|              |                                                                    | Fire call came in around 7:30am today for possible structural damage to the indoor pool structure located in the rear of the home. Visual observation of the ridge vent of the structure is missing and open to the outside. Multiple portions of the roof are open to the outside. Ridge beam appears to be cracked/split leading to a possible failure. Multiple areas of walls where sheetrock is removed and NM cable wiring is exposed with multiple open splices that are exposed causing a potential shock hazard. Soffits located around the pool structure are missing and leaving the framing exposed to the outdoor elements. The complete structure is in complete disrepair and has been posted as unsafe. Electrical and gas service have been disconnected to the home. |                 |            |                  |                |                  | Contractor                                      |                                                                                               |

|                                                |                                                                   | Complete the electrical requirements for the installation of two HVAC mini split systems for hvac permit PRMH20603135 for the installation of an LG model KSSAL091A mini split in the first floor converted three season room and the second floor converted three season room. The attached document provides details for the LG KSSAL091A 9000 BTU Single Zone Mini Split System which includes specifications on the KUSAL091A Outdoor Unit and the KNSAL091A Wall Mount Indoor Unit. The power supply is 208-230 volts with a 2 pole, 20 amp breaker. It has a SEER2 rating of 27 and an EER2 rating of 15.8.<br>Notes: 1) The cost reflected on this permit is \$1 because the electrical installation cost was included in the aforementioned Hvac permit. 2) It would be helpful if this permit could get expedited and approved in the next few days so that we could have the rough inspection for this on June 18 when all of the other electrical rough inspection will be completed. If that is not practical, then we will proceed as instructed. |                 |            |                       |                |                  | Applicant      | Yara Montminy, Address:21 Nelson Street, Phone:(860) 983-7792                                  |

Provide wiring for second story alteration for two bedrooms and one bathroom. Including updating smoke detectors on second floor only.

Wiring of the renovated kitchen. Dedicated circuits, GFI outlets, arc fault protection and tamper resistant devices will be installed as required.

Remove one existing layer of asphalt shingles down to the original roof deck. Install new F5.5 drip edge and C-3 rake metal around roof perimeter. Install ice and water shield 6 feet from all roof edges and around chimney. Install 4" seam tape over plywood joints per Connecticut code requirements. Install synthetic underlayment, GAF starter shingles, GAF architectural shingles, ridge vent, ridge cap shingles, new vent pipe flashings, and chimney lead flashing. Repoint existing chimney mortar as needed. Total roof area approximately 1,905 sq. ft. (21 squares). No structural modifications proposed. Replacement of damaged roof sheathing, if required, will be performed under this permit.

|              |                                              |                |                 | Protection of building and landscaping with specialty roof to ground debris system Removal of existing shingle roofing system down to roof deck. Sheathing to be inspected for rot or damage, compromised decking to be replaced at cost of \$4.50 per square foot installed (billed at \$80 per hour plus materials in the case of rafter or fascia replacement). Installation of CertainTeed ice and water membrane approximately 6 ft. up from eaves, around penetrations, and 3 ft. in valleys. We will install ice and water membrane 9 feet up in the area below that is a 5 pitch. Please note that we will install full ice and water as required on the roof areas that are a three and four pitch as shown in the picture below. Installation of F8 edge metal to roof perimeter (Color: White or Brown) Installation of 4" wide seam tape to plywood decking except where full ice and water is installed. Installation of CertainTeed Synthetic Underlayment to roof deck where applicable. Installation of CertainTeed SwiftStart starter shingles to roof perimeter. Installation of lifetime CertainTeed Landmark Series Architectural Shingles. Installation of flashing components, including step flashing, counter flashing, and pipe boots, where applicable. In the wall area next to the left of the two dormers, we will remove the first course of wood siding, install ice and water shielding material up the wall, step flashing, and install a new painted board in the area where the siding was removed. If we see any damaged wood siding during the roof replacement, we will let you know so that is can be discussed further. Furnish and install new vinyl siding on the two front dormers (Color:) Installation of rolled Ridge Vent where applicable. Installation of color matched CertainTeed Shadow Ridge hip and ridge caps. Cleaning of gutters and removal of all job-related materials into container provided by J.J. Landerman Roofing Company included. Magnetic sweepers to be used as part of clean-up to pick up any fasteners. Includes CertainTeed SureStart PLUS 5 Star Warranty (50 Year Material and Labor coverage and 25 Year Workmanship coverage). |                       |                         |                  |                |                                                                                                    |  |

|              |                                             | Remove and replace all existing exterior siding on all elevations of the home. Removal of existing chimney and fireplace. Work includes installation of a new weather-resistive barrier, exterior rigid insulation, rainscreen/air space, and new siding. Modify soffit and fascia as required to accommodate the increased wall thickness while maintaining the existing roof assembly. Convert the existing sunroom to a screened porch. Install six (6) new windows and one (1) new garage door. Install interior guardrails at existing sliding door openings in preparation for a future deck. Future deck not included as part of this application. |                 |            |                       |                                          |                  |                |                                                                                                 |
