

Hutto Independent School District

Spring 2026

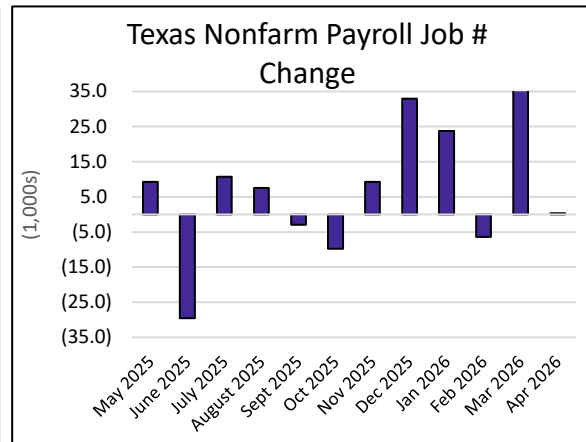

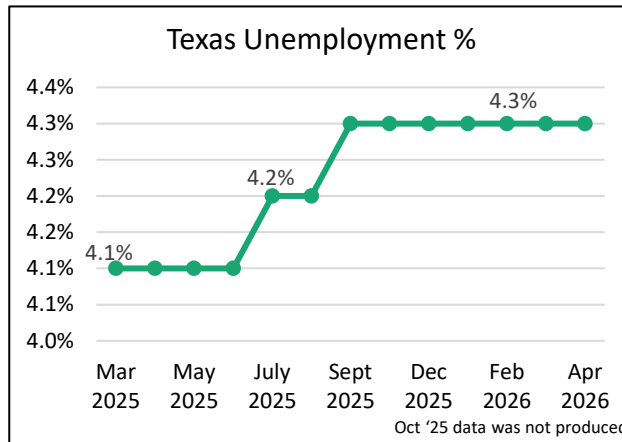

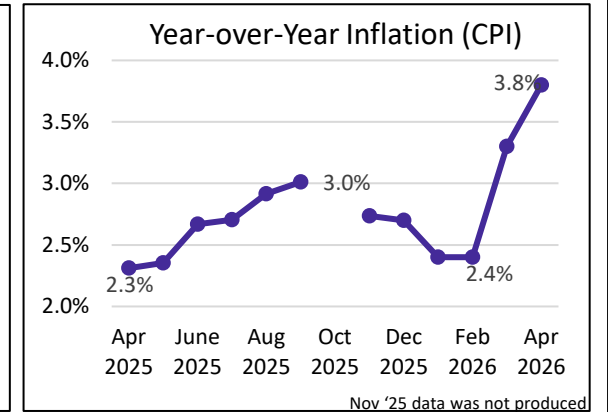

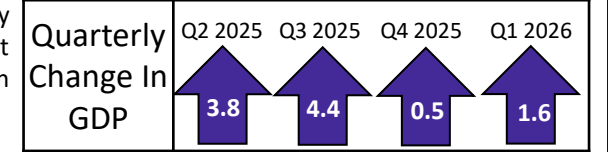

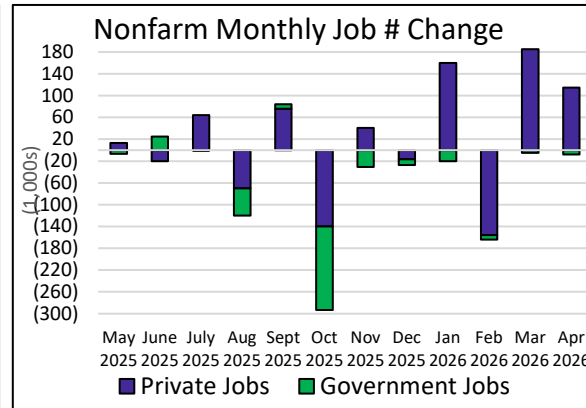

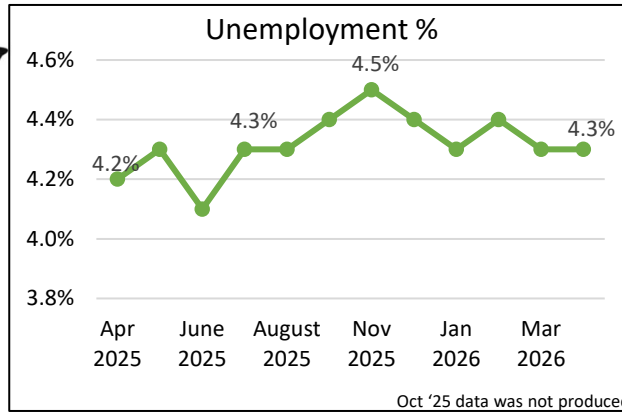

Mobility and Housing Report

National Economic Conditions

The national unemployment rate has fluctuated from 4.1% to 4.5% over the past year. The past year's monthly payroll numbers peaked in March. Government jobs declined the most in October due to the government shutdown. Inflation rates have jumped due to energy prices. The GDP has had four positive quarter with stronger growth occurring over a half a year ago.

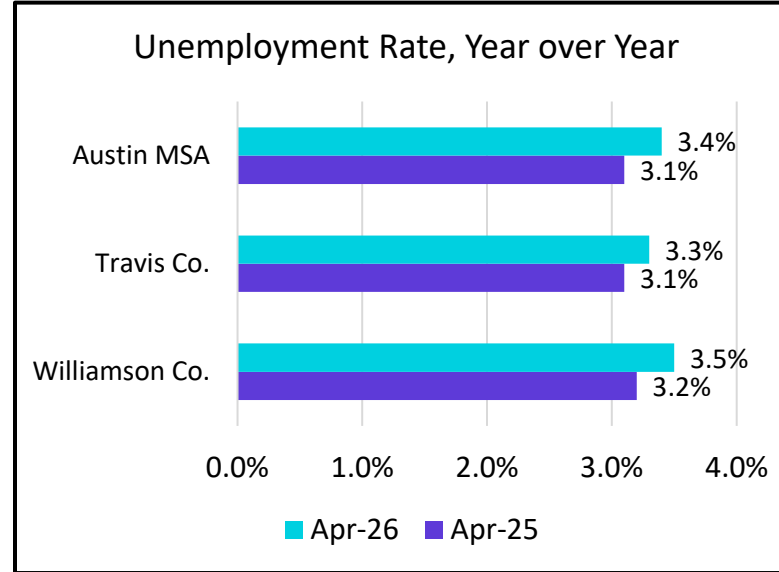

The Federal Reserve Bank of Dallas reports that the Texas economy began 2026 with a modest rebound following a stagnant 2025. While manufacturing output accelerated in April, the service sector remains flat, and the overall job growth forecast has been tempered to 1.4%. Regional growth continues to be constrained by labor shortages linked to declining immigration, while geopolitical instability and persistent tariff-related price pressures have driven finished goods prices to their highest levels since 2022.

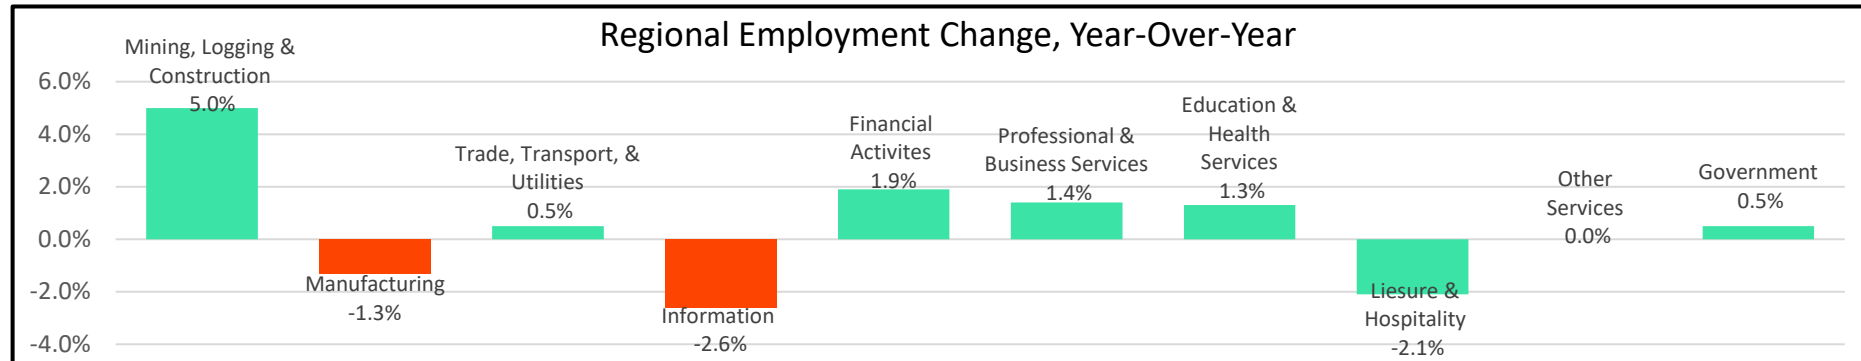

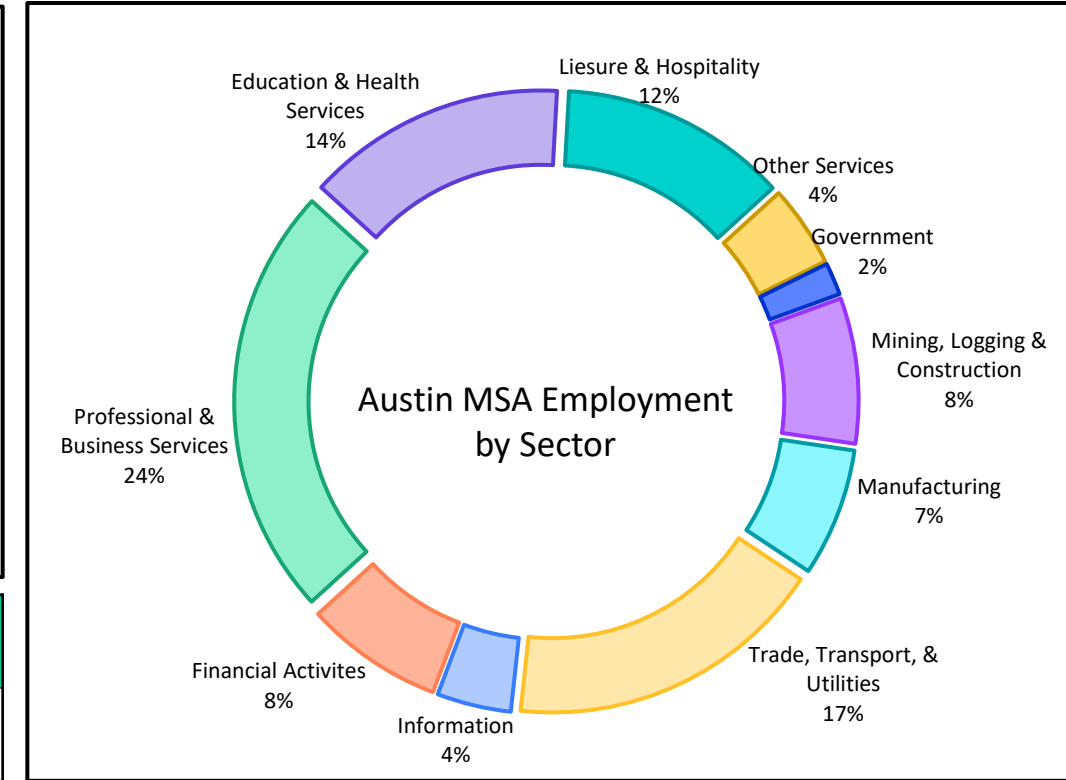

Federal Reserve Bank of Dallas, Feb/April, 2026

Source: US BLS; US BEA

- Unemployment levels in the region increased 0.2% to 0.3% from last year numbers
- 8,900 jobs have been added in the area over the past 12 months
- Largest employers in the area were related to Professional & Business Services as well as Government and Trade, Transportation, & Utilities sectors
- Sector with the greatest rate of increases in job numbers over the past year was in Mining, Logging, and Construction
- The largest rate of decline this past year was in the Information sector

All Industry Sectors	April 2025	April 2026	YOY Change
(Austin MSA) Total Nonfarm Employment #s	1,414,000	1,405,100	0.6%

Mobility

District Mobility Data/Statistics

Student Density Numbers (2025-26 School Year)

- There are 202 students that currently reside outside the district
- This represents approximately 2% of the total student population
- 7,257 students, or 65% of the total student population, reside within the Hutto city limits

What changed and why is Student Mobility a trend that may remain?

- ***Pandemic Event*** – The Covid-19 pandemic significantly disrupted student's education by forcing schools to close and shifting learning to remote or hybrid formats. That disruption not only took place in the world of education, but also initiated work from home which created opportunities for parents to begin evaluating their children staying home and learning while they were home.
- ***Technology*** – Greater use of technology devices and the development of more online instructional programming has created a new market for online curriculum and instruction. The growth of social networks, the programming of algorithms used by those social networks related to concentrated content & messaging, and the flexibility of being able to learn anytime & anywhere is a dramatic departure from the traditional instructional schedules and models.
- ***Geopolitical*** – The business of political campaigning has grown even more over the last several years. Political races have ongoing advertisements referencing political platforms at a higher frequency than what we have had in the past. The messaging of school choice, school safety, and concerns about the quality of education being provided are referenced in many of the political ads regardless of political affiliation.

Changes that have Increased Student Mobility

Student Mobility Report

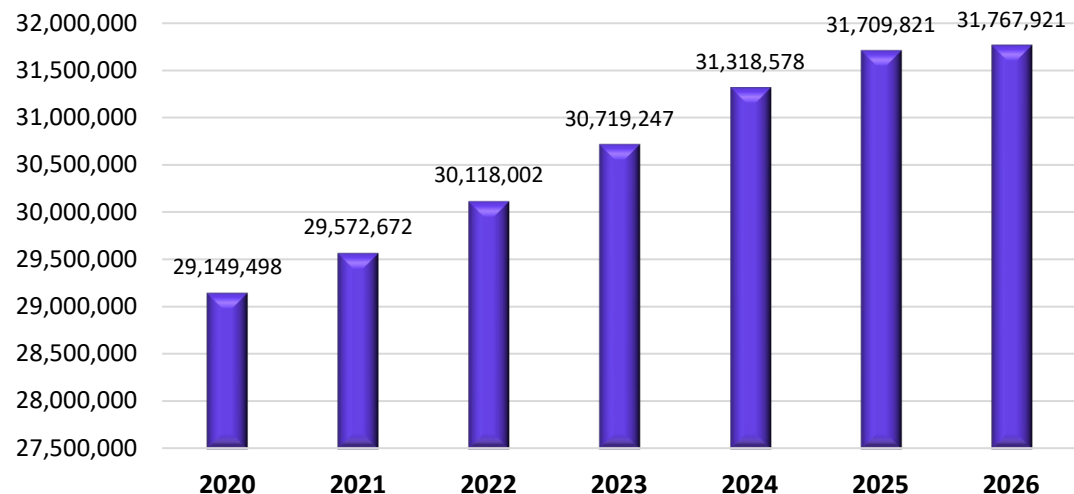

Texas Led U.S. in population growth in 2025, but immigration slowed

Texas' population growth slowed significantly last year amid a nationwide slowdown in the number of newcomers moving to the United States but still topped the rest of the country for adding new residents, new U.S. Census Bureau data show.

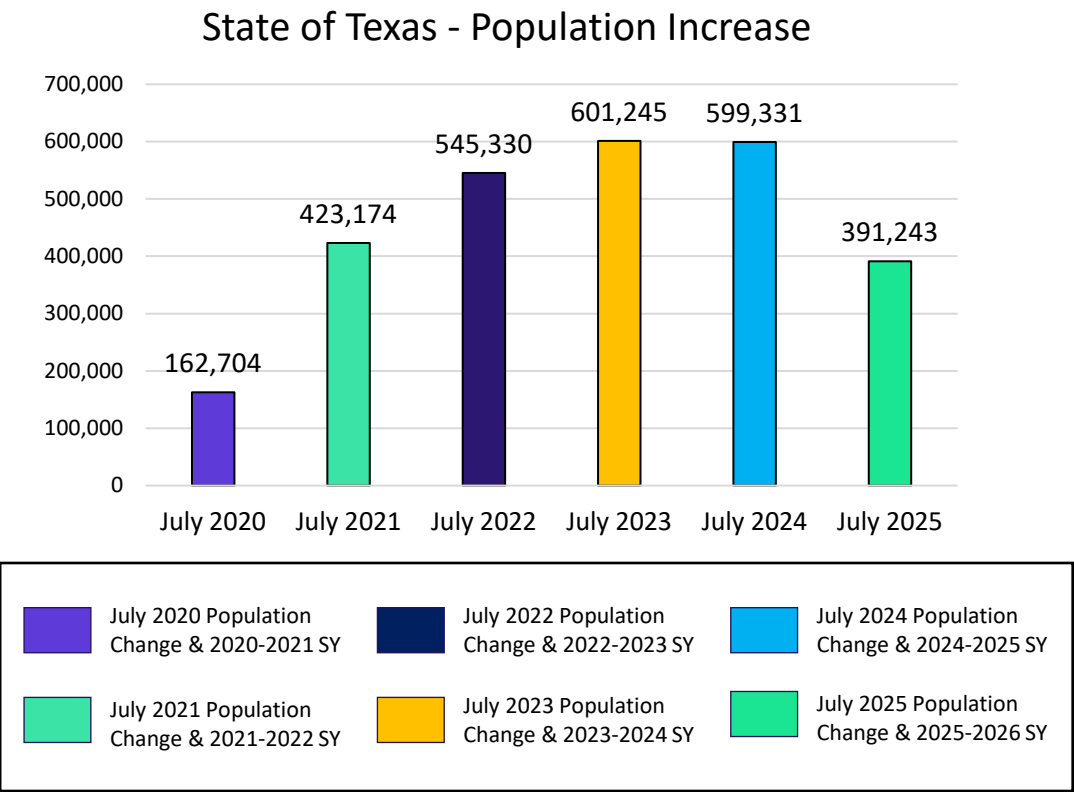

Texas added 391,243 residents in 2025, bringing the state's population to 31.7 million. but the Lone Star State grew by 1.2%, its slowest clip since 2021, after years of red-hot growth following the COVID-19 pandemic.

Texas Tribune Article – January 2026

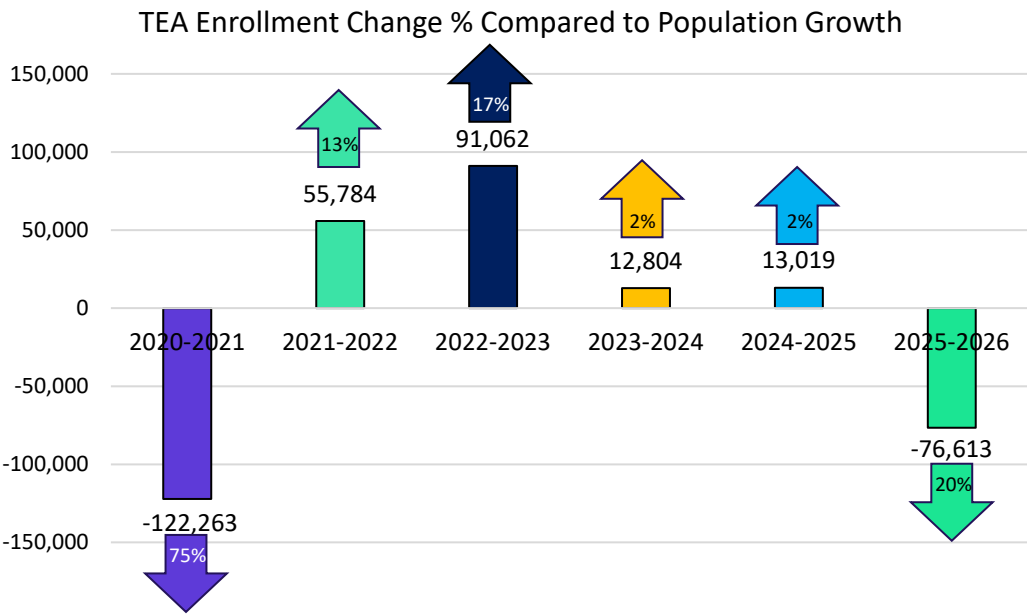

State of Texas Population Growth

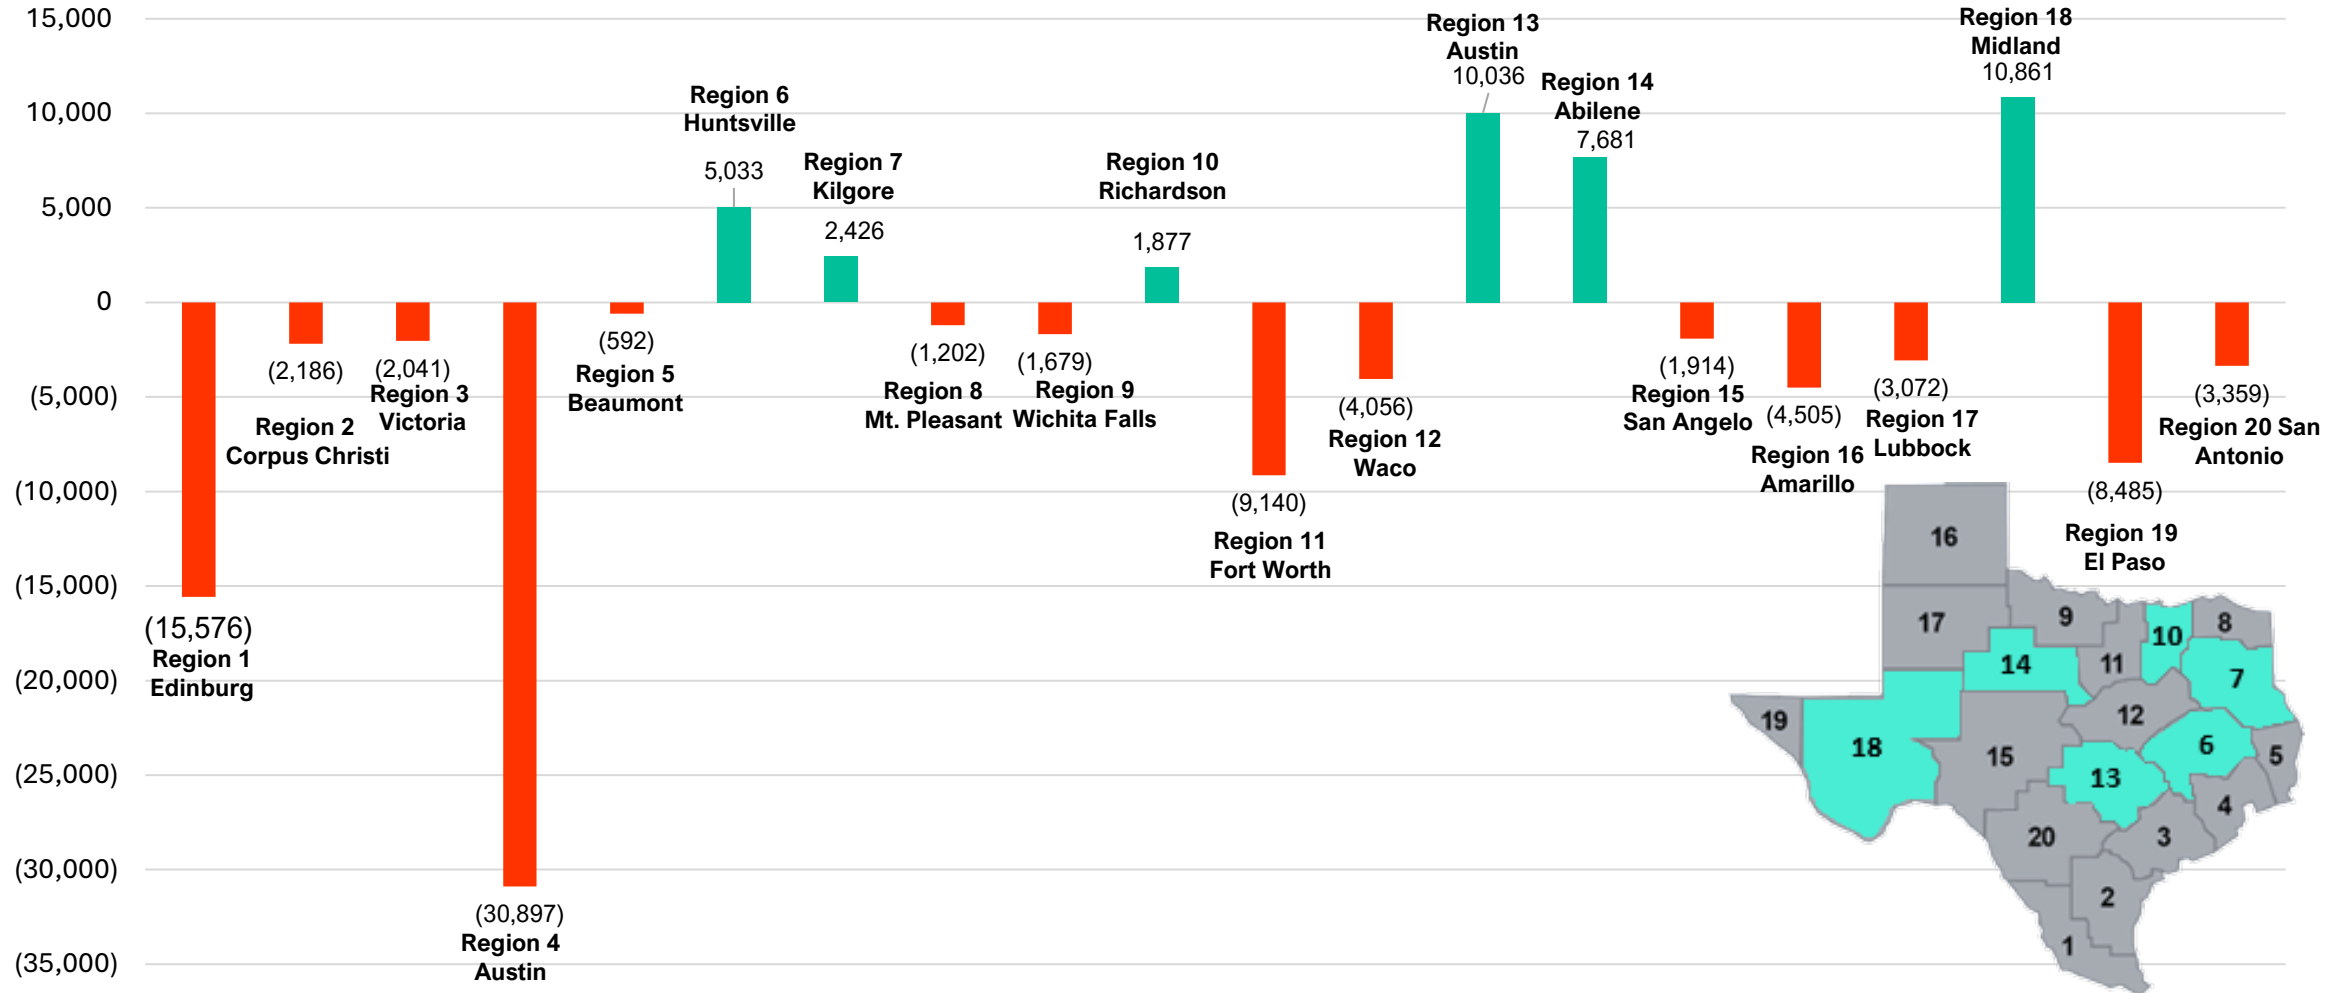

How did the population increase in the State of Texas impact the Public & Charter School Enrollment numbers the last 6 years?

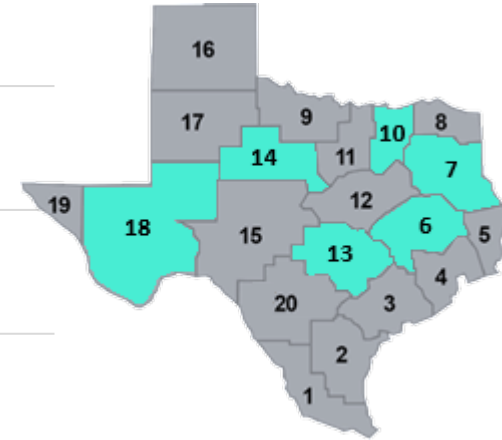

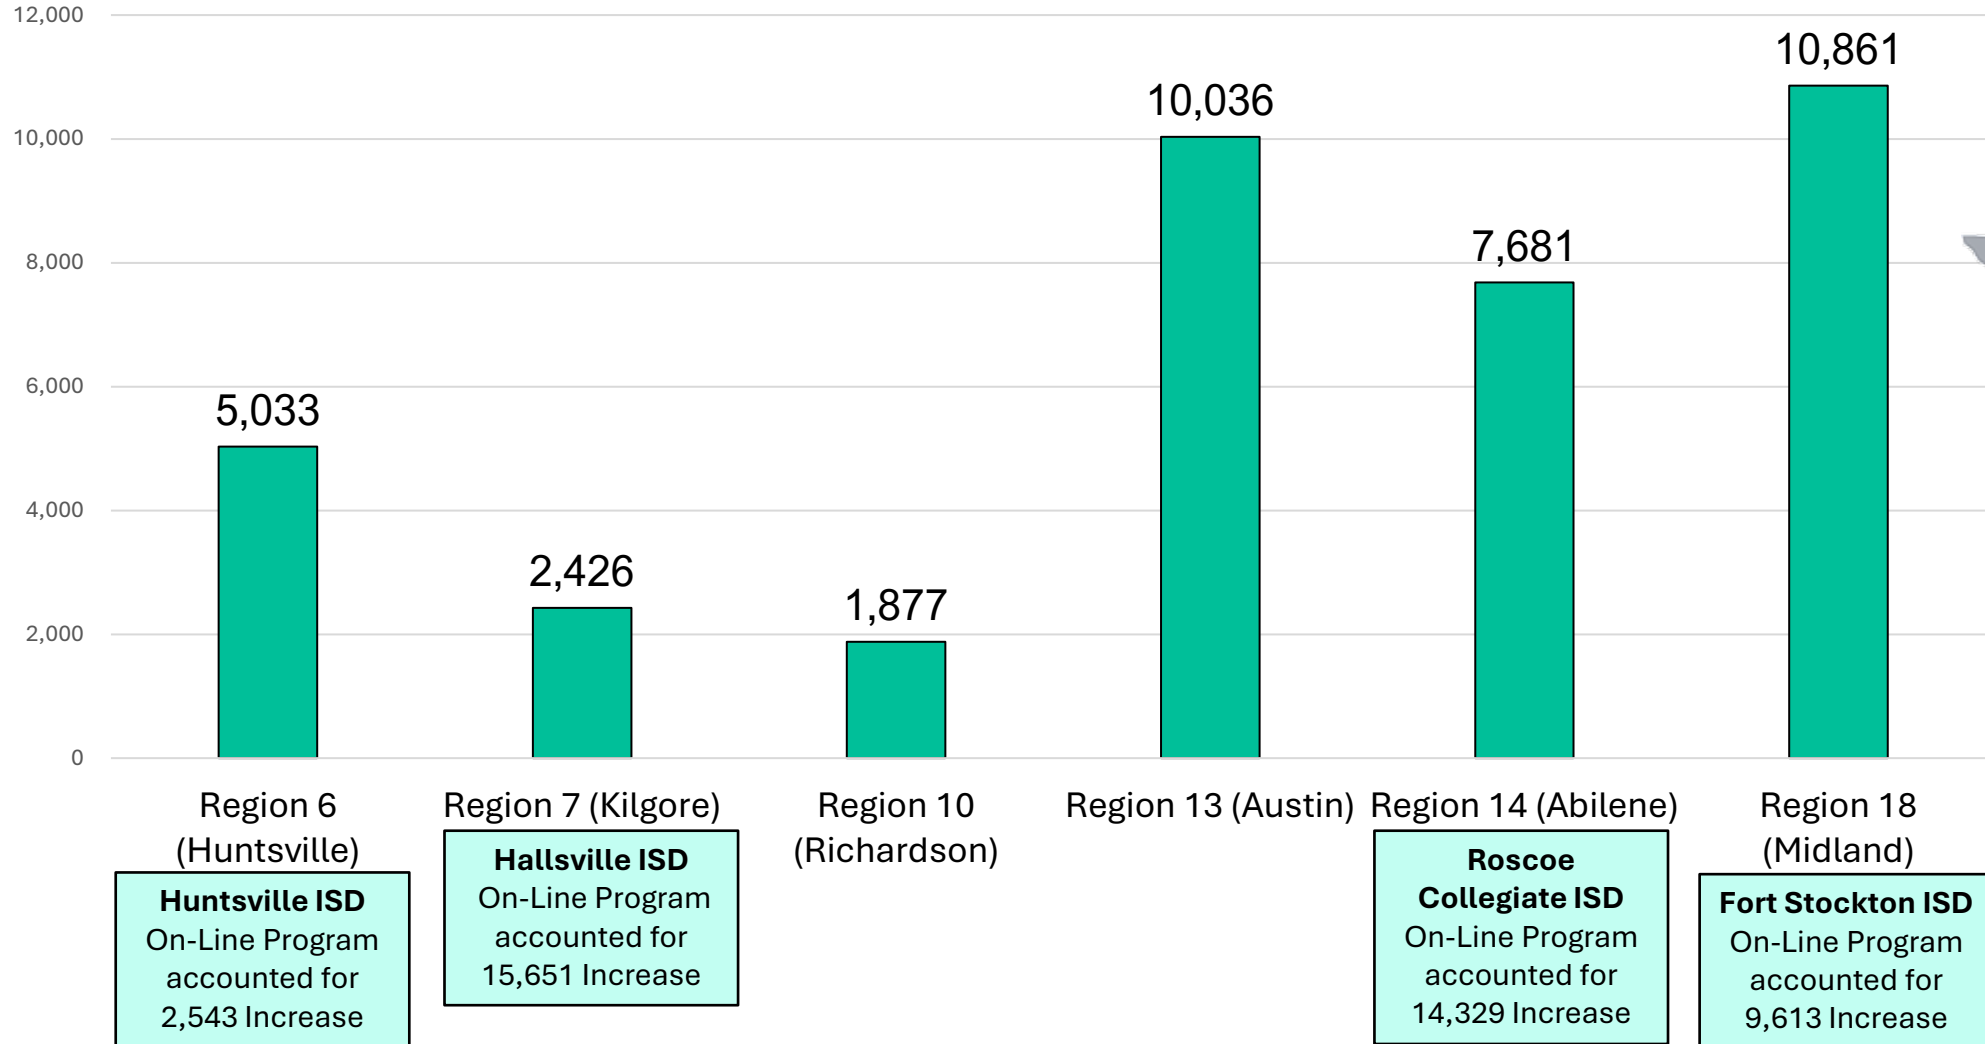

Census Year	Population Increase	School Year	Public & Charter School Enrollment Change
July 2020	162,704	2020-2021	-122,263
July 2021	423,174	2021-2022	55,784
July 2022	545,330	2022-2023	91,062
July 2023	601,245	2023-2024	12,804
July 2024	599,331	2024-2025	13,019
July 2025	391,243	2025-2026	-76,613

3 Year Change (2022-23 School Year to Current 2025-26 School Year)

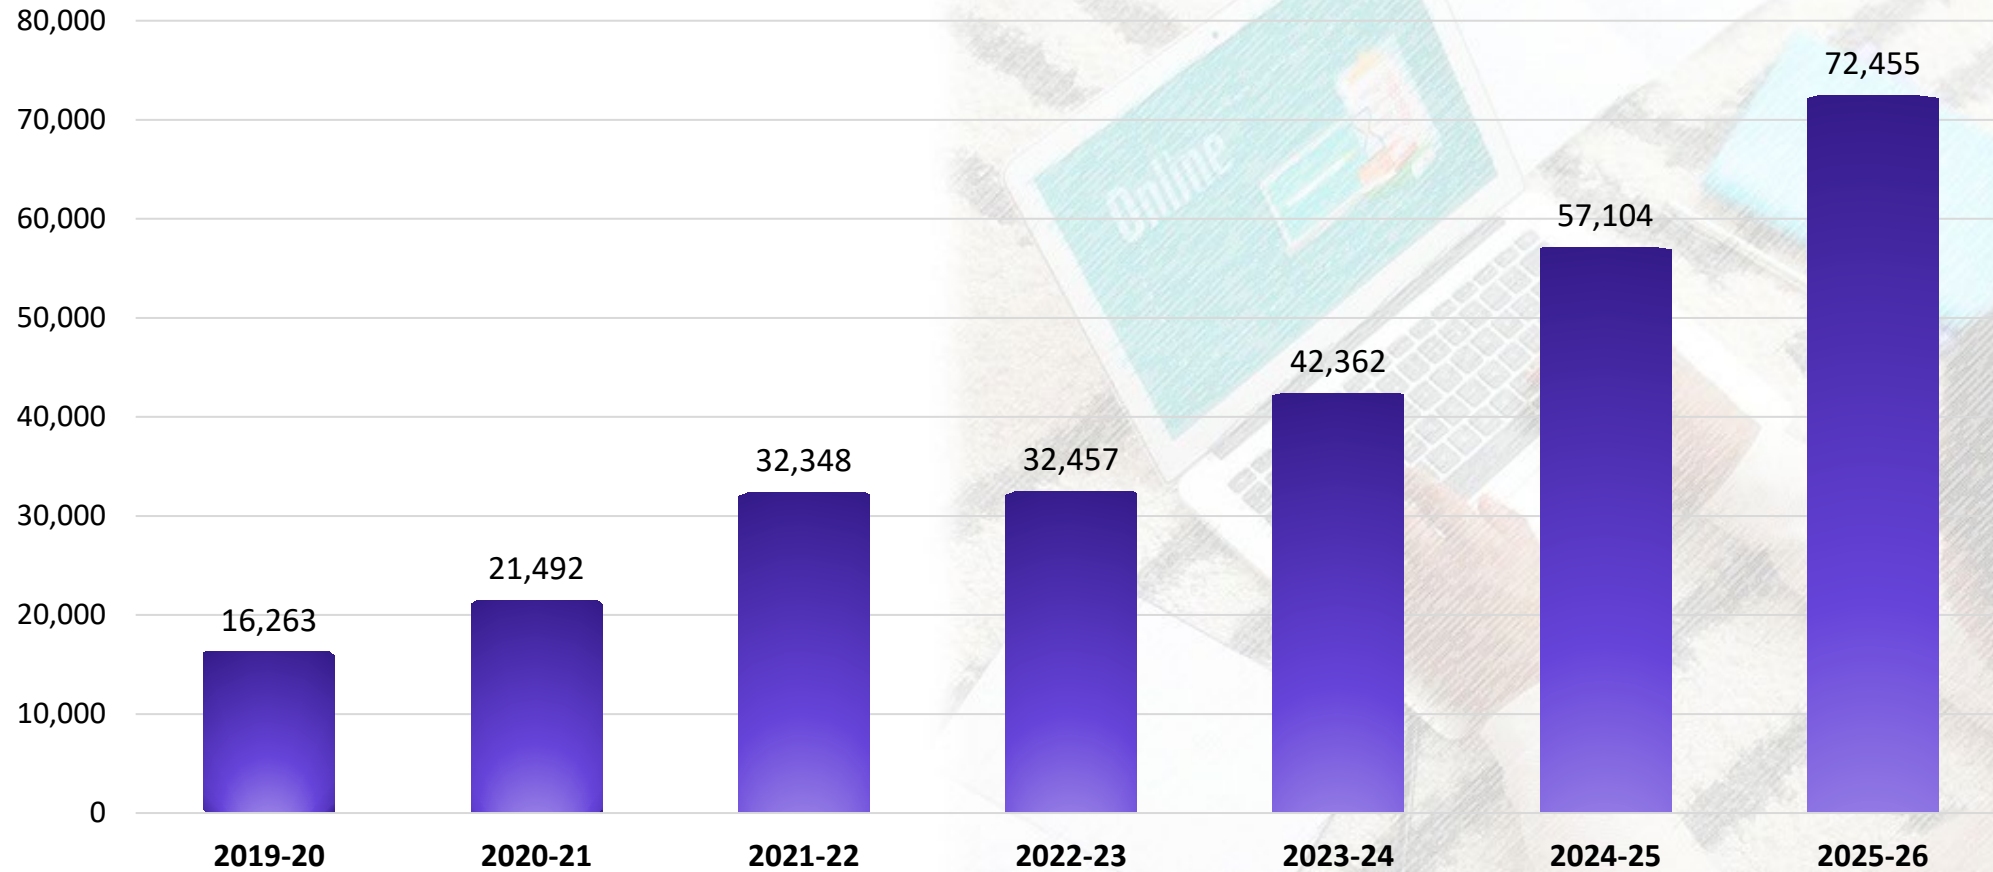

3 Year Change - Positive Enrollment Growth Regions

Growth in Region 10 & 13 is related to increases in regional job growth, new housing developments, migration into suburban communities and post-Covid enrollment stabilization.

State of Texas – Virtual/Online School Enrollment

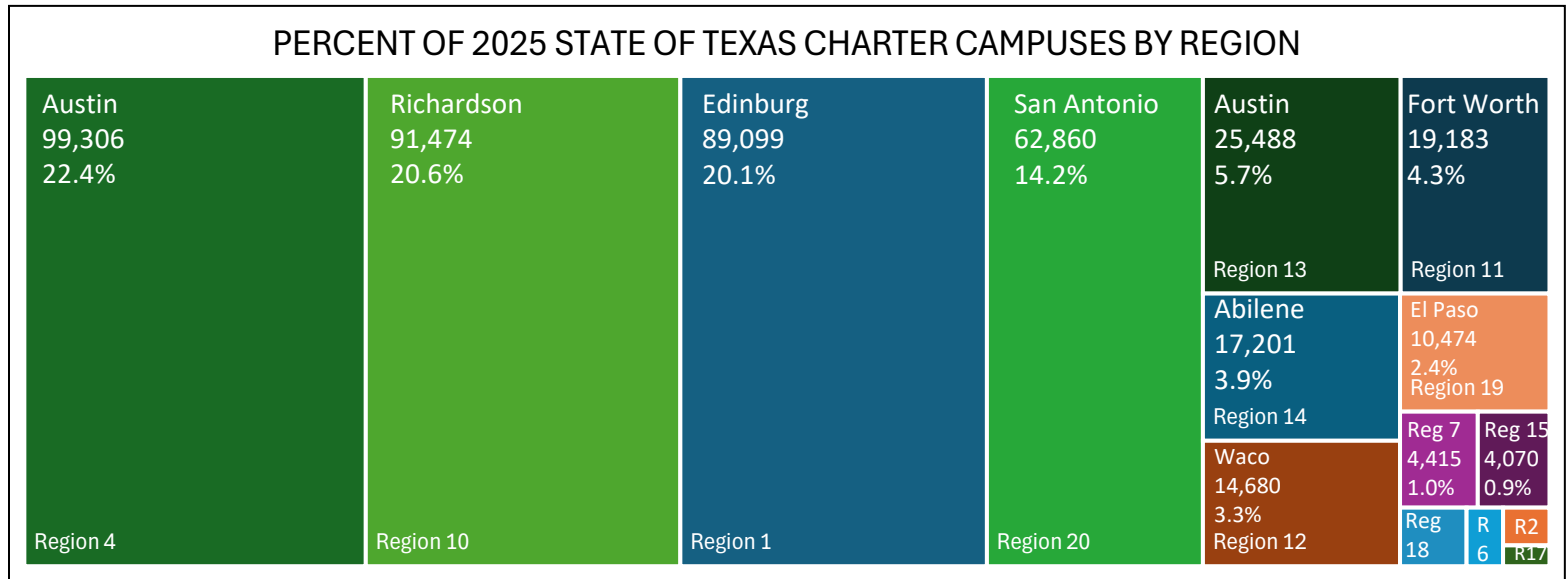

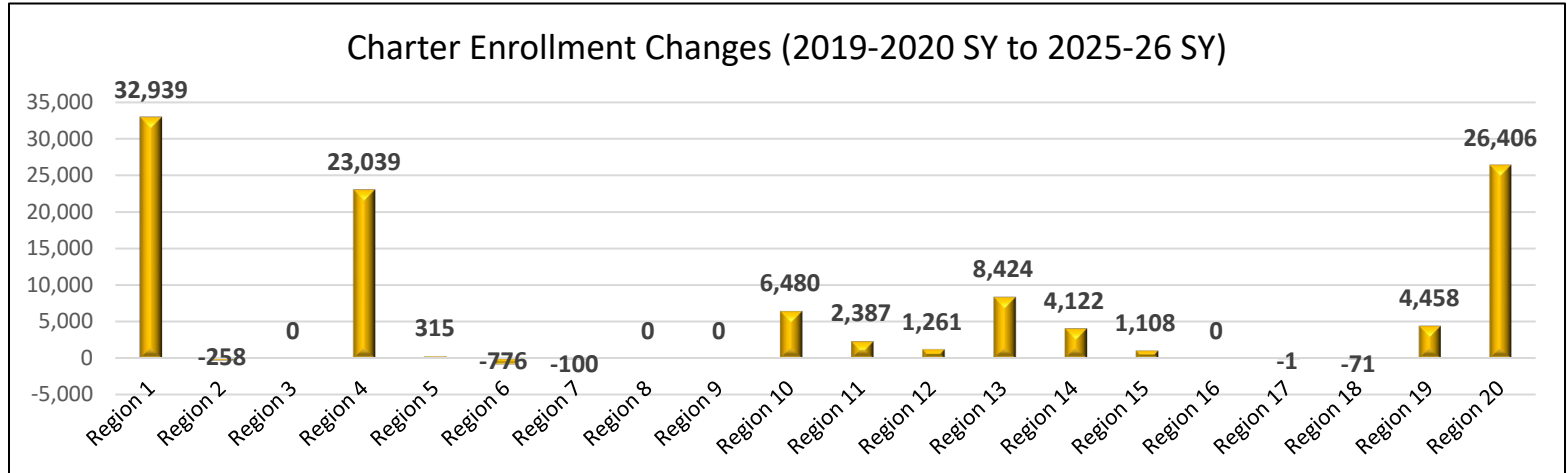

Enrollment has increased by over 56,000 students since the 2019-20 school year. An increase of over 345%.

Single-Family Housing

National Market Information & Area Sales Data

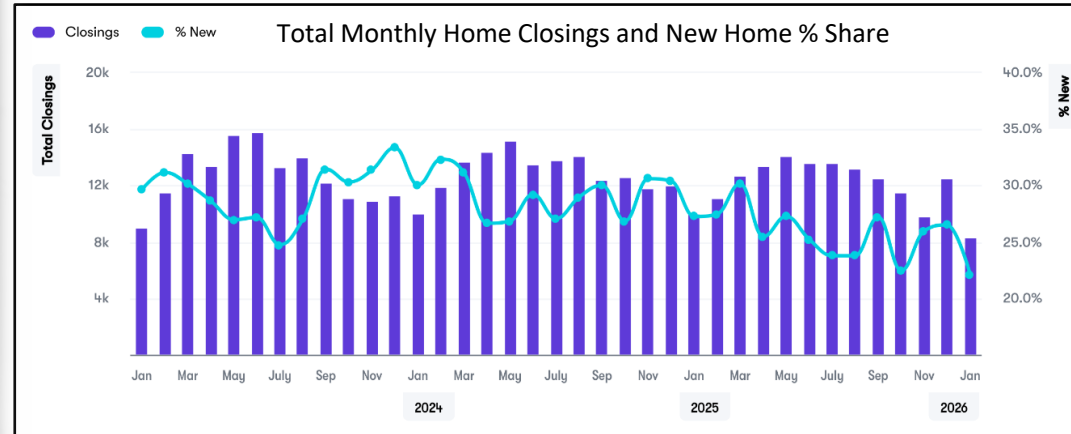

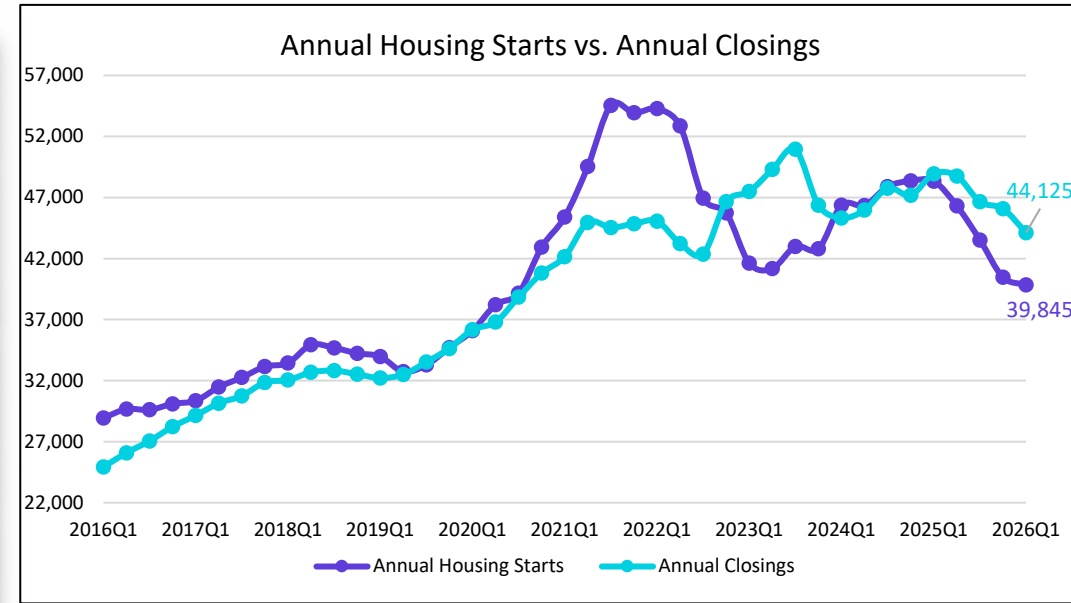

New home closings have declined in 2025 after increasing in 2024. Starts also declined after a significant upswing starting in 2023.

Among Zonda's top 50 major markets across the country, 26% were overperforming, 38% were average, and 36% were underperforming.

Single-family sales for new communities are averaging two homes per month. 60% of builders are offering mortgage rate buydowns, and yet 70% of builders report demand was slower than expected.

Monitoring Several Variables Impacting the Market Potential shifts in monetary policy, fiscal policy, international relations, investor sentiment, and consumer behavior are all being evaluated as to what impacts we may see in the coming months.

Dallas/Fort Worth maintains an average monthly sales rate of 1.9 net monthly sales per community among active projects.

Among Texas' four major markets, Austin MSA and San Antonio MSA are overperforming the DFW and Houston markets in terms of new home sales adjusted for supply and seasonality.

Dallas - Ft Worth - Arlington MSA experienced 44,125 new home closings in the last 12 months, a decrease of -9.8%.

New home sales have accounted for approximately 24% to 31% of total closings the past year.

Builder surveys report that affordability and consumer confidence are keeping consumers on the sidelines leading to tempering of new home activity.

The industry backdrop

Confidence: Conflicts with Iran, geopolitics, recession talks, stock market volatility, oil & gas, the Fed, mortgage rates, AI and the labor market are planting seeds of doubt

Labor market: Bouncing between positive and negative growth nationally

Mortgage rates: 6.4% with consensus of higher for longer

District Information -

Hutto ISD enrollment increased by **over 2,100 students in the last five years**. Including 408 additional students this year, 25-26.

Student Transfer Information -

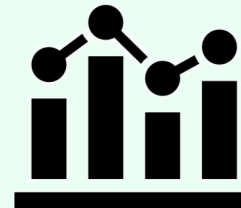

More students continue to move into the district than move out. Fall 2025 had a over 2,000 new students, while those not returning has remained fairly static.

Student Mobility & Choice -

64% of students that did not re-enroll this school year in Hutto ISD were due to the students moving outside the District's boundaries. 75% of the students that left the District enrolled in another Traditional Public ISD District. More students are choosing Charter schools over private or homeschooling.

Enrollment Forecast -

HISD Enrollment is forecasted to enroll approximately 13,200 students by the 2030-31 school year, and continue growing to over 15,000 as housing continues to increase.
