

Bilton School Sixth Form

Geography– Transition Work

Physical geography

1. Tectonic Processes and Hazards

This topic looks at the processes that pose a large risk to many part of the world. There are many places in world where there is an interaction between these dangerous processes and high population density. This topic addresses how and why some places are more vulnerable than others. Work through the following and make notes on the further reading template at the bottom called **KS5 Geography Independent Learning Sheet / Wider Reading please complete one for each section below**

Why some locations are more at risk from tectonic hazards?

In each case try and answer the questions!

Additional reading/ watching

The Kite runner

Captain Phillips

The reluctant fundamentalist

Prisoners of Geography – superb book for Y13 part of the course.

Watch the news! Stories on migrants, impact of Covid on areas within UK and trade negotiations.

In each case- how are we linked to each other? Is this a positive or negative relationship for each.
