

RFP - Construction Testing & Special Inspection Services

Addendum Notice 7/7/2026 – Question & Answer

The following question was submitted by a potential proposer. The district's response is provided below.

QUESTION:

POTENTIAL PROPOSER would like to proceed. We wanted to confirm that we satisfy the NYSED requirements referenced in the RFP. Specifically, if compliance requires our firm to hold a Letter of Authorization (Certificate of Authorization) to practice engineering in New York State.

The RFP states:

"The Special Inspection Agency must be approved and meet all applicable requirements of NYSED, the New York State Uniform Code, and all other authorities having jurisdiction."

ANSWER:

The district requires that the selected consultant comply with all applicable requirements of NYSED, the New York State Uniform Code, and all other authorities having jurisdiction. Each proposer is responsible for determining and maintaining any licenses, certificates, registrations, approvals, authorizations, and professional qualifications required under New York State law to perform the services contemplated under this solicitation.

The district will not provide interpretations of New York State professional licensing requirements.
