

# Setting Up a Journal Alert in EBSCO

You can set up an e-mail alert to automatically notify you each time a new issue of a selected journal title, indexed by EBSCO, is available. To create a journal alert, you will need to create an account in MyEBSCO, which is independent of using your Library barcode.

1. Select an [EBSCO database](#) (i.e., noted to the right of the database name on the databases page). Choose a subject area first (e.g., "Criminal Justice," "Fashion," "Business and Management.").

2. If you are off-campus (or using a laptop on-campus), make sure to select "Click here for remote access." You will be prompted to enter your "Library barcode."

3. You will need to log in to "MyEBSCO" to create a journal alert. To create an account in "MyEBSCO," select the icon in the upper right-hand corner and follow the instructions to "Create an account."

The screenshot shows the Fisher College library homepage. In the top right corner, the "MyEBSCO" link is circled in red. The page includes a search bar, a sidebar with navigation links like "My dashboard" and "Research tools", and a main content area with search filters and options.

4. After logging in, choose "Publications," and enter the name of the journal or magazine. Select the search icon .

The screenshot shows the Fisher College library homepage after logging in. The "Publications" tab is selected and circled in red. A red arrow points to the search bar where "consumer reports" has been entered. The search icon is also circled in red. The page displays a list of search results, including "Consumer Reports" and "Consumer Reports Buying Guide".

5. Click on the link for the journal.
