Academically Gifted and Talented Program and Advanced Classes

SOAR at Woodruff Elementary School and Woodruff Intermediate School

The gifted and talented program at Woodruff Elementary School and Woodruff Intermediate School is called SOAR…Students on a Roll. SOAR follows the pull-out model. This model provides services to identified students through a self-contained class where students are removed from the regular classroom for a specified period each week to receive differentiated instruction. The curriculum typically focuses on enrichment that is directly related to grade level academic standards. Multi-grade grouping may be used in the pull-out class to constitute classes of sufficient size.

Advanced Classes at Woodruff Middle School and Woodruff High School

Gifted and talented students participate in Gifted science classes. Students in eleventh and twelfth grades are strongly encouraged to enroll in Advanced Placement courses.
