Instructional Technology Plan - 2026-2029 Instructional Technology Plan

V. NYSED Initiatives Alignment

Page Last Modified: 04/20/2026

V. NYSED Initiatives Alignment

1. How will the district's use of instructional technology support a comprehensive and sustained effort to improve student performance and academic standards, while also addressing the need to provide equitable learning opportunities "everywhere, all the time" (National Technology Plan)?

A district's strategic use of instructional technology can support a comprehensive effort to improve student performance and academic standards by focusing on three key areas: personalized learning, data-driven instruction, and the development of future-ready skills. This approach also addresses the need for equitable opportunities as outlined in the National Technology Plan's vision of "everywhere, all the time" learning.

Improving Student Performance and Academic Standards

- **Personalized Learning:** Technology allows teachers to tailor lessons to individual student needs and learning styles. Adaptive learning platforms analyze student progress and adjust content and pacing, ensuring each student receives targeted support and can master concepts at their own speed.
- **Data-Driven Instruction:** Educational software and learning management systems (LMS) provide real-time data on student performance, helping teachers quickly identify areas where students are struggling. This allows for timely interventions and instructional adjustments, making teaching more efficient and effective.
- **Enhanced Engagement and Resources:** Digital tools make learning more interactive and visually stimulating, which can increase student motivation. Furthermore, the internet provides students with access to a vast array of high-quality educational resources, such as e-books, videos, and virtual simulations, that go beyond traditional textbooks.

Addressing Equitable Learning Opportunities

- **Bridging the Digital Divide:** A comprehensive plan ensures all students have equitable access to technology, including devices, reliable internet connectivity, and digital content. This is a foundational step to provide learning opportunities regardless of a student's location or socioeconomic background.
- **Access to Experts and Advanced Courses:** Technology removes geographical barriers, allowing students in remote or underserved areas to access specialized courses, online tutoring, and connect with subject-matter experts they might not otherwise have access to.
- **Assistive and Accessible Technology:** The use of inclusive learning technologies, such as text-to-speech, speech-to-text, and captioning tools, supports students with diverse needs and disabilities. This aligns with Universal Design for Learning (UDL) principles and ensures all learners can participate meaningfully in classroom activities.

2. At the start of the 2026-27 school year, will the district offer full-time virtual instruction to any students? (*Select all that apply*)

- ☐ Yes. Our district operates a full-time virtual instruction program.
- ☐ Yes. One or more of our students will attend a program operated by a BOCES or another public school district.
- ☒ None of our students will participate in a full-time virtual instruction program.
- ☐ Other

3. If the district files or has filed a Smart Schools Investment Plan (SSIP) to apply for Smart Schools Bond Act funds, all responses in this survey align with the district's response to any related question(s) in the SSIP.

Yes
