

Residents 2020

Audio	Video
[Medical Student] LSU Shreveport. [Announcer] This could be you. Medical students who choose LSU Health Shreveport to continue their training, find what they're looking for: a great place to live and work.	Medical students announcing their placement during Match Day as the crowd looks on and cheers.
[Doctor Juneja] I think the thing that attracted me to LSU Health the most was how comprehensive a range of specialties there are that provide health care. I felt that you'd get a really good peripheral learning experience by working with other specialties.	Residents on rounds in hospital, Gastroenterologists performing an endoscopy, Cardiologists working in a cath lab Man with dark complexion and short dark hair, wearing black frame glasses and a white doctor's coat Text: Sanjay Juneja, M D Internal Medicine
[Doctor Thompson] To have a female leading your department was very motivating for me. She's involved in research, and she's just a very positive person. And that was something that was very attractive to this program.	Chief of E N T going over lab results with her team in a lab Fair complected woman with blonde hair pulled back in a ponytail wearing blue scrubs. Text: Trisha Thompson, M D Otolaryngology – Head and Neck Surgery
[Doctor Do] The program here at LSU Health Shreveport welcomes diversity, and we do get a lot of different people from all over the country, international students as well as students that go here to medical school. And they love the area so much that they tend to stay.	Group of Pediatric faculty and residents on rounds in hospital hallway, Pathologist and resident discussing a case, care team looking at a computer outside a patient's room, pediatric residents examining a patient in a hospital bed Woman with medium complexion and long dark hair wearing a white doctor's coat Text: Theresa Do, M D Pediatrics
[Doctor Awe] I definitely could tell that everybody liked each other. It wasn't a facade that they were giving	Surgeon putting on gloves in an operating room

off, but it was really a family, and I definitely feel part of the family now that I'm here.	Man with dark complexion and short cropped hair and beard, wearing a white doctor's coat Text: Adebayo Awe, M D Surgery
[Doctor Thompson] The patient population tends to present with more advanced disease, which in a training program is something that you really want because you like to see sort of the more advanced, the more complicated things. And that makes dealing with the kind of run of the mill every day a little bit easier.	Exterior of L S U Health Shreveport medical school, Eye doctor setting up an eye test on a patient, Doctor Thompson looking in a toddler's ear, resident examining the mouth of an elderly patient,
[Doctor Juneja] This is the, you know, one of the largest medical centers in the area. So people will drive 3 to 4 hours and you get this group of patients	Exterior drone moving the length of the hospital and medical school campus
that again, since medical school, in our case presentations, I realized, are things that you'd only see in a textbook.	Doctor Juneja on camera
[Doctor Awe] From a surgical standpoint we're the only level one trauma center in North Louisiana.	Ambulance driving into the emergency bay entrance, patient being unloaded from a helicopter
[Announcer] At LSU Health Shreveport, there are a number of training opportunities within minutes	Inside an O R for a robotic surgery
of the Ochsner LSU main campus. You can take care of veterans at the VA medical center, women and children at the new Saint Mary Medical Center, and experience private care through Willis Knighton. For rural care, you'll rotate through partner hospitals like Ochsner LSU in Monroe.	Exteriors of partner hospitals: Ochsner LSUHS, Overton Brooks V A Medical Center, Saint Mary clinic location, Willis Knighton Pierremont, and Monroe Medical Center
[Doctor Juneja] We can shadow the traditional style and be in the Willis Knighton hospital, as well as the VA hospital. If you like taking care of veterans and having that subset of populations of	Doctor Juneja on camera
older males. And of course, you know, veterans are some of the most fun people to serve.	Older patient and his wife talking with a physician in a clinic room
[Doctor Awe] You get to experience the private world and deal	Physician and parent next to a child laying on a bed having an allergy test
with the indigent population in a county hospital or, or state hospital	Doctor Awe on camera
and in even in the smaller setting, like in Monroe.	Pediatrician listening to a toddler's lungs as their parent holds them
[Doctor Do] There are international opportunities here.	Doctor Do on camera

Audio	Video
Once a year, the staff will take a number of medical students and also residents to Kenya, where we can help the people there with their medical illnesses.	Photo montage of group providing medical outreach in Kenya
If you're interested in research, it's easy to get involved and the staff is very welcoming to students or residents that are interested.	Researcher looking at a gel print out, Doctor Do on camera, researcher pipetting into a tray
[Doctor Awe] During the year, they break us up into smaller groups and we go down and get exposure in the simulation lab	Shots for the surgical skills lab as two groups in full PPE practice their skills
or the laparoscopic skills lab, and then you get a chance to practice with the laparoscopic instruments and some of the scopes and some of the things that you'll be doing as you progress throughout the program.	Residents practicing laparoscopy with box trainers and bronchoscopy simulators
[Doctor Thompson] So a lot of hands on training. We have the robot simulation as well.	Resident practicing at robotic console
[Doctor Juneja] Undeniably, the training you get here, at least in internal medicine, we can speak on. And of course, you know, from all the other specialties that that we've seen ourselves that you can get in the real world tomorrow, you know, before you even finish your third year and feel very comfortable with the things you'll see, or at least know how to handle it and know where and how to get help.	Doctor Juneja on camera
[Doctor Thompson] And we've really established a feeling of being a team and a family and taking care of each other.	Residents and faculty discussing care in clinic
[Doctor Awe] It's hard enough to try to learn how to do surgery, but to do it with people that you really, you know, like to be around and can work with is very helpful and conducive to the whole training process.	Doctor Awe on camera
[Announcer] From institution wide activities like paintball to individual department social events and retreats, LSU Health Shreveport takes resident and fellow well-being seriously, offering programs like adjusting to life as a new doctor and free counseling services when needed.	Residents presenting case to faculty on rounds in hospital
[Announcer] From institution wide activities like paintball to individual department social events and retreats, LSU Health Shreveport takes resident and fellow well-being seriously, offering programs like adjusting to life as a new doctor and free counseling services when needed.	Montage of group posing for a photo at a paintball outing, resident group smiling at a picnic table, group participating in Zumba, large group running across paintball field,
[Doctor Thompson] We spend a lot of time together at work. We spend a lot of time together outside of work as well.	residents playing basketball

Audio	Video
[Doctor Do] But when we do just want to, you know, relax our minds, there are a lot of places to go to in Shreveport.	Zen garden
We love the casinos. That's a big thing down here.	Exterior of flashing lights at a different casinos
[Doctor Thompson] But I love the festivals, the Crawfish Festival, the music festivals, the art festivals, the Highland Jazz and Blues Festival. All of that is so much fun and there's so much culture that you get to experience.	Montage of different festivals with food, music, art tents, and museums
[Doctor Awe] It's not Las Vegas, but at the same time you can, you know, go out and have a good time, get a great bite to eat.	Band playing on stage at a casino as people dance
[Doctor Juneja] In the areas that we live around here, all my residents, friends from different specialties and in mine are all we're all next door,	Doctor Juneja on camera
you know, in South Highlands, and you come over and have game night and and you walk your dogs together. That that's huge. It's just fun.	Woman walking down the sidewalk pushing a toddler in a stroller, lady walking a dog in a park
[Doctor Thompson] There's a lot of variety, meaning you can buy, you can rent, but it's a very, very affordable cost of living in Shreveport.	Driving through a neighborhood passing different sized houses
[Announcer] Shreveport-Bossier is a well-kept secret. When people visit for the first time, they leave favorably impressed. We have no traffic, and it's easy to get around. You can live in the country and still be close enough to drive to work with minimal commute. We have plenty of lakes and recreation activities. The school system is great, and all the amenities you have in a big city are here, but with a small city atmosphere.	Montage of scenes from around Shreveport - Fountain with skyline in background, Festival plaza full of people, downtown Shreveport with light traffic, person riding a bicycle on the bike path near downtown, boat speeding down the Red River, children at Sci-Port, Shopping center, City Hall
[Doctor Thompson] It's been a great experience for me. I would recommend LSU Shreveport to my closest friends. And I would say that it's, it's definitely a program that will support you and train you very well.	Doctor Thompson on camera
