

MISERICORDIA UNIVERSITY PHYSICIAN ASSISTANT PROGRAM

STUDENT EMPLOYMENT WHILE ENROLLED IN THE PROGRAM

Misericordia University does not prohibit admission into or progression through the Physician Assistant Program if a Physician Assistant student determines that he or she must work while in the program. However, students are strongly discouraged from working during their time in the program. If a student chooses to work during the academic year, the work schedule must not interfere with class performance, course schedules, or clinical rotation schedules. No time is excused for participating in outside activities including but not limited to playing or coaching a sport. Students are highly encouraged to be mindful of their commitments while in PA school due to the rigors of the program curriculum.

Note: Policies and procedures are consistently applied to all similar situations in a similar manner.
