ST. MARTIN PARISH MAGNET PROGRAM

STEAM CONNECTIONS

JULY 2026

Our STEAM-tacular Summer Enrichment Program was a BLAST! We had two weeks packed with special animal encounters, engineering cardboard arcades, designing carnival rides, tie-dying our own fashionable hats, sculpting & imaging carnival food & props, robotics, combining art + circuits to make our own games, theatrical carnival performances, jamming out to carnival-themed tunes and so much more!

Each week families were invited to a Carnival Day with lunch and activities & performances designed & created by the campers themselves!

And our last day we finished off with foam blasters, water slides & water games! Who knew learning could be so much fun???
