all that apply)**

- ☐ Yes. Our district operates a full-time virtual instruction program.
- ☐ Yes. One or more of our students will attend a program operated by a BOCES or another public school district.
- ☒ None of our students will participate in a full-time virtual instruction program.
- ☐ Other

3. If the district files or has filed a Smart Schools Investment Plan (SSIP) to apply for Smart Schools Bond Act funds, all responses in this survey align with the district's response to any related question(s) in the SSIP.

The district does not have an active SSIP.
