

A DEFINITION OF GENERATIVE AI

Generative AI (GenAI) **learns** from inputs, **recognizes** patterns in human writing and creation, and then **mimics** those patterns to create new content based on the user's prompt and its data set. It may **create** text, images, audio, video, and code.

PURPOSE

This document guides our students, staff, and school communities on the **appropriate and responsible use** of artificial intelligence (AI), particularly generative AI (GenAI) tools, in classroom instruction, school management, and systemwide operations.

Generative AI has potential **benefits for education** and **risks** that must be thoughtfully managed.
