Page Last Modified: 12/12/2025

II. Strategic Technology Planning**1. What is the overall district mission?**

We collaboratively prepare every student for their successful future.

2. What is the vision statement that guides instructional technology use in the district?

The mission of Dansville Central School District Technology Plan is to support sustaining and improving collaborative learning environments for all, in which our students can achieve their full potential and contribute to our evolving local and global communities. The goal is for students to transition from consumers of information to creative producers and owners of knowledge. Specifically we aspire for our students to be:

- Leverage the power of effective instructional technology so students achieve NYS Learning Standards
- Immersed in instruction that actively engages them, sparks creativity and transforms their learning
- Critical thinkers who seek information and critically analyze and evaluate
- Problem solvers and decision makers who can persevere
- Creative and effective users of productivity tools
- Communicators, collaborators, publishers and producers
- Able to equitably access technology and learning at all times

3. At the start of the 2026-27 school year, will the district provide a dedicated mobile device for every student in all grades?

Yes

For help with completing the plan, please visit ITP Resources on our website, contact your district's RIC, or email edtech@nysed.gov.

Instructional Technology Plan - 2026-2029 Instructional Technology Plan

V. NYSED Initiatives Alignment

Page Last Modified: 12/22/2025

V. NYSED Initiatives Alignment

1. How will the district's use of instructional technology support a comprehensive and sustained effort to improve student performance and academic standards, while also addressing the need to provide equitable learning opportunities "everywhere, all the time" (National Technology Plan)?

Instructional technology has been an integral part of the district since we instituted a 1:1 program in 2014-15. Over the years we have sponsored intensive instructional technology training and have even trained other districts in developing and maintaining 1:1 programs. Maintaining and replacing devices and providing reliable, high speed internet are essential, but technology is useful in the educational setting only if it is leveraged to improve teaching and learning. The majority of staff and students were fairly proficient in leveraging technology to enhance teaching and learning as measured by annual comprehensive technology surveys. The remote and hybrid instruction imposed by COVID 19 helped us identify areas in which we could improve. As we moved further from the pandemic, staff continued to learn from each other on how to be more effective with instructional technology that supports improved learning. The pandemic also showed us that students are not always adept at technology tools to enhance learning. This plan calls for developing and enhancing our technology skills curriculum as well as digital citizenship and STEAM. Ensuring students can leverage technology to enhance their learning and ultimately harness it to demonstrate their understanding of skills and concepts in meeting NYS Learning Standards. All students have access to technology and with this plan we seek to enable them to use it more effectively. Equitable access includes harnessing technology to provide multiple pathways to participation in the general education curriculum for special education and English Language Learners along with the general education students. Technology is used across the district to provide multiple pathways to access and participate in learning. Access to learning is ensured in that all students have a device of their own and video conferencing (Google Meet) for access in shut down or when absent. Participation in learning in multiple ways begins with technology available to all. All Classrooms use Google Classroom or ParentSquare. Both provide platforms for communication between students, families and school, as well as assigning learning and turning in learning. Both platforms provide means for teachers to deliver learning and for students to provide evidence of learning in multiple ways. All students have access to Google G-Suite apps that allow collaboration anywhere/anytime access and each has assistive features. Specialized and individualized Assistive technology is available to ensure that students with disabilities can access and participate in learning. Such assistive technology includes speech to text software such as ReadWrite and Kami, audio books such as Raz-Kids and Epic, hearing and visual support such as audio systems, oral presentation software and apps such as Flip Grid and Screencastify, lesson recording devices, and any other supports students, families and teachers require. In day-to-day instruction technology is used so students can participate in learning in multiple ways. Google Classroom and the plethora of software and apps provide multiple ways for teachers to present learning and for students to show evidence of learning whether oral, written or other.

2. **At the start of the 2026-27 school year, will the district offer full-time virtual instruction to any students? (Select all that apply)**

- ☐ Yes. Our district operates a full-time virtual instruction program.
- ☐ Yes. One or more of our students will attend a program operated by a BOCES or another public school district.
- ☒ None of our students will participate in a full-time virtual instruction program.
- ☐ Other

3. If the district files or has filed a Smart Schools Investment Plan (SSIP) to apply for Smart Schools Bond Act funds, all responses in this survey align with the district's response to any related question(s) in the SSIP.

Yes
