Dear 2nd Grade Students and Families, June 2026

Happy End of First Grade! We are excited for you and your family to enjoy a relaxing and refreshing summer break together. Below we have listed a few recommendations for your child to stay active in learning and maintain their current level of progress in both Math and Literacy. We can offer simplified summer work plans to maintain structure and organization to trach summer learning each week at your request.

Reading: We recommend that your child reads for at least 20 minutes a day, five days a week. This includes:

- Your child independently reading "just right" hard copy books
- Reading a higher level book with or aloud to your child
- Listening to audiobook tapes, podcasts, etc. and/or playing games as a family, (ex: Apples to Apples)

Math: For math, we encourage the students to continue practicing basic math facts. We are sending Books from the Go Math series that were not completed in class for them to work on over the summer. Students are encouraged to work on Math at least 3x a week for 15 minutes.

Some other math ideas and resources include:

- IXL Math Practice- Highlighted items on www.ixl.com
- Addition and Subtraction Fact Flash cards
- Family Math games (Ex: Countdown, Make 7, Mastermind)

Writing: We are sending each student home with a writing journal. Please encourage your child to try to write at least 3 times per week throughout the summer. Your child can write about their summer experiences or use the Summer Month Calendar Writing Prompts enclosed. We look forward to reading about your summer adventures!
Most of all, we hope that you enjoy your family time together.
Best wishes and see you in September!

Mrs. Goodwin and Mrs. Kirkpatrick
