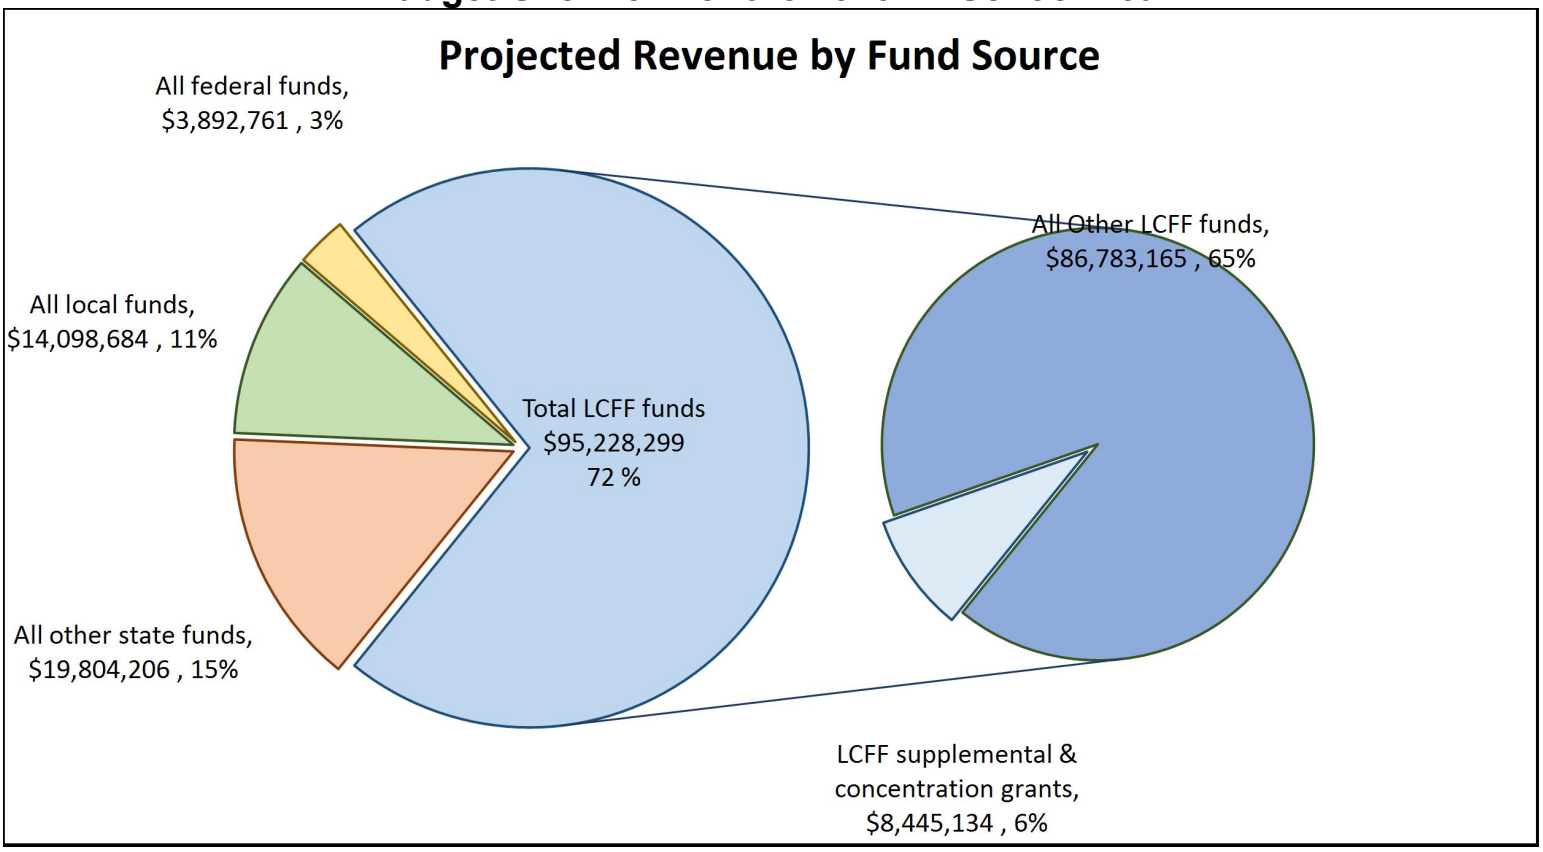
NOVATO UNIFIED SCHOOL DISTRICT

LCFF Budget Overview for Parents

Local Educational Agency (LEA) Name: Novato Unified School District
CDS Code: 21654170000000
School Year: 2026-27
LEA contact information:
Dr. Julie Synyard
Executive Director of Education Services
jsynyard@nusd.org
415-493-4227

School districts receive funding from different sources: state funds under the Local Control Funding Formula (LCFF), other state funds, local funds, and federal funds. LCFF funds include a base level of funding for all LEAs and extra funding - called "supplemental and concentration" grants - to LEAs based on the enrollment of high needs students (foster youth, English learners, and low-income students).

Budget Overview for the 2026-27 School Year

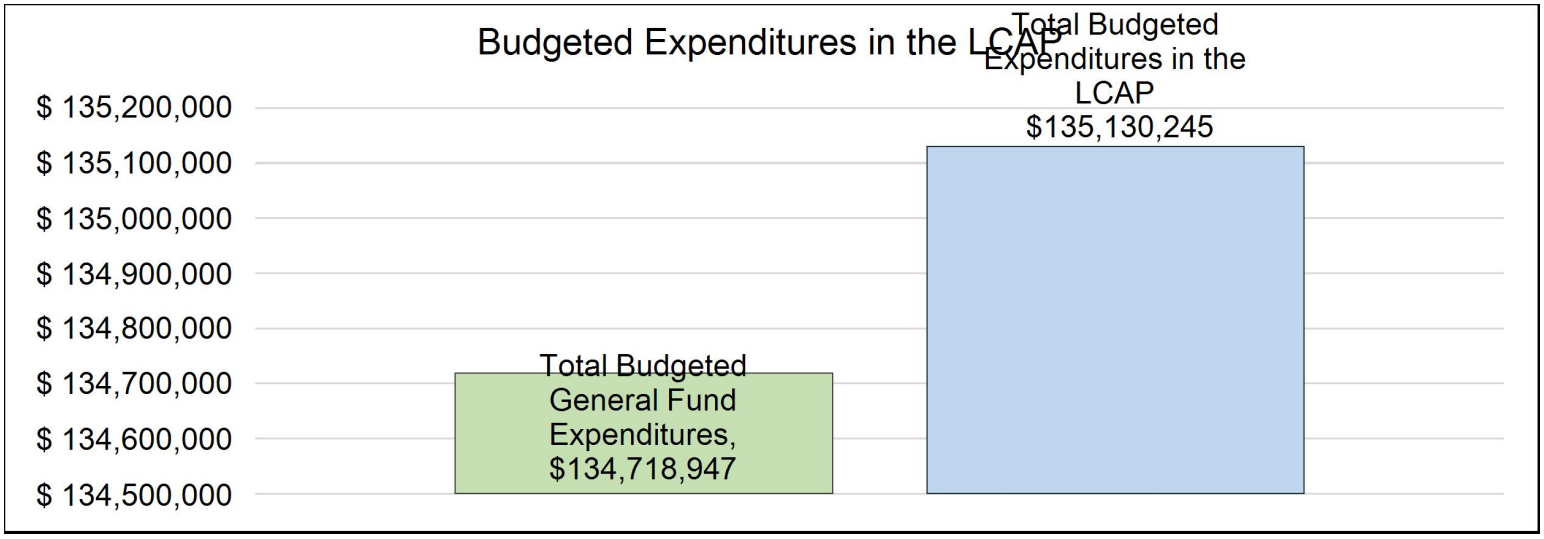


This chart shows the total general purpose revenue Novato Unified School District expects to receive in the coming year from all sources.

The text description for the above chart is as follows: The total revenue projected for Novato Unified School District is $133,023,950, of which $95,228,299 is Local Control Funding Formula (LCFF), $19,804,206 is other state funds, $14,098,684 is local funds, and $3,892,761 is federal funds. Of the $95,228,299 in LCFF Funds, $8,445,134 is generated based on the enrollment of high needs students (foster youth, English learner, and low-income students).

LCFF Budget Overview for Parents

The LCFF gives school districts more flexibility in deciding how to use state funds. In exchange, school districts must work with parents, educators, students, and the community to develop a Local Control and Accountability Plan (LCAP) that shows how they will use these funds to serve students.



This chart provides a quick summary of how much Novato Unified School District plans to spend for 2026-27. It shows how much of the total is tied to planned actions and services in the LCAP.

The text description of the above chart is as follows: Novato Unified School District plans to spend $134,718,947 for the 2026-27 school year. Of that amount, $135,130,245 is tied to actions/services in the LCAP and $-411,298 is not included in the LCAP. The budgeted expenditures that are not included in the LCAP will be used for the following:

Certificated and Classified employee salary benefits, supplies, services, and other operating expenditures not directly funded out of District supplemental funding. These federal funding dollars are not included in the LCAP and the services provided by the federal dollars are detailed in the LCAP Federal Addendum.

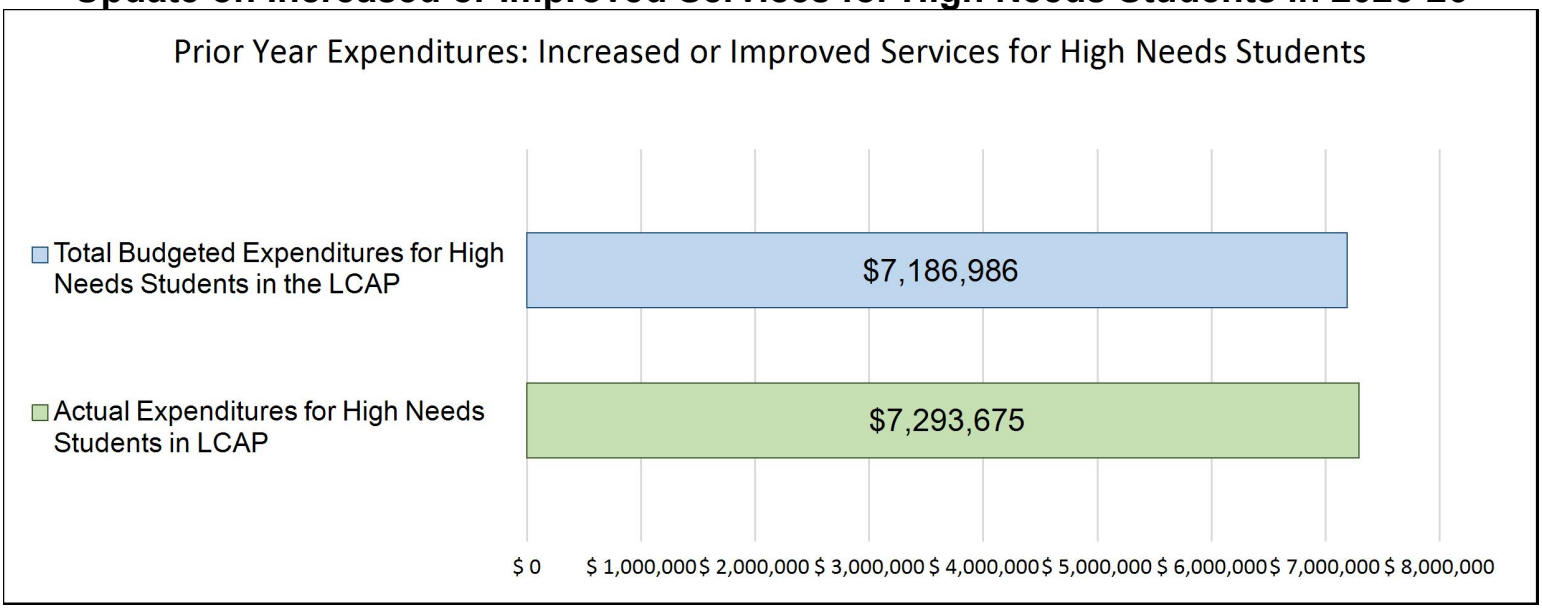
Increased or Improved Services for High Needs Students in the LCAP for the 2026-27 School Year

In 2026-27, Novato Unified School District is projecting it will receive $8,445,134 based on the enrollment of foster youth, English learner, and low-income students. Novato Unified School District must describe how it intends to increase or improve services for high needs students in the LCAP. Novato Unified School District plans to spend $8,003,711 towards meeting this requirement, as described in the LCAP.

The District anticipates the expiration of several grants for wellness and potential increases in salary expenses which will depend upon new hirings. These cost increases will likely close the gap between what is projected revenue and current budgeted expenditures by the end of the school year.

LCFF Budget Overview for Parents

Update on Increased or Improved Services for High Needs Students in 2025-26



This chart compares what Novato Unified School District budgeted last year in the LCAP for actions and services that contribute to increasing or improving services for high needs students with what Novato Unified School District estimates it has spent on actions and services that contribute to increasing or improving services for high needs students in the current year.

The text description of the above chart is as follows: In 2025-26, Novato Unified School District's LCAP budgeted $7,186,986 for planned actions to increase or improve services for high needs students. Novato Unified School District actually spent $7,293,675 for actions to increase or improve services for high needs students in 2025-26.

NOVATO UNIFIED SCHOOL DISTRICT

Local Control and Accountability Plan

The instructions for completing the Local Control and Accountability Plan (LCAP) follow the template.

Plan Summary [2026-27]

General Information

A description of the LEA, its schools, and its students in grades transitional kindergarten–12, as applicable to the LEA. LEAs may also provide information about their strategic plan, vision, etc.

The Novato Unified School District serves a diverse community of approximately 7,137 students at thirteen schools. NUSD includes seven elementary schools, one K-8 school, two comprehensive middle schools, two comprehensive high schools, a continuation high school, an alternative education program, an early intervention program, and an Adult Education program. The District also supports an independent charter school, Novato Charter. The student body consists of 2.1%/148 African American students, 0.2%/16 American Indian or Alaskan Native students, 3.8%/272 Asian students, .7%/47 Filipino students, 44.7%/3188 Hispanic/Latino students, 8.6%/564 Two or More Races students, 0.1%/72 Other students, and 38.8%/2771 White students. The District currently serves students with 49 different home languages. Approximately 40%/2857 NUSD students are categorized as socio-economically disadvantaged, 7%/511 students are housing insecure, 0.4%/26 are foster youth, 12.9%/923 students receive special education supports, and 15.9%/1133 students are English Language Learners. The District's unduplicated percentage of students is 40.74%.

The NUSD mission is: To engage, inspire and empower all students, in a rapidly changing world, to realize their life goals.

The NUSD vision is: To provide an innovative and personalized learning experience for every student in a caring and supportive environment to develop the knowledge and skills necessary to be successful and productive citizens. NUSD will engage parents, teachers, and our community to actively support our students' growth and learning.

In order to fulfill that mission and actualize the vision, NUSD has developed a comprehensive strategic plan that will focus on three primary goals. As a way to build cohesion across the school district and identify intentional action steps, the leadership team came together to

prioritize the goals and objectives in existence within each school, department, and specialized program taking into account the feedback from educational partners. The team identified three universal goals:

- Academic achievement
- Social-emotional well-being and mental health
- Family engagement, belonging, and inclusion

The District, in collaboration with its educational partners, will address these goals through a variety of responses. Responses will include targeted and differentiated professional development to develop staff capacity, strengthening community partnerships, and elevating student voice to improve school connectedness and empower students to take ownership of their learning.

One of the avenues utilized to raise student, community, and staff feedback was the establishment of the District Equity Imperative Committee. This committee was comprised of high school students, community members, teachers, classified staff, and both site and district administration. The committee reviewed student data focusing on academic outcomes and the social-emotional well-being of our student subgroups. Through a series of meetings, this committee helped refine and prioritize areas of need. The committee conducted a root cause analysis and developed an action plan to support school site plans, the Local Control Accountability Plan, and the Education Services Action Plan. The committee determined that within our three areas of focus (academic achievement, social-emotional well-being/mental health, and engagement/belonging/inclusion) the following actions will guide the work of NUSD:

- Increase graduation rates for English Learners, unaccompanied minors, and students with special education needs
- Increase parent/guardian and teacher understanding of Proficiency Based Education and Standards Based Grading Practices
- Create a robust data infrastructure in which data can be used to adjust instructional practices so that staff can focus upon students who are struggling with a hyper focus on English Learners and students with special education needs
- Intentionally build adult connections with all students, especially English Learners and students with special education needs
- Increase student use/access of tutoring and learning supports currently offered
- Develop a process for classroom learning walks for teachers in order to identify strong Tier I instructional strategies

As a result of these determinations, the Education Services Department identified 6 priority areas for professional development and support. With the strategic alignment our resources and initiatives, NUSD aims to create a more inclusive, supportive, and effective learning environment for all. The 6 priority areas include:

- Proficiency Based Education (PBE)
- Multi-Tiered Systems of Support (MTSS)
- Math Instruction and Support
- Early Literacy Instruction
- English Learner/Newcomer Instruction and Support
- AI Understanding and Creation of Student and Staff Guidelines

To effectively address these priority areas, the District offers a variety of programs and initiatives designed to meet the diverse needs of its students. These programs provide targeted academic support, foster social-emotional development, and promote student engagement across multiple grade levels and learning contexts. NUSD continues to be proud of its high quality and innovative schools and programs.

While each school offers a robust variety of programs and pathways to offer students a wide array of choices, several specialized programs draw significant participation and student success. These include:

- Lynwood Dual Language Immersion Program: The Dual Language Immersion program offers an excellent educational experience in an environment that cultivates foundational skills for bilingualism (Spanish-English), as well as bi-literacy and multiculturalism. The students start with a 90% Spanish and 10% English mix of instruction across the subject areas in TK/Kinder, and incrementally achieve a 50/50 balance of instruction in Spanish and English by the time they leave 5th grade.

- Dual Immersion Program Expansion at San Jose Middle School: Students will be eligible to continue with dual language immersion in middle school at San Jose. The expansion plan details that DLI students will take a Spanish language arts course in Spanish throughout their middle school career. Hiring qualified middle school teachers that possess the necessary credentials for instruction is difficult, however, the district is committed to offering Spanish Language Arts for DLI students to support Spanish language development and proficiency. Throughout the 2024-2027 LCAP, staff will collaborate with Dual Language Immersion families to develop a robust pathway for students to become bilingual and biliterate thus earning the California State Seal of Biliteracy upon completing the 12th grade.

- Marin School of the Arts (MSA): This specialized learning community within Novato High School offers talented and motivated students the opportunity for professional arts instruction and practice while fulfilling all requirements in math, science, language arts, physical education and other elective programs at Novato High School. The wide range of pathways in MSA include cinematic arts, dance, music, theater arts, visual arts, video design, music production, and creative writing.

- Next Gen STEM: Novato High School will be offering its incoming 9th graders a new pathway to support students interested in pursuing a career in the STEM field. Next Gen STEM will provide interested students with a specialized, honors-level academic pathway that offers a highly individualized and hands-on learning experience. Launched for the 2026-2027 school year, it emphasizes "learning by doing" through real-world, project-based curriculum. With the implementation of this pathway, students can participate in up to three different specialized programs simultaneously, including the Marin School of the Arts and Medical Careers Pathways.

- STEAM Marin: The STEAM program is a small learning community on the San Marin High School campus that provides students with a dynamic and integrated learning experience that prepares them for both postsecondary education and high-demand careers. Through hands-on projects, interdisciplinary coursework, and real-world applications, students develop critical thinking, problem-solving, collaboration, and technical skills essential for success in today’s innovation-driven economy. The pathway includes opportunities for dual enrollment, industry-recognized certifications, internships, and mentorships with local professionals, ensuring students graduate with both the academic foundation and practical experience needed to thrive in college or directly enter STEAM-related fields. This program offers two pathways; Engineering and Biotechnology. Since its introduction in 2013, the STEM program continues to grow and serve a broader population of students.

- Career Technical Education (CTE): Each of Novato’s high schools offer CTE pathways. NUSD’s CTE program has grown from having a handful of isolated CTE course offerings to eleven complete career pathways in seven industry sectors. Each pathway offers an introductory, concentrator and completer course and every course is UC/CSU approved to meet A-G requirements. Additionally, three pathways are articulated with the community college. These pathways include:

- Biotechnology (San Marin High School)
- Cisco Academy (San Marin High School)
- Culinary Academy (Marin Oaks High School)
- Digital Arts and Design (Novato High School)
- Digital Arts and Photography (Novato High School)
- Medical Careers Pathway (Novato High School)
- Multimedia (San Marin and Novato High School)
- Product Design (Novato High School)
- Technical Theater (San Marin High School)
- Engineering (San Marin High School)
- Sports Medicine (San Marin High School)

- Hill Education Center (HEC): NUSD offers several alternative education options for students at the Hill Education Center. These options include:

- Marin Oaks High School: A continuation high school serving Novato students who have struggled to find success in the traditional high school setting. In addition to the supportive and asset based general education programming at Marin Oaks, the program offers the Culinary CTE pathway and the Bridges Program which offers students college and career experience while finishing high school. Marin Oaks has been recognized twice as a Model Continuation School in California. Marin Oaks High School is an Equity Multiplier School, and engagement with educational partners included administrator, staff, and students to help guide the actions established to better serve and improve academic outcomes of the students of Marin Oaks.

- NOVA Independent Study: This program offers students a flexible, virtual self paced educational model. Through regular meetings with their highly qualified teaching staff, each student participates in a personalized program and co-enrollment opportunities with the NUSD comprehensive high schools. This program serves students from sixth through 12th grade with daily live instruction, virtual learning and enrichment opportunities, and high quality curriculum. It has become evident that a virtual only learning environment is a viable option for many NUSD students

- Novato’s Adult Education Program: NUSD offers high school diploma/GED and English as a Second Language classes during the day and evening on the Hill Campus.

- California State Preschool Program: NUSD subcontracts with the North Bay Children's Center which operates programs for preschool age children within the Novato community.

- Expanded Learning Opportunity Program (ELOP) TK-6: The District offers an Expanded Learning Opportunity Program to all unduplicated students in grades TK-6. The program extends the school day to 9 hours, with an additional 30 days throughout the school year. The District has partnered with the YMCA, Aim High, RISE, district staff, and other community partners to provide an academic and enrichment program to unduplicated students in order to extend learning and provide additional opportunities for students to explore their creativity and discover potential new passions.

- Extracurricular Activities: NUSD provides numerous opportunities for students to experience extracurricular activities including clubs, sports, and competitions. Students are highly encouraged to become involved in extracurricular activities in order to develop friendships, learn invaluable skills, develop a sense of purpose, and foster collaboration and teamwork. The district has expanded sports offerings to students at the middle school level and the county has created a middle school league to support student athletic development, physical fitness, and sportsmanship.

- Wellness Centers: The mental health and wellbeing of NUSD students and school communities are of paramount importance to the Novato Unified School District. Students are holistically supported in their social-emotional development and NUSD has expanded its wellness infrastructure TK-12. The District currently supports four Wellness Centers at Novato High School, San Marin High School, San Jose Middle School and Sinaloa Middle School.

The LCAP documentation focuses primarily on the supplemental funding utilized to improve or increase services to the district's unduplicated pupils, however, the District has created a comprehensive roadmap detailing how it envisions supporting all learners and improving outcomes for all. A significant portion of the roadmap provides funding from numerous additional resources including federal funding, grant funding, and other sources of revenue.

Reflections: Annual Performance

A reflection on annual performance based on a review of the California School Dashboard (Dashboard) and local data.

2023 Dashboard Annual Performance

For the 2023 Dashboard, Lu Sutton Elementary School received a Red (very low) performance level for the Chronic Absenteeism and English Learner Progress State Indicators. For the 2024 Dashboard, both Indicators received higher performance levels. Chronic Absenteeism declined by 11.5% and the performance level progressed by two levels to yellow (medium). English learners increased progress toward proficiency in English by 8.4% and received a green (high) performance level. For the 2023 Dashboard four NUSD student groups received the lowest performance level (red) on one or more state indicators.

Changes from the 2023 to 2024 Dashboard: - English learners declined being chronically absent by 11.4 % and increased two performance levels to yellow (medium). The group increased ELA tests scores by 12.1 points and moved up a performance level to orange (low). The performance level remained the same as the 2023 Dashboard for Mathematics. - Chronic absenteeism for socioeconomically disadvantaged students declined by 11.1% and progressed two performance levels to yellow (medium). Students increased being prepared for college and career by 5% and jumped three performance levels to green (high). - Students with disabilities decreased being chronically absent by 9.7% and received a performance level of yellow (medium). For ELA the performance level remained the same as in 2023. - The African American student group maintained a red performance level with 2.7 points for ELA. For Mathematics, the group increased by 12.1 points and progressed from very low (red) to low (orange).

2025-2026 Update

Reflections: Successes, Challenges, and Areas of Continued Need

As we reflect on the 2025 California School Dashboard and review performance trends across the past three years, it is evident that Novato Unified School District continues to demonstrate resilience, adaptability, and a commitment to continuous improvement. The district's success is grounded in the collective efforts of dedicated educators, support staff, administrators, families, students, and community partners who work together to support student achievement and well-being.

Analysis of the 2023, 2024, and 2025 Dashboard results reveals both notable accomplishments and areas requiring continued focus. While the district has made meaningful progress in several key indicators, persistent performance gaps remain among historically underserved student groups.

Areas of Growth

One of the district's most significant successes has been its sustained focus on student engagement and graduation outcomes.

The district successfully reduced chronic absenteeism between 2023 and 2024 and maintained those gains in 2025. While the overall Dashboard status shifted from Green to Yellow in 2025, absenteeism rates remained relatively stable, increasing by only 0.1 percentage points. This stability reflects the effectiveness of attendance interventions, family outreach efforts, attendance teams, and school-based support systems implemented throughout the district.

Graduation rates demonstrated significant improvement over the three-year period. Following a decline in 2024, the district increased graduation outcomes by 4.7 percentage points in 2025 and achieved a Blue performance level. Contributing factors included expanded credit recovery opportunities, targeted newcomer supports, academic interventions, counseling services, and focused efforts by Teachers on Special Assignment and English Learner support staff to help students remain on track for graduation.

The district also maintained strong performance in College and Career Readiness and Suspension Rate indicators. Suspension rates remained in the Green performance category, reflecting continued implementation of restorative practices, counseling supports, and positive school climate efforts. College and Career Readiness remained Green and increased by 4.7 percentage points, demonstrating the positive impact of expanded access to Career Technical Education pathways, A-G coursework, dual enrollment opportunities, and individualized student support.

Areas Requiring Continued Focus

Despite these successes, academic achievement remains the district's most pressing challenge.

Mathematics performance continues to be an area of concern. The district remained in the Orange performance category in 2025 and experienced a decline of approximately five points from the prior year. Mathematics performance remains below desired levels across multiple student groups and grade spans, indicating the need for continued instructional improvement, intervention systems, and professional learning focused on effective mathematics instruction.

English Language Arts performance also declined by approximately 4.6 points. While the district remained in the Yellow performance category, several student groups continue to experience significant achievement gaps. In response, the district adopted a new English Language Arts curriculum during the 2025–26 school year, which will be fully implemented during 2026–27. This implementation, combined with a continued emphasis on early literacy, intervention, and high-quality Tier 1 instruction, is expected to support improved student outcomes.

English Learner Progress remains an area requiring immediate attention. The district remained in the Orange performance category and experienced a decline of 3.5 percentage points. These results indicate that many English Learners are not making expected annual progress toward English proficiency and highlight the need for stronger designated and integrated English Language Development instruction, enhanced progress monitoring systems, and targeted supports for Long-Term English Learners and newcomer students.

Persistent Student Group Performance Gaps

While districtwide performance provides important information, subgroup performance data reveal continuing inequities that require targeted action.

Students with Disabilities, English Learners, Long-Term English Learners, Homeless Youth, Socioeconomically Disadvantaged students, Hispanic students, and Black/African American students continue to experience disproportionately lower outcomes in academic achievement, attendance, and college and career readiness indicators.

Particularly concerning is the performance of Homeless Youth, which resulted in NUSD being identified for Differentiated Assistance. Homeless Youth received:

Red in Chronic Absenteeism;
Red in English Language Arts;
Orange in Mathematics;
Orange in Graduation Rate; and
Orange in College and Career Readiness.

These outcomes demonstrate the significant barriers faced by students experiencing housing instability and underscore the need for coordinated academic, behavioral, social-emotional, and wraparound supports.

English Learners and Long-Term English Learners continue to demonstrate substantial achievement gaps in English Language Arts, Mathematics, and English Learner Progress. Students with Disabilities also continue to experience significant challenges across multiple indicators, including English Language Arts, Mathematics, Science, Suspension Rate, and College and Career Readiness.

Implications for the 2026–27 LCAP

The district's analysis of Dashboard and local data indicates several priorities moving forward:

-Strengthen Tier 1 instruction and intervention systems in English Language Arts and Mathematics.
-Expand support for English Learners, Long-Term English Learners, and newcomer students through targeted language development and progress monitoring systems.
-Continue attendance interventions while increasing focus on student engagement, belonging, and school connectedness.
-Expand counseling, wellness, behavioral health, and restorative practices to reduce barriers to learning.
-Increase support for students experiencing homelessness through coordinated wraparound services and targeted academic interventions.
-Continue implementation of new curriculum, assessment, and data systems to improve instructional decision-making and student outcomes.
-Maintain a strong focus on graduation pathways, college and career readiness, and equitable access to rigorous coursework and postsecondary opportunities.

Educational partner feedback gathered through ThoughtExchange surveys, DELAC, Special Education Advisory Committee (SEAC), parent advisory groups, student engagement activities, staff input sessions, and community partner meetings consistently reinforced these priorities. Families, students, and staff identified academic achievement, attendance, mental health supports, school connectedness, English Learner success, and equitable access to educational opportunities as critical areas of focus. These findings directly informed the development of the 2026–27 LCAP goals, actions, and expenditures.

Through the Learning Recovery Emergency Block Grant (LREBG) needs assessment, it was determined that NUSD would continue to fund 3 additional paraprofessionals at Rancho Elementary School, San Ramon Elementary School, and Pleasant Valley Elementary School (Action 1.11), and NUSD would fund the IXL platform to support student diagnostics, monitoring, and intervention (Action 1.12). The (LREBG) needs assessment identified significant academic gaps for unduplicated students, particularly in ELA and Math at the elementary level. To address these needs, the district selected two actions: funding three additional paraprofessionals at Rancho, San Ramon, and Pleasant Valley Elementary Schools (Action 1.11), and implementing the IXL platform districtwide (Action 1.12). These actions align with the allowable uses of funds under EC 32526(c)(2), which include expanding learning supports and interventions to accelerate student progress. Paraeducators will strengthen Tier 1 instruction and provide targeted small-group support, while IXL will serve as a diagnostic and intervention tool to monitor student growth and provide individualized practice. Together, these actions are expected to improve student engagement, increase access to grade-level content, and close achievement gaps for unduplicated students.

Reflections: Technical Assistance

As applicable, a summary of the work underway as part of technical assistance.

NUSD has been identified for Differentiated Assistance based on the performance of Homeless Youth. Analysis of the 2025 California School Dashboard indicates that Homeless Youth continue to experience significant barriers to academic success and school engagement. Homeless Youth scored:

Red in Chronic Absenteeism
Red in English Language Arts
Orange in Mathematics
Orange in Graduation Rate
Orange in College and Career Indicator

These outcomes indicate that Homeless Youth continue to experience significant challenges related to consistent school attendance, academic achievement, graduation readiness, and preparation for postsecondary opportunities. The district recognizes that housing instability, transportation barriers, unmet basic needs, social-emotional challenges, and disruptions in educational continuity contribute to these outcomes and require targeted intervention and support.

Steps to Address the Needs of Homeless Youth

In response to these findings, NUSD will continue to prioritize supports designed to improve attendance, academic achievement, school connectedness, and access to services for Homeless Youth through actions included across Goals 1, 2, 3, and 4.

These actions include:

Enhanced attendance monitoring and family outreach through the AERIES Attendance Plus platform.
Expanded counseling, wellness, and behavioral health supports to address social-emotional barriers to school engagement.
Targeted academic interventions through IXL progress monitoring and intervention systems.
Community liaison support to assist families in accessing school and community resources.
Continued coordination of services through the district's McKinney-Vento program.
Direct therapeutic counseling, case management, and wraparound services for high-need students through North Marin Community Services at Marin Oaks High School.
Continued monitoring of graduation progress, credit recovery opportunities, and college and career readiness indicators.

The district will work closely with site teams, community partners, and families to ensure Homeless Youth receive coordinated academic, behavioral, social-emotional, and basic-needs supports that reduce barriers to learning and improve student outcomes.

Comprehensive Support and Improvement

An LEA with a school or schools eligible for comprehensive support and improvement must respond to the following prompts.

Schools Identified

A list of the schools in the LEA that are eligible for comprehensive support and improvement.

N/A

Support for Identified Schools

A description of how the LEA has or will support its eligible schools in developing comprehensive support and improvement plans.

N/A

Monitoring and Evaluating Effectiveness

A description of how the LEA will monitor and evaluate the plan to support student and school improvement.

N/A

Engaging Educational Partners

A summary of the process used to engage educational partners in the development of the LCAP.

School districts and county offices of education must, at a minimum, consult with teachers, principals, administrators, other school personnel, local bargaining units, parents, and students in the development of the LCAP.

Charter schools must, at a minimum, consult with teachers, principals, administrators, other school personnel, parents, and students in the development of the LCAP.

An LEA receiving Equity Multiplier funds must also consult with educational partners at schools generating Equity Multiplier funds in the development of the LCAP, specifically, in the development of the required focus goal for each applicable school.

Educational Partner(s)	Process for Engagement
NUSD Families Input	Survey communication data was sent to families to gather feedback regarding areas of strength, growth, and needs for the District. Parents and guardians received a Thought Exchange survey to provide input for the LCAP. In addition, parents/guardians of students receiving special education services we given a survey and provided the opportunity to provide additional information regarding their experiences with the special education programs and staff.
NUSD Staff Input	NUSD staff received the Thought Exchange and a District survey to provide input for the LCAP.
NUSD LCAP Advisory Committee	The NUSD LCAP Advisory Committee met on three occasions. The Committee reviewed data, discussed the needs assessments from the sites, provided input and feedback, and worked collaboratively to address the formation of the LCAP. These meetings occurred on January 26, March 9, and May 18, 2026.
DELAC	The District English Learner Advisory Committee (DELAC) served in the creation of the LCAP in a variety of capacities. The DELAC team met to review district data and conduct a needs assessment. The DELAC team provided input and feedback regarding the district's English Language Program offerings and needs. The DELAC meetings occurred on January 22, 2026 and May 7, 2026.
Local Bargaining Units	The Executive Director met with the district's two labor partners to receive input and feedback. The meeting with the president of CSEA occurred on May 14, 2026, and the meeting with the co-presidents of Novato Federation of Teachers (NFT) occurred on June 4, 2026.

Educational Partner(s)	Process for Engagement
NUSD Administrators	NUSD administrators were consulted on several occasions during the District's Leadership Team meetings to provide input. Elementary Administrator Team: May 4, 2026 Middle School Administrator Team: May 4, 2026 High School Administrator Team: May 7, 2026
SELPA	The Executive Director of Education Services and the Accountability Coordinator met with the SELPA Director on April 22, 2026.
Marin Oaks Equity Multiplier Funds	Staff met with the principal of Marin Oaks to discuss site needs and staffing.
Leadership Novato Chamber of Commerce Meeting	District staff met with Leadership Novato, a Chamber of Commerce cohort that is designed to serve the Novato community. During this meeting, the Executive Director conducted a survey to gather community input and feedback related to the programmatic offerings and climate and culture of the district. This meeting occurred on November 12, 2025.
Student Meetings	The Executive Director met with several student groups to gather input and feedback regarding the LCAP and how the District could improve its services to the student body. The meetings that occurred are as follows: Superintendent Student Advisory Council (NHS, SMHS, MO, and NOVA students): October 9, 2025, November 13, 2025, December 11, 2025, January 15, 2026, February 12, 2026, March 26, 2026, April 16, 2026 San Jose Middle School students: April 17, 2026 Novato High School students: May 2, 2026 In addition, all district students were surveyed through the Annual NUSD Survey through the Thought Exchange platform.
Special Education Committee	The Director of Special Education met with the District Special Education Committee (DSEAC) to provide student data, receive input and feedback regarding the district's delivery of special education services on the following dates:

Educational Partner(s)	Process for Engagement
	October 10, 2025 November 12, 2025 January 14, 2026 March 11, 2026 A survey designed specifically for families whose students receive special education services was also provided, reviewed, and analyzed for areas of need and support.

A description of how the adopted LCAP was influenced by the feedback provided by educational partners.

The District prioritizes positive relationships with its educational partners and works tirelessly to involve students, families, and the community in decision making and goal setting. Feedback and input was gathered from educational partners through a series of meetings including DELAC meetings, student classroom input sessions, leadership meetings, meetings with labor and community partners, administrative meetings, and the LCAP Steering Committee/Parent Advisory Committee. The District also sent various surveys to staff, students, and families including the Thought Exchange Survey. The stakeholder groups individually and collectively worked to amplify the voices of the NUSD community and share the experiences of students, families, and staff.

Through these various feedback sessions, draft reviews, data reviews, and thoughtful discussions, the district's educational partners were consulted on numerous occasions and provided significant information to provide input to help refine the LCAP. All stakeholder input was reviewed by NUSD staff to understand the continued priorities of the community to guide plans for the future.

After conducting a district needs assessment and working with our educational partners, the three main goals continue to be appropriate: academic needs and supports, social emotional well-being and mental health supports, and family engagement, inclusion, and belonging. The actions established in the LCAP are the direct reflection of the input and feedback provided by the district connected stakeholders. The District allocated its supplemental funding to address the highest needs to serve unduplicated students. Through a compilation of LCFF funding, federal funding, Expanded Learning Opportunity Program funding, the Learning Recovery Emergency Block Grant (LREBG) and additional grants, the District will be able to provide support and resources in a majority of areas of concern.

The following needs and requests surfaced throughout the surveys, meetings, and input sessions:

Educational Partner Priorities:

- Continued and expanded mental health services and supports for students
- Continued presence of Community Liaisons
- Continued support for students dealing with attendance issues
- Increasing bilingual staff to support students academically and in the area of counseling
- Continued support for students demonstrating challenging behaviors in the classroom
- Continued intervention support, tutoring, and staff resources for Newcomer and English Learner students

- Continued intervention supports for students struggling academically
- Continued support of Teachers on Special Assignment
- Continued support of English Learner Specialists
- Greater inclusion of students receiving special education services in the general education settings, with a focus on students in the Marin County Office of Education's special education programs
- Continued expansion and development of the Dual Language Immersion program
- Continued continuity related to programmatic offerings
- Increased support for teaching staff including professional development and resources
- Additional supports and strategies for staff who are attempting to deal and address the changing needs of students related to behaviors, learning, and mental health
- Increased school communication to students so that they are aware of the numerous opportunities available to them and are able to participate especially in the areas of college and career supports
- Continued review of current curriculum at the early grade levels to ensure the District is adhering to the tenets of the Science of Reading and supporting early literacy foundational skills
- Continued review, research, and application of guardrails, digital literacy training for students, and professional development for Artificial Intelligence (AI)
- Increased scrutiny and intentional use of technology applications and Chromebooks at the elementary and middle school levels
- Continued review and implementation of the California Mathematics Framework
- Continued support for educator workforce housing
- Continued focus on reducing the harms of social media and cell phone use
- Continued and increased opportunities for accessing tutoring supports for academic preparedness and maintaining grade level status
- Review of class sizes and ability to appropriately serve all students' needs
- Review of current curriculum needs and clarity of curriculum to support English Language Learners, especially newcomer students
- Continued support of professional development with Proficiency Based Education and the transition to Standards Based Grading

Although all of the input is incredibly valuable and important, based on current budgetary challenges and declining enrollment, not all of the input could come to fruition in terms of supporting students and student outcomes.

Through the Learning Recovery Emergency Block Grant (LREBG) needs assessment, it was determined that NUSD would fund 3 additional paraprofessionals at Rancho Elementary School, San Ramon Elementary School, and Pleasant Valley Elementary School (Action 1.11), and NUSD would fund the IXL platform to support student diagnostics, monitoring, and intervention (Action 1.12).

Goals and Actions

Goal

Goal #	Description	Type of Goal
1	NUSD is committed to promoting equitable academic achievement for all students by reducing disparities among student groups. To achieve this, NUSD will focus on increasing the number of underrepresented students who meet A-G eligibility requirements, attain college and/or career readiness, and reach grade-level proficiency with targeted support.	Broad Goal

State Priorities addressed by this goal.

Priority 1: Basic (Conditions of Learning)
Priority 2: State Standards (Conditions of Learning)
Priority 4: Pupil Achievement (Pupil Outcomes)
Priority 7: Course Access (Conditions of Learning)
Priority 8: Other Pupil Outcomes (Pupil Outcomes)

An explanation of why the LEA has developed this goal.

NUSD has developed this goal in response to student data analysis, educational partner input and feedback, and differentiated assistance designation. The District needs to reduce the variance among student subgroups and ensure that all students must demonstrate proficiency on state academic standards and examinations, develop English Language proficiency, develop the required skill sets and habits to engage in challenging and rigorous coursework, have the opportunity to become bilingual and biliterate, and exhibit the necessary mindsets to flourish as productive members of the NUSD community.

Measuring and Reporting Results

In addition, based on an analysis of the secondary master schedules, the district provided all students, including unduplicated students and students with special education needs a broad course of study.	This access will be measured through the secondary school schedule of courses/master schedule, variety of courses offered, and the absence of barriers to course entrance.	

Goal Analysis [2025-26]

An analysis of how this goal was carried out in the previous year.

A description of overall implementation, including any substantive differences in planned actions and actual implementation of these actions, and any relevant challenges and successes experienced with implementation.

During Year 2 of the LCAP, the district continued implementation of key actions designed to reduce disparities among student groups, particularly English Learners, newcomers, and students requiring additional academic and behavioral supports. While statewide assessment outcomes remained relatively flat overall, the district maintained a strong commitment to targeted intervention systems, instructional coaching, and professional learning despite significant fiscal and organizational challenges.

Key actions continued to include:

Teachers on Special Assignment (TOSAs) providing instructional coaching, intervention coordination, and data analysis support across school sites;
English Learner specialists supporting designated and integrated English Language Development and targeted interventions for multilingual learners;

Ongoing professional development focused on instructional improvement, assessment literacy, and inclusive practices;
Continued implementation of systems to strengthen data-informed instruction and student progress monitoring.

A major shift during Year 2 was the district's transition from the Galileo assessment platform to IXL. This transition required staff training and adjustment as educators learned to effectively utilize the new platform to provide benchmark data, identify targeted supports for students, and monitor academic progress. While the implementation year presented a learning curve for staff, the district recognizes the long-term potential of the platform to provide clearer and more actionable data to support improved student outcomes.

Substantive Differences from Planned Actions

During the year, the district experienced significant fiscal challenges that required adjustments to staffing and implementation priorities. A budget shortfall of approximately $4 million resulted from declining enrollment, a reduction of approximately 150 English Learners/newcomers, and the expiration of one-time COVID relief funding and local grant resources. As a result, several planned supports were reduced or restructured.

Key changes included:

-Teachers on Special Assignment (TOSAs), while continuing to provide impactful instructional and intervention support throughout the year, were informed in the fall that they would return to classroom teaching positions for the 2026–27 school year as part of districtwide budget reductions.
-The District Multilingual Learner Coordinator was reassigned midyear to a classroom teaching role at Lynwood Elementary following a teacher vacancy, which significantly reduced district-level coordination capacity for multilingual learner supports, professional development, and instructional alignment.
-Staffing reductions and fiscal constraints required the district to prioritize core instructional and intervention services while scaling back some supplemental supports originally envisioned in the LCAP.

Successes and Strengths

Despite these challenges, the district demonstrated several notable strengths during Year 2 implementation.

-TOSAs continued to have a meaningful impact through instructional coaching, student intervention planning, and the development of data systems and progress-monitoring structures that supported site teams and classroom teachers.
-Staff demonstrated adaptability and resilience during the transition to the IXL platform and increasingly utilized assessment data to guide instruction and intervention decisions.
-The district provided focused professional development opportunities aligned to instructional priorities and student needs, including:
-Building Thinking Classrooms in Mathematics
-IXL implementation and data utilization trainings
-Standards-Based Grading training at the middle school level
-mClass screener training
-CPI training

-Restorative Practices training
-ELA curriculum adoption training

These professional learning opportunities supported staff capacity-building in instructional practice, assessment, student engagement, behavior support, and equitable learning environments.

Challenges Experienced:

Several significant challenges impacted implementation during Year 2.

Flat statewide assessment performance highlighted the continued need to strengthen instructional coherence, intervention systems, and data-driven practices across the district. The transition to a new assessment platform required substantial staff learning and calibration, which temporarily impacted consistency in data collection and analysis. Fiscal instability and staffing reductions limited the district's ability to sustain some of the intensive supports initially planned within the LCAP. The reassignment of the Multilingual Learner Coordinator reduced opportunities for districtwide coordination and collaboration among English Learner support staff and site teams. Ongoing balancing of professional development time, intervention services, and classroom instructional needs continued to present implementation challenges across school sites.

Overall Reflection

Year 2 implementation reflected the district's continued commitment to supporting underserved student groups amid significant financial and organizational challenges. Although academic outcomes remained relatively flat, the district maintained critical instructional supports, invested in professional learning, and established foundational systems for improved data use and intervention planning through the transition to IXL.

The district recognizes that sustainable improvement will require continued focus on instructional alignment, strategic resource allocation, targeted intervention supports, and strengthening staff capacity to effectively utilize student data to inform instruction. Lessons learned during Year 2 will help guide future planning and prioritization as the district works to improve outcomes for English Learners and all student groups.

An explanation of material differences between Budgeted Expenditures and Estimated Actual Expenditures and/or Planned Percentages of Improved Services and Estimated Actual Percentages of Improved Services.

There were no material differences between budgeted expenditures and estimated actual expenditures and/or planned percentages of improved services and estimated actual percentages of improved services with the exception of Action 1.7 as the cost of credit recovery, summer school, and teacher support was significantly different as the district only allocated approximately $260,000 as the summer school credit recovery program was overbudgeted.

A description of the effectiveness or ineffectiveness of the specific actions to date in making progress toward the goal.

The district continued implementation of targeted actions designed to reduce disparities among student groups, particularly English Learners, newcomers, students with disabilities, and students requiring additional academic and behavioral supports. While statewide assessment data

remained relatively flat during Year 2, evidence suggests that several actions contributed positively to strengthening instructional systems, improving intervention structures, and building staff capacity to better support student learning.

Effectiveness of Actions

Teachers on Special Assignment (TOSAs) continued to be one of the most impactful supports during implementation. TOSAs played a significant role in facilitating intervention planning, supporting teachers with instructional strategies, analyzing student data, and developing systems to better identify and monitor student needs. Their work helped strengthen site-level collaboration and provided teachers with more timely support for addressing learning gaps. Feedback from school sites indicated that the coaching and collaborative planning structures supported stronger instructional alignment and more intentional intervention practices.

The district's transition from the Galileo assessment platform to IXL also contributed to the development of more consistent benchmark and progress-monitoring systems. Although staff were in the early stages of learning the platform, educators increasingly utilized IXL data to identify student needs, target interventions, and monitor progress over time. Because Year 2 represented a significant implementation and training year, the district recognizes that the full effectiveness of the platform will continue to develop as staff build greater familiarity and confidence with the system.

Professional development efforts were another area of effectiveness. Staff participated in focused trainings aligned to district instructional priorities, including Building Thinking Classrooms in Mathematics, IXL implementation, Standards-Based Grading at the middle school level, mClass screening, restorative practices, Center for Educational Leadership's Instructional Leadership Academy Institute, and ELA curriculum adoption. These learning opportunities strengthened staff capacity in instructional delivery, assessment literacy, student engagement strategies, and behavioral supports. Classroom observations, staff feedback, and collaborative planning discussions indicated growing use of research-based instructional practices and increased attention to equitable learning environments for students.

At the same time, several factors limited the overall effectiveness and full implementation of planned actions. Significant fiscal challenges substantially impacted staffing stability and district capacity. A budget shortfall of approximately $4 million, driven by declining enrollment, a reduction in English Learner/newcomer enrollment, and the expiration of one-time funding sources, required the district to shift priorities and reduce staffing supports.

The reassignment of the District Multilingual Learner Coordinator to a classroom teaching position midyear reduced districtwide coordination and support for multilingual learner programming, professional development, and instructional alignment. Additionally, while TOSAs continued to provide strong support during the school year, notification that these positions would return to classroom assignments in 2026–27 limited the district's ability to sustain long-term coaching and intervention structures.

Overall, while student achievement outcomes have not yet demonstrated significant growth, the district believes the actions implemented during Year 2 were partially effective in strengthening foundational systems necessary for long-term improvement. The district made progress in building staff capacity, improving data systems, and maintaining targeted supports for students despite significant fiscal and organizational challenges. Continued implementation, refinement of intervention systems, strategic use of assessment data, and sustained professional learning will be necessary to accelerate student outcomes and reduce disparities among student groups over time.

A description of any changes made to the planned goal, metrics, target outcomes, or actions for the coming year that resulted from reflections on prior practice.

Reflections on Year 2 implementation, combined with significant fiscal realities and evolving student needs, led the district to make substantial adjustments to Goal 1 actions, staffing structures, and support systems for the coming year. These changes are intended to preserve and strengthen essential academic supports while strategically reallocating resources to sustain high-priority services focused on equity, student achievement, bilingualism and biliteracy, attendance, intervention systems, and college and career readiness.

Adjustments to Staffing and Instructional Support Structures

Due to ongoing budget reductions associated with declining enrollment, decreased English Learner/newcomer enrollment, and the expiration of one-time funding sources, the district made several staffing adjustments to ensure long-term fiscal sustainability while maintaining direct support for students.

-Teachers on Special Assignment (TOSAs) will return to classroom teaching assignments for the 2026–27 school year. While these positions provided valuable instructional coaching, intervention support, and data analysis during prior implementation years, the district determined that returning credentialed staff to classrooms was necessary to maintain stable instructional programming and staffing ratios across school sites.
-The District Multilingual Learner Coordinator position has been eliminated due to budget reductions. Responsibilities previously assigned to this role will transition to the Educational Services Department, with additional support provided through an English Learner Program Specialist to maintain compliance oversight, instructional support, ELPAC coordination, and multilingual learner program implementation.
-The district will continue prioritizing bilingualism and biliteracy through significant funding allocations to support staffing at Lynwood Elementary School, ensuring the continuation and stability of bilingual instructional opportunities for students and families participating in the district's bilingual programming.

Refinements to Academic Support and Progress Monitoring Systems

Reflections on implementation data and instructional needs highlighted the importance of strengthening systems that support attendance, progress monitoring, standards-based instruction, and timely academic intervention.

-The district will continue implementation and refinement of the IXL platform to support benchmark assessments, individualized learning pathways, progress monitoring, and targeted intervention planning aligned to state standards.
-The district will implement the AERIES Attendance Plus platform to strengthen attendance monitoring, improve early identification of chronic absenteeism, and support timely interventions aimed at increasing student attendance and engagement.
-The district will also implement the AERIES JumpRope platform at the middle school level to support Standards-Based Grading practices, improve consistency in grading and reporting, and provide students and families with clearer, more timely academic feedback aligned to standards mastery.
-The district will continue investing in instructional professional development opportunities designed to strengthen standards-aligned instruction, assessment literacy, intervention systems, and equitable classroom practices. Additionally, professional development work with the Center for Educational Leadership (CEL) provided administrators and staff with foundational tools and structures to strengthen instructional leadership, reflective practice, and collaborative conversations surrounding teaching and learning. Through learning walks,

classroom observations, and actionable feedback protocols, administrators developed greater capacity to support instructional improvement and facilitate meaningful professional dialogue with staff.

-While the district continues to evaluate future partnership opportunities, the tools, practices, and systems developed through this work will continue to serve as an important foundation for ongoing site-based discussions focused on instructional practices and student learning. The district believes these structures will help foster a more collegial and collaborative approach to teaching, where staff increasingly engage in reflective conversations, shared learning, and continuous improvement efforts designed to strengthen classroom instruction and improve student outcomes.

Continued Commitment to College and Career Readiness

The district will continue maintaining supports designed to improve student progress toward graduation and postsecondary readiness, including:
-credit recovery opportunities
-summer school programming
-college and career exploration and counseling supports
-interventions aimed at improving A-G completion and graduation outcomes for targeted student groups

Refinement of Metrics and Outcomes

To align with revised actions and district priorities, Goal 1 metrics and outcomes will continue to be refined to better measure both implementation effectiveness and student outcomes. Updated metrics will include:
-attendance and chronic absenteeism indicators
-IXL implementation and student progress-monitoring data
-Standards-Based Grading implementation measures
-English Learner progress and reclassification indicators
-college and career readiness indicators
-credit recovery participation and completion rates
-middle school grading and feedback measures through JumpRope implementation

Overall Reflection and Direction for the Coming Year

Reflections on prior implementation affirmed the district's commitment to maintaining equitable academic supports despite significant fiscal constraints and organizational changes. While some staffing structures required modification or reduction, the district intentionally prioritized actions that sustain direct instructional services, strengthen multilingual learner supports, improve attendance and engagement, and expand systems for academic monitoring and intervention.

These refinements reflect the district's continued focus on building sustainable systems that improve instructional coherence, strengthen data-informed decision-making, and support the academic success of underserved student groups. Through strategic restructuring and

targeted investments, the district aims to continue improving outcomes and educational access for all students while maintaining its strong commitment to bilingualism, biliteracy, and equitable opportunities for learning.

A report of the Total Estimated Actual Expenditures for last year's actions may be found in the Annual Update Table. A report of the Estimated Actual Percentages of Improved Services for last year's actions may be found in the Contributing Actions Annual Update Table.

Actions

Action #	Title	Description	Total Funds	Contributing
1.1	Maintain Teachers on Special Assignment to ensure equitable outcomes for students through monitoring, intervention, and evaluation.	Teachers on Special Assignment will support staff with improving academic outcomes for students. The Teacher on Special Assignment (TOSA) will work with the school site to provide support for data analysis and create systems for data cycles at the school site. The Teacher on Special Assignment will also support, facilitate, and direct intervention and Multi-Tiered Systems of Support (MTSS) in both academics and social emotional areas. The TOSA will plan and monitor activities related to assessment and work with grade level teams to help identify small groups for targeted support. The TOSA will support staff on the use of assessment tools including but not limited to: Galileo, Running Records, district benchmarks, MARS Tasks, CAASPP, interim assessments, and ESGI. In the 26-27 school year, the Teachers on Special Assignment will return to the classroom due to significant budget challenges.	$0.00	
1.2	Maintain English Learner Specialists to support English language development and instruction for English Language Learners.	The English Learner Specialists will be engaged in supporting staff and English Learner students in a variety of capacities. The specialists will monitor English Learner academic progress and manage necessary supports, communicate to parents the services provided to newcomer and EL students (including LTEL and ARLTEL students), provide support and preparation for the ELPAC assessment and reclassification process, and engage in data entry and analysis to support staff in constructing meaningful English Language development lessons and interventions that support the development of English Language proficiency.	$390,779.00	Yes
1.3	Provide expanded English Language	The purpose of English Language Development (ELD) expanded sections is to reduce the number of students at the secondary level receiving	$332,986.00	Yes

Action #	Title	Description	Total Funds	Contributing
	Development (ELD) Sections to maintain smaller class sizes to support language development and instruction for English Language Learners.	targeted English language development support. The class is designed to actively engage students in learning language structures and vocabulary. ELD lessons utilize academic content to support English language acquisition. The smaller English Language Development (ELD) classes support English learners in developing language skills by providing additional one on one instruction and intervention to meet each English Language Learner's specific language needs.		
1.4	Maintain AVID contract and sections to support first generation and underrepresented students in accessing and completing the A-G requirements.	AVID - Advancement Via Individual Determination is an academic support program in the secondary schools to prepare students for college admission. The program focuses upon underrepresented students who will be the first in their families to attend college.	$415,728.00	Yes
1.5	Retain a Multilingual Learner Coordinator to provide direction and support for staff to ensure English Learners are developing language proficiency and receiving appropriate content instruction to maintain grade level standards.	The Multilingual Learner Coordinator will work to support the academic outcomes for English Language Learners and provide guidance and direction for the Dual Language Immersion Program to increase the number of students who are bilingual and biliterate upon graduation from NUSD. This position was eliminated effective July 1, 2026, due to budget challenges.	$0.00	
1.6	Provide professional development for Lynwood Elementary School, San Jose Middle School, and district administrators to increase and promote English language proficiency	District review, update, and enhancement of the Multilingual Learner Plan to support increased English Language proficiency, expansion of the Dual Language Immersion Program, and increased numbers of students obtaining a Seal of Biliteracy upon graduation. Professional development to support staff in creating proficiency goals and metrics for the development of the Dual Language Immersion program.	$15,000.00	No Yes

Action #	Title	Description	Total Funds	Contributing
	development for English Learners and academic support for the Dual Language Instruction program.			
1.7	Provide credit recovery options, staffing, and summer school for high school students through an online platform.	Credit recovery, dedicated staff, and summer school allow unduplicated students to recover credits, maintain A–G eligibility, and stay on track for graduation. These programs, supported by research and district experience, are highly effective in improving graduation outcomes and reducing dropout risk, especially for English Learners, students with disabilities, and other underserved groups.	$259,674.00	Yes
1.8	Provide a districtwide College and Career Specialist to support Novato High School, San Marin High School, and consult with Hill Education counseling staff.	The districtwide College and Career Specialist will support unduplicated students accessing college and career information to increase postsecondary options with a focus on applying to colleges, managing financial aid applications, providing scholarship information, and exposing students to internships and career opportunities.	$103,242.00	Yes
1.9	Provide an English Learner Specialist to support with ELPAC testing, monitoring of student data platforms for English Language Learners, and support for the English Language Development courses. In addition, provide additional hourly duty pay to fund extra support and monitoring for ELPAC testing.	NUSD will provide an English Learner Specialist to support with ELPAC testing, data monitoring, and English Language Development courses. The specialist manages secure test administration, trains examiners, oversees accommodations, and supports reclassification by coordinating score reports and documentation. To further strengthen ELPAC administration, the district will also provide additional testers and hourly duty pay to ensure timely and accurate completion of assessments.	$215,141.00	Yes

Action #	Title	Description	Total Funds	Contributing
1.10	Provide an additional two Dual Language Immersion Teachers to support the Dual Language Immersion programs at San Jose Middle School and Lynwood Elementary School.	NUSD will provide two additional Dual Language Immersion (DLI) teachers to support the programs at San Jose Middle School and Lynwood Elementary. These positions ensure that unduplicated students and English Learners have equitable access to high-quality instruction in both English and Spanish, promoting bilingualism, biliteracy, academic achievement, and cultural proficiency. By strengthening the district's DLI pathway, this action supports long-term goals of bilingualism, college and career readiness, and closing opportunity gaps for English Learners. In the 2026-2027 school year, the district is increasing staffing allocations at Lynwood Elementary School and San Jose Middle School to maintain and strengthen bilingual instructional programming and ensure continued access to high-quality educational opportunities for unduplicated pupils, including English Learners, low-income students, and other at-risk student groups. These staffing supports are principally directed toward improving academic outcomes, language acquisition, student engagement, and school connectedness for students participating in bilingual and multilingual instructional programs. Lynwood Elementary serves a significant population of unduplicated pupils who benefit from increased access to bilingual instruction, targeted language development supports, culturally responsive teaching practices, and stable instructional environments. Maintaining appropriate staffing levels is necessary to preserve program continuity, provide differentiated instruction, support smaller instructional groupings when needed, and ensure students receive the academic and linguistic supports necessary to access grade-level content and progress toward bilingualism and biliteracy.	$1,726,427.00	Yes
1.11	Provide instructional paraeducators at 3 elementary sites (Rancho Elementary School, Pleasant Valley Elementary School, and San Ramon Elementary School) to support	Early intervention at the elementary level is essential to closing learning gaps before they widen in middle and high school. To address this need, the district has allocated Learning Recovery Emergency Block Grant (LREBG) funding to provide instructional paraeducators at Rancho Elementary, Pleasant Valley Elementary, and San Ramon Elementary. Paraeducators will strengthen Tier 1 instruction by assisting teachers with small-group instruction, monitoring student progress, and providing targeted academic interventions. This additional adult support increases individualized attention for unduplicated students at these three sites,	$141,507.00	No

Action #	Title	Description	Total Funds	Contributing
	Tier 1 instruction and assist teachers with academic interventions.	helping them access grade-level content and build the foundational skills necessary for long-term success. The effectiveness of this action will be measured through improvements in school connectedness as demonstrated in ThoughtExchange survey results, a reduction in chronic absenteeism among unduplicated students, and fewer students requiring Tier II interventions, reflecting stronger Tier I support at the elementary level.		
1.12	Utilize the IXL learning platform in grades TK-12 to determine student progress toward grade level standards.	The IXL platform offers real-time diagnostics, targeted skill practice, and analytics that help educators identify student needs, track progress, and provide focused instruction. IXL is aligned to state standards and is used to reinforce classroom instruction, address learning gaps, and support students at all levels. The platform also includes tools that promote math fact fluency, algebraic thinking, and conceptual understanding, to support building long-term academic success. This platform will be paid through LREGB funding.	$291,200.00	No
1.13	Utilize the JumpRope platform to implement Standards-Based Grading at the middle school levels.	Implementation of the JumpRope platform at the middle school level will support Standards-Based Grading practices designed to provide students and families with clearer, more timely, and equitable feedback regarding student learning and mastery of academic standards. The platform will help increase consistency in grading practices, strengthen student ownership of learning, and improve communication surrounding academic progress and areas of need. This platform will be paid through LREGB funding.	$50,000.00	No
1.14	Implement the AERIES Attendance Plus Program to decrease chronic absenteeism and increase positive attendance.	Implementation of the AERIES Attendance Plus platform will strengthen attendance monitoring systems, improve family communication regarding attendance concerns, and support timely interventions for students experiencing chronic absenteeism or disengagement from school. The platform will enhance accountability, increase outreach efforts, and support positive attendance habits that improve student engagement and access to instruction. This platform will be paid through LREGB funding.	$25,000.00	No

Goals and Actions

Goal

Goal #	Description	Type of Goal
2	NUSD will cultivate nurturing and inclusive learning environments that prioritize student social-emotional well-being and mental health. Through targeted initiatives and supports, NUSD aims to ensure that all students feel safe, supported, and included within their school community, thereby enabling equitable access to the curriculum.	Broad Goal

State Priorities addressed by this goal.

Priority 3: Parental Involvement (Engagement)
Priority 5: Pupil Engagement (Engagement)
Priority 6: School Climate (Engagement)

An explanation of why the LEA has developed this goal.

NUSD has developed this goal based on significant student, staff, and educational partner input. In order to continue to foster student mental health and well-being, the District is committed to providing the necessary supports, training and resources to ensure students and staff are equipped to deal with challenging situations, social-emotional issues, and conflict management.

Goal Analysis [2025-26]

An analysis of how this goal was carried out in the previous year.

A description of overall implementation, including any substantive differences in planned actions and actual implementation of these actions, and any relevant challenges and successes experienced with implementation.

During Year 2 of LCAP implementation, the district continued its efforts to cultivate safe, inclusive, and supportive learning environments that prioritize students' social-emotional well-being, mental health, school connectedness, and positive engagement in school. Despite ongoing fiscal pressures and uncertainty surrounding future funding sources, the district was able to maintain all planned student wellness and support services during Year 2 while continuing to strengthen systems focused on prevention, intervention, and relationship-centered practices.

Implementation Summary

The district implemented several key actions aligned to Goal 2 with a continued focus on improving school climate, increasing access to mental health services, reducing behavioral disruptions, and strengthening student engagement and attendance.

Expanded Counseling and Wellness Supports

-The district increased the number of elementary school counselors and wellness coaches to expand access to social-emotional and behavioral supports for younger students.
-Counselors and wellness staff provided individual counseling, small group support, crisis response, attendance interventions, social-emotional learning support, and collaboration with families and outside agencies.

-The expansion of elementary counseling and wellness supports strengthened early intervention efforts and increased students' access to trusted adults and school-based mental health resources.
Community-Based Mental Health Partnerships
-The district continued its partnerships with community mental health providers to support student wellness and therapeutic services across school sites.
-Throughout Year 2, district staff and community partners engaged in ongoing planning discussions related to the California Youth Behavioral Health Initiative (CYBHI) and multipayer fee schedule models. These conversations helped prepare the district and providers for anticipated structural and funding changes that will occur in Year 3 of the LCAP.
-Community partnerships continued providing counseling services, family support, crisis response, referrals, and connections to outside mental health resources for students and families.
Restorative Practices and School Climate Supports
-The district continued utilizing North Bay Security Group to provide campus support through a restorative, relationship-centered approach focused on student safety, conflict resolution, wellness checks, and student engagement.
-North Bay staff supported attendance interventions, de-escalated student conflicts, and worked collaboratively with school teams to reconnect students to supports and services.
-Community specialists at the middle and high school levels continued serving as trusted mentors and mediators for students requiring additional behavioral, attendance, and engagement support.
-In addition to restorative practices and conflict resolution, community specialists also supported districtwide efforts related to anti-hate speech education, student awareness, and fostering inclusive school environments.

Substantive Differences and Adjustments

Implementation during Year 2 largely remained aligned to planned actions, with the district successfully maintaining all major counseling, wellness, and community partnership supports outlined within Goal 2.

-While no major reductions in services occurred during Year 2, district leadership continued planning proactively for future fiscal challenges associated with declining enrollment and the expiration of one-time funding sources.
-Ongoing discussions with community mental health partners regarding CYBHI implementation and multipayer fee schedules resulted in planning and structural adjustments that will take effect during Year 3 of the LCAP.
-The district also continued refining coordination systems among counselors, wellness staff, community providers, attendance teams, and site administration to improve communication and streamline student support processes.

Challenges and Successes

The district experienced several important successes during implementation:
-Students continued to have increased access to counseling, wellness, and mental health supports across school sites.
-The expansion of elementary counselors and wellness coaches strengthened early intervention systems and increased support for students experiencing social-emotional and behavioral challenges.
-Restorative practices and proactive intervention strategies contributed to improved relationship-building, increased student support, and more collaborative approaches to addressing behavioral concerns.

-Community specialists and North Bay personnel established strong relationships with students and families, helping foster increased trust, school connectedness, and positive student engagement.
-Staff continued demonstrating increased awareness of trauma-informed and relationship-centered approaches to supporting student well-being and school climate.

The district also experienced several implementation challenges:
-The demand for mental health and behavioral support services continued to exceed available staffing and service capacity at some school sites.
-Chronic absenteeism and student disengagement remained ongoing challenges requiring intensive multi-tiered interventions, relationship-building, and family outreach efforts.
-Continued professional development and coordination are needed to ensure consistent implementation of restorative practices, trauma-informed approaches, and student support systems across all sites.

Overall Reflection

Year 2 implementation reflected the district's continued commitment to supporting the whole child through integrated social-emotional, behavioral, and mental health supports. The district successfully maintained and expanded key systems focused on student wellness, restorative practices, attendance interventions, and school connectedness while preparing for future structural and funding changes anticipated in Year 3.

The work completed during Year 2 further strengthened the district's foundation for creating safe, inclusive, and supportive learning environments where students feel connected, valued, and supported academically, behaviorally, and emotionally.

An explanation of material differences between Budgeted Expenditures and Estimated Actual Expenditures and/or Planned Percentages of Improved Services and Estimated Actual Percentages of Improved Services.

There were no material differences between budgeted expenditures and estimated actual expenditures and/or planned percentages of improved services and estimated actual percentages of improved services.

A description of the effectiveness or ineffectiveness of the specific actions to date in making progress toward the goal.

The actions implemented under Goal 2 have been highly effective in strengthening school climate, increasing access to student wellness supports, and improving systems designed to support students' social-emotional well-being, mental health, attendance, and overall school connectedness. Throughout Year 2, the district's continued investment in counseling services, wellness supports, restorative practices, and community partnerships contributed positively to creating more inclusive, supportive, and responsive school environments for students and families.

Effectiveness of Actions

One of the most impactful actions during Year 2 was the expansion of elementary counseling and wellness supports. By increasing the number of elementary counselors and wellness coaches, the district strengthened early intervention systems and increased student access

to trusted adults and school-based support services. These staff members provided individual counseling, small group support, crisis intervention, attendance support, and social-emotional learning opportunities that helped students build coping skills, strengthen peer relationships, and remain connected to school.

Schools reported that the increased counseling and wellness presence positively impacted students' emotional regulation, engagement, and ability to access support before behaviors escalated into larger concerns. Staff and families also expressed appreciation for the increased availability of social-emotional and mental health resources at the elementary level.

The district's partnerships with community mental health providers also continued to be effective in expanding access to therapeutic services and family support. Community-based providers helped ensure students and families had increased access to counseling services, referrals, crisis support, and outside mental health resources. Continued collaboration with community agencies strengthened communication systems and helped schools provide more coordinated and responsive support for students with significant social-emotional or behavioral needs.

Restorative practices and relationship-centered approaches implemented through North Bay Security Group and community specialists also contributed positively to school climate and student engagement efforts. Rather than relying primarily on punitive responses to student behavior, staff focused on relationship-building, de-escalation, conflict resolution, and reconnecting students to supports and services. Community specialists developed strong relationships with students and families and played a particularly important role in supporting students experiencing behavioral challenges, attendance concerns, peer conflict, or disengagement from school.

Additionally, community specialists supported districtwide efforts related to anti-hate speech education and fostering inclusive school environments. These efforts helped strengthen student awareness, reinforce expectations for respectful behavior, and support school climates centered on inclusion, belonging, and safety.

Evidence gathered through student support meetings, attendance interventions, staff feedback, school climate discussions, and site observations suggests that these actions positively contributed to stronger student relationships, improved access to supports, and increased staff responsiveness to student wellness needs. The district believes these systems have created a stronger foundation for supporting the whole child and improving conditions for learning.

At the same time, the district recognizes that several challenges continue to impact overall effectiveness. The demand for mental health and behavioral support services continues to exceed available staffing and service capacity at some school sites. Chronic absenteeism and student disengagement remain persistent areas of concern requiring continued multi-tiered interventions, family outreach, and coordinated supports. Additionally, while restorative and trauma-informed practices have expanded, ongoing professional development and calibration are still needed to ensure consistent implementation across all schools and staff groups.

Overall, the district believes the actions implemented under Goal 2 have been highly effective in improving systems of support for students and strengthening school climate and connectedness. While continued refinement and expansion of services will be necessary, the district has made meaningful progress toward creating nurturing, inclusive learning environments that support students academically, behaviorally, socially, and emotionally.

A description of any changes made to the planned goal, metrics, target outcomes, or actions for the coming year that resulted from reflections on prior practice.

Reflections on Year 2 implementation reinforced the district's commitment to maintaining and strengthening systems that support students' social-emotional well-being, behavioral health, school connectedness, and access to safe and inclusive learning environments. Based on implementation data, school climate needs, staff feedback, and ongoing analysis of student support systems, the district identified several refinements and adjustments to Goal 2 actions, staffing structures, funding allocations, and service delivery models for the coming year.

Expanded Behavioral, Counseling, and Wellness Supports

As part of the district's continued focus on supporting the whole child, all counseling and wellness coach supports will formally be incorporated into Goal 2 actions for the coming year. Reflection on prior implementation demonstrated the significant positive impact counselors and wellness staff have had on student engagement, early intervention, attendance support, social-emotional learning, crisis response, and overall school climate.

The district will also add the district behaviorist to Goal 2 actions to strengthen inclusive practices and expand proactive behavioral supports across school sites. The behaviorist will support staff through professional development, coaching, and implementation of de-escalation strategies and behavioral interventions designed to reduce exclusionary disciplinary responses and increase students' ability to remain successfully engaged in classroom learning environments.

Refinement of Community Mental Health Service Models

Ongoing collaboration and planning with community mental health providers during Year 2 resulted in significant adjustments to service delivery structures for the coming year. The district will no longer directly contract with community mental health partners in the same capacity as previous years. Instead, providers will transition to an affiliate provider billing structure aligned with the California Youth Behavioral Health Initiative (CYBHI) and multipayer fee schedule models.

This revised structure is intended to:
-improve long-term sustainability of school-based mental health services
-expand opportunities for reimbursement and service coordination
-strengthen alignment with county and state behavioral health systems
-maintain student and family access to therapeutic supports and mental health resources.

The district recognizes that this transition will require continued coordination, communication, and refinement to ensure continuity of care and smooth implementation for students, families, providers, and school staff.

Continued Community Specialist and Restorative Practice Supports

The district will continue offering community specialist supports at the middle and high school levels due to the positive impact these staff members have had on relationship-building, conflict resolution, student mentorship, attendance interventions, and school connectedness.

Reflection on prior implementation demonstrated that community specialists have become trusted supports for many students and families and play an important role in strengthening inclusive and restorative school environments.

Additionally, the district received supplemental local funding to support this action moving forward. As a result, LCFF Supplemental funds will no longer be utilized to fund community specialist positions, allowing the district greater flexibility in aligning supplemental funds to other targeted student support needs.

The district will also increase its financial contribution to North Bay Security Group to further strengthen restorative practices, student engagement efforts, conflict resolution supports, wellness checks, and campus safety systems. Reflection on prior implementation highlighted the positive impact of North Bay's relationship-centered and restorative approach in supporting student engagement and reducing escalation of behavioral concerns.

Refinement of Metrics and Outcomes

To better align with the expanded and revised Goal 2 actions, the district will continue refining metrics and outcome measures focused on:
-student attendance and chronic absenteeism
-school climate and student connectedness
-restorative practice implementation
-counseling and wellness service access
-behavioral intervention supports
-student discipline and suspension data
-mental health service coordination and referrals
-student engagement and intervention outcomes

Overall Reflection and Direction for the Coming Year

Reflections on Year 2 implementation affirmed the importance of maintaining integrated systems of counseling, wellness, behavioral, restorative, and mental health supports to ensure students feel safe, connected, and supported at school. The district's experiences demonstrated that relationship-centered approaches, early intervention systems, and coordinated student supports contribute positively to student well-being, engagement, and school climate.

The adjustments planned for the coming year reflect the district's commitment to strengthening sustainable systems of support while adapting to changing fiscal realities and evolving service delivery models. Through expanded behavioral supports, refined mental health partnerships, continued restorative practices, and increased coordination of student services, the district aims to further strengthen inclusive learning. environments that support the academic, behavioral, social-emotional, and mental health needs of all students.

A report of the Total Estimated Actual Expenditures for last year's actions may be found in the Annual Update Table. A report of the Estimated Actual Percentages of Improved Services for last year's actions may be found in the Contributing Actions Annual Update Table.

Actions

Action #	Title	Description	Total Funds	Contributing
2.1	Increase school counselors to provide additional academic and social emotional supports to unduplicated students.	School counselors provide academic and social-emotional support to students. In order to ensure unduplicated students have additional resources, NUSD maintains a significantly lower student to counselor ratio of 1:350 based on the state maximum student to counselor ratio of 1:622. In the 2026–2027 school year, all elementary and secondary counselors, Wellness Specialists, and Wellness Coaches will be funded through LCAP Supplemental funds to provide targeted social-emotional, behavioral, wellness, and mental health supports for unduplicated pupils, including low-income students, English Learners, foster youth, and other at-risk student groups. These positions support increased access to counseling services, early intervention, student engagement, attendance support, crisis response, and school connectedness to help remove barriers to learning and improve student outcomes.	$2,909,195.00	Yes
2.2	Continue to provide mental health supports to ensure student well-being and social-emotional competency development.	NUSD contracts the services of North Marin Community Services (NMCS) and Bay Area Community Resources (BACR) to provide mental health counselors to campuses. Students are served at the point of need, counseled during periods of crisis, and provided support to help them be successful in school. The school based counseling support ensures students have trusted adults on campus with whom to share challenges and concerns so that they may continue to progress academically and socially. NUSD will continue partnering with North Marin Community Services (NMCS) and Bay Area Community Resources (BACR) to provide school-based mental health counseling and wellness services for students. Beginning in the 2026–2027 school year, these community partners will transition to serving as affiliate providers through the California Youth Behavioral Health Initiative (CYBHI) multi-payer fee schedule model rather than through direct district contracts for services. Through this partnership model, students will continue to receive mental health counseling, crisis response, and social-emotional support services at the point of need to help address barriers to learning and improve student success. School-based counseling services ensure students have	$0.00	

Action #	Title	Description	Total Funds	Contributing
		access to trusted adults on campus with whom they can share concerns, receive support during periods of crisis, and remain connected and engaged academically, behaviorally, and socially.		
2.3	Partner with the North Bay Security Group to provide services to increase school safety, reduce chronic absenteeism and suspensions, and administer restorative practices.	The District contracts with North Bay Security to focus on truancy, wellness, mentoring, and conflict mediation/resolution, and additional supervision to support student well-being and school safety. The North Bay Security team trained staff serves as a liaison between school staff and families to decrease chronic absenteeism and student suspensions with a focus on meeting the needs of underserved student groups. During the year, North Bay Security personnel met directly with students and families to discuss attendance issues, attend school site (SART) and district level attendance meetings (SARB), and perform home visits to check on truant students.	$235,630.00	Yes
2.4	Contract with Project "The Turn" to provide additional supports to ensure students are making informed decisions related to attendance, peer conflict, and academic engagement.	The Turn offers students who have received disciplinary infractions and/or need additional support an opportunity to attend a program as a form of restorative practices in lieu of a suspension or extra guidance and care. Students learn meditation, mindfulness, self-care, and the importance of developing a growth mindset. Students are supported in making better choices and developing problem solving skills. The Turn helps students with attendance issues, peer conflict, and school avoidance to improve both academically and socially.	$60,000.00	Yes
2.5	Behavioral Health Coordinator	The Behavioral Health Coordinator will support unduplicated pupils and other at-risk students by strengthening proactive behavioral supports, de-escalation strategies, and Tier 1 intervention systems across school sites. This position will provide staff training, coaching, and direct support designed to help students remain engaged in classroom learning environments rather than being removed from instruction for minor behavioral infractions or emotional regulation challenges. By building staff capacity to implement relationship-centered, trauma-informed, and restorative practices, the Behavioral Health Coordinator will help create more inclusive learning environments that improve student	$240,207.00	Yes

		engagement, reduce exclusionary discipline practices, and increase access to instruction and support for students who may be disproportionately impacted by behavioral and social-emotional challenges.		

Goals and Actions

Goal

Goal #	Description	Type of Goal
3	NUSD will foster a culturally responsive climate and culture that enhances school connectedness and supports academic achievement. Through collaborative efforts with students, families, and community partners, NUSD will prioritize inclusivity, celebrate diversity, and ensure equitable opportunities for all students to thrive academically and socially.	Broad Goal

State Priorities addressed by this goal.

Priority 1: Basic (Conditions of Learning)
Priority 3: Parental Involvement (Engagement)
Priority 6: School Climate (Engagement)
Priority 8: Other Pupil Outcomes (Pupil Outcomes)

An explanation of why the LEA has developed this goal.

NUSD developed this goal through a collaborative effort with educational partners that focused upon positive school climate and culture. The design of this goal was to ensure students and families experience a sense of belonging and inclusion that empower them to be full participants in their educational experiences. The District has developed an equity imperative, and in order to address the beliefs and actions detailed in the imperative, the LCAP goals and actions need to be in alignment with the intent of the work.

Goal Analysis [2025-26]

An analysis of how this goal was carried out in the previous year.

A description of overall implementation, including any substantive differences in planned actions and actual implementation of these actions, and any relevant challenges and successes experienced with implementation.

During Year 2 of LCAP implementation, the district continued its commitment to fostering a culturally responsive, inclusive, and welcoming school climate that supports student connectedness, family engagement, and academic success. Implementation of Goal 3 remained strong

and consistent across school sites, with continued emphasis on building meaningful relationships with families, strengthening communication systems, and ensuring equitable access to school information and participation opportunities for all students and families.

Implementation Summary

The district continued implementation of key actions aligned to Goal 3 with a focus on family engagement, community partnerships, inclusive school environments, and culturally responsive practices.

Community Liaisons at School Sites
-Community liaisons continued to serve as highly valuable and integral members of school communities across the district.
-Liaisons supported communication between schools and families, assisted with outreach and engagement efforts, connected families with resources and services, and helped ensure families felt welcomed and supported within school communities.
-Community liaisons played a particularly important role in supporting multilingual families and English Learner families by helping bridge communication gaps and strengthening trust and relationships between schools and families.
Translation and Interpretation Services
-The district continued providing translation and interpretation services to ensure families who speak languages other than English were able to access school information, participate in meetings and events, and engage meaningfully in school decision-making processes.
-These services remained essential in promoting equitable access and inclusive family engagement practices across the district.
Positive Behavioral Interventions and Supports (PBIS)
-School sites continued implementing PBIS frameworks focused on establishing proactive behavioral expectations, reinforcing positive student behavior, and creating safe and supportive learning environments.
-Sites continued refining Tier 1 and Tier 2 behavioral supports and strengthening staff alignment around positive and restorative approaches to student behavior and school climate.

Substantive Differences and Adjustments

Implementation during Year 2 largely remained aligned to planned actions, with no significant substantive changes to the overall goal or major actions.

-School sites continued refining family engagement practices based on community feedback and site-specific needs.
-Community liaisons frequently expanded their support beyond traditional outreach roles by assisting with family workshops, event coordination, individualized family support, translation assistance, and community resource connections.
-Sites continued working toward greater consistency in PBIS implementation and alignment of behavioral support systems across schools.

Challenges and Successes

The district experienced several important successes during Year 2 implementation:
-School climate and family engagement survey data indicated that students, staff, and families generally perceive school sites as welcoming, inclusive, and supportive environments.

-Family and community involvement remained strong across school sites, with high levels of participation in school events, meetings, and engagement opportunities.
-Community liaisons continued to be an essential support for students, families, and staff and played a particularly significant role in supporting English Learner families and strengthening communication and trust between schools and the broader community.
-The district continued fostering a collaborative and supportive culture among staff, families, and community partners that contributed positively to school connectedness and student support systems.

The district also recognized several ongoing challenges:
-Continued attention is needed to ensure consistency in PBIS implementation and behavioral support practices across all sites and staff groups.
-Community liaison responsibilities continue to be extensive, requiring ongoing coordination, communication, and support to maintain effectiveness and responsiveness to family needs.
-As student and family needs continue to evolve, the district recognizes the importance of sustaining meaningful family engagement opportunities and culturally responsive practices across all schools.

Overall Reflection

Year 2 implementation reflected the district's continued commitment to creating welcoming, inclusive, and culturally responsive school communities where students and families feel valued, connected, and supported. The district's investment in community liaisons, translation services, and relationship-centered practices continued to strengthen trust and engagement between schools and families, particularly for multilingual and historically underserved communities.

While much of the work under Goal 3 focused on maintaining and deepening systems established during Year 1, the district believes these efforts continue to positively contribute to school connectedness, inclusive school culture, and stronger partnerships with families and the community.

An explanation of material differences between Budgeted Expenditures and Estimated Actual Expenditures and/or Planned Percentages of Improved Services and Estimated Actual Percentages of Improved Services.

There were no material differences between budgeted expenditures and estimated actual expenditures and/or planned percentages of improved services and estimated actual percentages of improved services. In the 2025-2026 Mid-Year LCAP update, the district included an $126,488,82700 expenditure detailing the remaining NUSD budget for Action 3.1.

A description of the effectiveness or ineffectiveness of the specific actions to date in making progress toward the goal.

The actions implemented under Goal 3 have continued to be highly effective in strengthening culturally responsive practices, increasing family engagement, and fostering welcoming and inclusive school environments where students and families feel connected and supported. Throughout Year 2, the district's continued investment in community liaisons, translation and interpretation services, and Positive Behavioral Interventions and Supports (PBIS) contributed positively to school climate, communication systems, and partnerships between schools and families.

Effectiveness of Actions

Community liaisons continued to be one of the most impactful components of Goal 3 implementation. Across all school sites, community liaisons played an essential role in building strong relationships with families, increasing communication between schools and home, and ensuring families had access to school resources, information, and engagement opportunities. Their work was particularly impactful for English Learner families and multilingual communities, where liaisons helped bridge language and cultural barriers and foster greater trust and participation in school activities and decision-making processes.

Family engagement efforts remained strong throughout Year 2, with schools reporting high levels of participation in family events, conferences, workshops, and advisory meetings. Community liaisons frequently went beyond their formal responsibilities to provide individualized support for families, assist with translation needs, coordinate outreach efforts, and connect families with community resources and services. Their work continues to be integral to the district's efforts to create inclusive and supportive school communities.

Translation and interpretation services also remained highly effective in promoting equitable access and meaningful participation for families who speak languages other than English. By providing multilingual communication and interpretation support during meetings, events, and conferences, the district helped ensure families could fully engage in their child's educational experience and access important information and supports.

The continued implementation of PBIS frameworks across school sites also positively contributed to school climate and student support systems. Schools continued refining behavioral expectations, reinforcing positive student behavior, and strengthening proactive and restorative approaches to behavior support. While implementation continues to vary somewhat across sites, schools increasingly demonstrated stronger alignment around relationship-centered practices and positive behavior supports designed to improve school connectedness and student success.

School climate and engagement survey data suggest that students, staff, and families generally perceive NUSD schools as welcoming, supportive, and inclusive environments. These results reflect the district's ongoing commitment to building positive school cultures where students and families feel valued, respected, and connected to their school communities.

Additionally, the district continued prioritizing meaningful parent participation through advisory groups such as the District English Learner Advisory Committee (DELAC), the Special Education Advisory Committee (SEAC), and other parent engagement opportunities. These groups provided important input and feedback regarding district programs, services, and student needs while helping strengthen partnerships between families and schools.

At the same time, the district recognizes that continued growth and refinement are necessary. Maintaining consistent implementation of PBIS practices across all sites remains an ongoing area of focus. Additionally, the extensive responsibilities carried by community liaisons require continued coordination, communication, and support to ensure sustainability and responsiveness to evolving family needs.

Overall, the district believes the actions implemented under Goal 3 have been highly effective in strengthening school connectedness, fostering inclusive and culturally responsive environments, and increasing meaningful family engagement. The district's continued focus on

relationship-building, communication, and equitable access has contributed positively to school climate and strengthened partnerships that support student success academically, socially, and emotionally.

A description of any changes made to the planned goal, metrics, target outcomes, or actions for the coming year that resulted from reflections on prior practice.

Reflections on Year 2 implementation affirmed that the district's actions under Goal 3 continue to positively support culturally responsive school environments, strong family engagement, and increased school connectedness for students and families. Survey feedback, participation data, and site-level reflections demonstrated that community partnerships, multilingual communication systems, and inclusive engagement practices remain highly valued and impactful across the district. As a result, the district will continue the core actions associated with this goal while making targeted refinements to strengthen implementation and support evolving student and family needs.

Continued Family Engagement and Community Partnership Supports

The district will continue prioritizing community liaisons, translation and interpretation services, and culturally responsive outreach practices as foundational components of Goal 3. Reflections on prior implementation confirmed that these supports continue to play a critical role in strengthening trust, communication, and relationships between schools and families, particularly for multilingual families and historically underserved student groups.

Community liaisons will continue supporting:
-family engagement and outreach efforts
-connections to community resources and services
-translation and communication support
-family workshops and engagement opportunities
-school-home relationship building across all school sites

Translation and interpretation services will also continue to be prioritized to ensure equitable access to school information, meetings, events, and decision-making opportunities for families who speak languages other than English.

Additional Support for ELPAC Testing and Multilingual Families

Based on reflections regarding the increasing complexity and demands associated with English Learner assessment administration and multilingual family support, the district will allocate additional funding to support ELPAC testing through the use of additional ELPAC testers during designated assessment windows.

This adjustment is intended to:
-improve testing efficiency and scheduling;
-reduce disruptions to instructional time;
-support timely completion of required assessments;
-strengthen assessment coordination for multilingual learners; and

-ensure continued compliance with state English Learner assessment requirements.

The district recognizes that timely and effective ELPAC administration is essential not only for compliance purposes, but also for ensuring English Learners receive appropriate instructional supports, services, and placement decisions.

Continued PBIS and Inclusive School Climate Efforts

The district will continue supporting PBIS implementation and relationship-centered school climate practices across school sites. While districtwide grant-funded PBIS coaching remains unavailable, schools will continue refining site-based behavioral support systems focused on proactive expectations, restorative approaches, and inclusive learning environments.

The district will continue encouraging:
-site-level collaboration and leadership around PBIS implementation
-consistent behavioral expectations and restorative practices
-positive student engagement strategies
-school climate efforts focused on belonging, inclusion, and relationship-building

Refinement of Metrics and Monitoring Practices

The district will maintain key metrics associated with family engagement, school climate, student connectedness, and inclusive practices while continuing to strengthen site-level monitoring systems. Metrics and progress monitoring tools will continue to include:
-family participation and engagement data
-school climate and connectedness survey results
-documentation of outreach efforts to multilingual families
-PBIS implementation reflections and site-based supports
-participation data related to family workshops, advisory committees, and engagement opportunities

The district will also continue prioritizing meaningful parental participation through advisory groups such as DELAC, SEAC, and other family engagement structures to ensure families remain actively involved in district planning, decision-making, and continuous improvement efforts.

Overall Reflection and Direction for the Coming Year

Reflections on Year 2 implementation reaffirmed the importance of maintaining strong relationships with students, families, and the broader community as essential components of student success and school connectedness. The district’s continued investment in community liaisons, multilingual communication systems, inclusive engagement practices, and culturally responsive outreach has contributed positively to welcoming school environments where families feel valued, informed, and connected.

The refinements planned for the coming year are intended to strengthen sustainability, improve support for multilingual learners and families, and continue building inclusive school communities that support the academic and social-emotional success of all students.

A report of the Total Estimated Actual Expenditures for last year's actions may be found in the Annual Update Table. A report of the Estimated Actual Percentages of Improved Services for last year's actions may be found in the Contributing Actions Annual Update Table.

Actions

Action #	Title	Description	Total Funds	Contributing
3.1	To address the Dashboard Local Indicator of the Basic Conditions of Learning, the District will maintain the necessary resources for student instruction including textbooks, appropriately credentialed teachers and well-maintained facilities.	In order to have students and families engaged in partnership with NUSD, the District will maintain sufficient board adopted instructional materials, safe and clean facilities in good standing, appropriately credentialed and assigned teachers, transportation for eligible students through their Individualized Education Plans (IEPs), and other conditions necessary to support the effective implementation of actions across all LCAP goals.	$126,488,827.00	No
3.2	Provide Community Liaisons to support unduplicated families to ensure school connectedness and engagement.	The District supports Community Liaisons at all sites to assist schools with family outreach, the coordination of programs and services, and communication with outside agencies and resources. The Community Liaisons work with staff to provide Spanish language support and communication to students and parents. The liaisons partner with the attendance teams to improve student attendance including phone, email, written communication, or home visits as appropriate in alignment with district procedures. The liaisons support English Language Advisory Committee meetings to ensure compliance with state and federal regulations. The liaisons assist with translation both written and during necessary family meetings.	$1,029,170.00	Yes
3.3	Provide translation services to support communication and engagement with non or limited English speaking families.	To ensure meaningful communication with non or limited English-speaking families, translation and interpretation services are available at all NUSD schools and the District. In addition to the Community Liaisons, the District utilizes other services to support family engagement including: access to the NUSD website so that it may be viewed in a multitude of languages, interpretation by NUSD personnel and service contractors at public meetings, school events, in-person conferences, and phone calls, and the	$45,391.00	Yes

Action #	Title	Description	Total Funds	Contributing
		contracted multi-lingual services of Language Line on demand over the phone or virtual services for interpretation.		
3.4	Continue with the Positive Behavioral Intervention and Support (PBIS) implementation and trainings to reinforce behavioral expectations to improve social emotional competence, academic success, and school climate.	The District will continue with the implementation of Positive Behavioral Interventions and Supports (PBIS) to support students' behavioral, academic, social, emotional, and mental health by setting clear expectations, guidelines, and incentives for appropriate school behavior. PBIS improves social emotional competence, academic success, and school climate.	$0.00	No
3.5	Additional ELPAC testing support will be provided to ensure timely assessment administration, minimize instructional disruptions, and support accurate monitoring of English Learner progress.	Additional staffing will be provided during ELPAC testing windows to ensure timely and efficient administration of the English Language Proficiency Assessments for California (ELPAC). This support will minimize disruptions to classroom instruction, ensure compliance with state assessment requirements, and allow for accurate identification and monitoring of English Learners' language development needs. The use of trained ELPAC testers will increase assessment capacity while allowing instructional staff to remain focused on providing high-quality instruction and support for multilingual learners.	$85,141.00	Yes

Goals and Actions

Goal

Goal #	Description	Type of Goal
4	To better serve the students at Marin Oaks High School and ensure all students earn a high school diploma, two staff members will be hired including a Teacher on Special Assignment and a Wellness Hub Navigator to support students both academically and socially-emotionally.	Equity Multiplier Focus Goal

State Priorities addressed by this goal.

Priority 2: State Standards (Conditions of Learning)
Priority 4: Pupil Achievement (Pupil Outcomes)
Priority 5: Pupil Engagement (Engagement)
Priority 6: School Climate (Engagement)

An explanation of why the LEA has developed this goal.

As a result of being awarded the Equity Multiplier funding for Marin Oaks, the District must create a focus goal specific to the funding allotment. The goal has been developed with educational partner input and is the direct result of a needs assessment based on site feedback.

The Marin Oaks expulsion rate will remain at 0% annually.	The suspension rate Increased by 16.5%
4.3	Chronic Absenteeism Rate	2023-2024 Chronic Absenteeism Rate: 25.6%	2024-2025 Chronic Absenteeism Rate: 35.5% (As of 5/30/25 - DataMatters)	2025-2026 Chronic Absenteeism Rate: 33.3% (As of 5/25/26 - DataMatters)	The Marin Oaks will decrease the Chronic Absenteeism Rate by 5% annually.	The chronic absenteeism rate increased by 7.7%

Goal Analysis [2025-26]

An analysis of how this goal was carried out in the previous year.

A description of overall implementation, including any substantive differences in planned actions and actual implementation of these actions, and any relevant challenges and successes experienced with implementation.

During Year 2 of LCAP implementation, the district continued its focused efforts to support students at Marin Oaks High School through integrated academic, behavioral, and wellness supports designed to increase student engagement, improve attendance, address barriers to learning, and support students in earning a high school diploma. Given the unique needs of the alternative education population, the district maintained a strong emphasis on relationship-building, individualized student support, mental health services, and coordinated intervention systems.

Implementation Summary

The district continued implementation of the two primary positions established under Goal 4: the Teacher on Special Assignment (TOSA) and the Wellness Hub Navigator. Both positions remained central to the district's efforts to provide comprehensive wraparound support for Marin Oaks students and to strengthen systems designed to improve student outcomes and graduation pathways.

1. Teacher on Special Assignment (TOSA)

-The TOSA continued supporting students through academic planning, credit monitoring, intervention coordination, and individualized student support.
-The TOSA worked closely with students, teachers, counselors, and administration to monitor graduation progress, identify barriers to success, and develop intervention plans for students at risk of falling behind academically.
-The position continued evolving beyond its original scope to include leadership in alternative education instructional planning, staff collaboration, and trauma-informed support practices designed to meet the unique needs of Marin Oaks students.
-The TOSA developed strong relationships with students and became a key support in helping students remain engaged, connected, and on track toward graduation.

2. Wellness Hub Navigator

-The Wellness Hub Navigator continued serving as a critical support for students experiencing challenges related to mental health, attendance, basic needs, and school engagement.
-The Navigator coordinated wellness checks, connected students and families with community resources and mental health services, supported attendance interventions, and collaborated closely with school staff and outside providers.
-The position remained especially impactful in supporting students experiencing significant emotional and social challenges following traumatic events that affected the school community prior to the beginning of the school year.

Substantive Differences and Adjustments

Implementation of Goal 4 largely remained aligned with planned actions during Year 2. However, the district continued refining support structures based on the significant and evolving needs of Marin Oaks students.

-The TOSA role continued expanding to include greater leadership responsibilities related to trauma-informed practices, staff collaboration, and alternative education instructional supports.
-For the 2025–26 school year, the district utilized supplemental LCAP funds to sustain the Teacher on Special Assignment (TOSA) position due to the critical academic intervention, graduation support, and student engagement services provided through this role.
-The Equity Multiplier allocation continued supporting intensive student wellness and wraparound intervention efforts at Marin Oaks High School, recognizing the significant social-emotional, mental health, and academic needs of the student population.
-The district continued strengthening coordination among the Wellness Hub Navigator, school counselors, mental health clinicians, BACR staff, and community partners to ensure students received comprehensive wraparound supports.

Challenges Experienced

Year 2 presented significant challenges for the Marin Oaks community. Students and staff were deeply impacted by traumatic events that occurred during the summer prior to the start of the school year. The emotional impact of these events created heightened mental health and wellness needs among students throughout the year and required intensive, ongoing support from school staff and community partners.

Additional challenges included:
-high levels of student mental health needs;
-chronic absenteeism and disengagement among some students;
-the complex social-emotional and academic needs associated with alternative education settings; and
-the continued need for coordinated wraparound services and individualized interventions for high-need students.

Successes Experienced

Despite these challenges, the district experienced several important successes during implementation:
-The Wellness Hub Navigator helped create a strong safety net for students through close collaboration with mental health clinicians, BACR staff, community partners, counselors, and school staff.
-Regular collaborative meetings among support staff helped ensure students received coordinated academic, physical, mental health, and social-emotional supports.
-The establishment and continued implementation of the Wellness Cart provided students with access to basic health and hygiene items that supported student wellness and dignity.
-Students with regular contact and support from the Wellness Hub Navigator demonstrated improved engagement, increased connection to school, and stronger attendance patterns.
-The TOSA developed meaningful and trusting relationships with students while providing consistent academic monitoring, graduation tracking, intervention coordination, and support planning.
-The district’s relationship-centered and trauma-informed approach helped maintain a supportive and caring school environment during an exceptionally difficult year for the Marin Oaks community.

Overall Reflection

Year 2 implementation reflected the district's continued commitment to supporting the unique needs of Marin Oaks students through comprehensive academic, wellness, and wraparound support systems. Although the year was marked by significant emotional challenges and increased mental health needs, the district successfully maintained critical systems of support that helped students remain connected to school and continue progressing toward graduation.

The district recognizes that Marin Oaks students often require highly individualized, relationship-centered, and trauma-informed interventions to address barriers to academic success. The continued collaboration among school staff, mental health providers, and community partners has strengthened the school's ability to support students holistically and remains essential to ongoing implementation efforts.

An explanation of material differences between Budgeted Expenditures and Estimated Actual Expenditures and/or Planned Percentages of Improved Services and Estimated Actual Percentages of Improved Services.

The material difference between budgeted expenditures and estimated actual expenditures and/or planned percentages of improved services and estimated actual percentages of improved services was $10,000 for the Wellness Hub Navigator salary and benefits. The district received a SWAP/Student Wellness Ambassador Program grant which reduced the funding allocation.

A description of the effectiveness or ineffectiveness of the specific actions to date in making progress toward the goal.

The actions taken have been effective in making progress toward the goal of increasing student support and diploma completion at Marin Oaks.

Effectiveness Highlights:
-The TOSA effectively guided students through individual academic recovery plans, increasing credit accrual for students behind in graduation requirements.
-The Wellness Hub Navigator has become a trusted adult and advocate, successfully reducing barriers to learning and connecting students to timely mental health and wellness supports.
-The collaborative partnership between the two roles contributed to a whole-child approach, helping students stay connected to school and supported academically and emotionally.

Impact Metrics (qualitative and early indicators):
-Reduced instances of student withdrawal or prolonged absenteeism
-Increased referrals to counseling, food assistance, and housing support
-Improved staff collaboration around student re-engagement and case management

A description of any changes made to the planned goal, metrics, target outcomes, or actions for the coming year that resulted from reflections on prior practice.

Reflections on Year 2 implementation affirmed the value of the integrated academic and wellness support model at Marin Oaks High School. The collaborative efforts of the Teacher on Special Assignment (TOSA), Wellness Hub Navigator, school counselor, mental health providers,

and community partners strengthened the school's ability to address both academic and social-emotional barriers to student success. The district observed that students benefited from strong relationships with trusted adults, coordinated interventions, and wraparound supports that helped students remain engaged in school and progress toward graduation.

While the overall goal remains unchanged and continues to focus on supporting student engagement, wellness, and graduation outcomes for alternative education students, significant fiscal challenges required the district to redesign the actions supporting this goal for the coming year. Due to ongoing budget constraints and the need to maximize available resources, the district will discontinue the Teacher on Special Assignment and Wellness Hub Navigator positions.

To ensure that Marin Oaks students continue to receive intensive support services, the district will instead contract directly with North Marin Community Services (NMCS) to provide therapeutic support, case management, wellness services, and wraparound interventions specifically designed to meet the needs of Marin Oaks students. This action reflects the district's recognition that students enrolled at Marin Oaks often experience significant social-emotional, behavioral, attendance, and mental health challenges that require comprehensive and coordinated support.

While the district is transitioning most school-based mental health services to the California Youth Behavioral Health Initiative (CYBHI) affiliate provider and multi-payer fee schedule model, Marin Oaks represents a unique student population with elevated needs. As a result, North Marin Community Services will remain the district's only directly contracted community-based mental health provider in order to ensure consistent, responsive, and intensive services for the district's most vulnerable students.

The district will continue monitoring the effectiveness of these supports through refined metrics, including:

Graduation rates and diploma completion data;
Attendance and chronic absenteeism rates;
Student engagement and school connectedness survey results;
Number of students receiving therapeutic and wraparound support services;
Wellness referral data and service utilization rates; and
Semester reviews of D/F lists, credit deficiencies, and credit recovery progress.

The district believes this revised approach preserves the core intent of Goal 4 while creating a more sustainable model for delivering comprehensive support services to Marin Oaks students. By leveraging the expertise of North Marin Community Services, the district aims to continue addressing barriers to learning, strengthening student engagement, and supporting successful pathways to graduation for students with the greatest needs.

A report of the Total Estimated Actual Expenditures for last year’s actions may be found in the Annual Update Table. A report of the Estimated Actual Percentages of Improved Services for last year’s actions may be found in the Contributing Actions Annual Update Table.

Actions

Action #	Title	Description	Total Funds	Contributing
4.1	Provide a Teacher on Special Assignment to support students at Marin Oaks to ensure students are maintaining progress toward earning a high school diploma.	The Teacher on Special Assignment will serve as a liaison between the school and families to support students while ensuring adequate progress towards earning a high school diploma and providing the necessary scaffolding and interventions to keep students at expected target levels.		No
4.2	Provide a Wellness Hub Navigator to supports Marin Oaks students with mental health and social-emotional competence.	The Marin Oaks Wellness Hub Navigator will support student mental health and well-being and serving as an advocate to collaborate with site administration and staff to address student need.	$0.00	No
4.3	Partner with North Marin Community Services to provide direct counseling services and supports	North Marin Community Services will provide direct therapeutic counseling, case management, and wraparound support services for Marin Oaks students. This action is essential because many Marin Oaks students face significant social-emotional, mental health, attendance, and life challenges that create barriers to academic success and graduation. Direct access to counseling and coordinated support services helps students remain connected to school, access needed resources, build resilience, and successfully progress toward earning a high school diploma.	$70,000.00	No

Increased or Improved Services for Foster Youth, English Learners, and Low-Income Students [2026-27]

Required Descriptions

LEA-wide and Schoolwide Actions

For each action being provided to an entire LEA or school, provide an explanation of (1) the unique identified need(s) of the unduplicated student group(s) for whom the action is principally directed, (2) how the action is designed to address the identified need(s) and why it is being provided on an LEA or schoolwide basis, and (3) the metric(s) used to measure the effectiveness of the action in improving outcomes for the unduplicated student group(s).

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
1.1	**Action:** Maintain Teachers on Special Assignment to ensure equitable outcomes for students through monitoring, intervention, and evaluation. **Need:** Unduplicated students and certain identified student subgroups are not performing at grade level based upon state and local testing metrics. The District has been identified for	The Teachers on Special Assignment will address the need to improve student academic outcomes by supporting teachers with frequent and ongoing data cycles. The Teachers on Special Assignment will coach staff develop an understanding of data literacy, targeted interventions, and monitoring. As research has demonstrated, the Teachers on Special Assignment (TOSAs), while serving all students, will have the greatest academic impact on unduplicated pupils. With targeted	*Increased number of data cycles *Improved state and local assessment data *Increased number/rate of reclassification for English Language Learners *Fewer D/F grades and students requiring credit recovery courses

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	Differentiated Assistance because of student academic performance. **Scope:**	interventions and supports, the Teachers on Special Assignment will support staff in creating action plans, coaching staff, and providing direct interventions to unduplicated pupils.	*Increased number/rate of students completing the A-G requirements
1.4	**Action:** Maintain AVID contract and sections to support first generation and underrepresented students in accessing and completing the A-G requirements. **Need:** All high school AVID courses are A - G approved which supports students to meet A-G eligibility requirements upon graduation. NUSD's AVID program has measurable success, and data shows that the program is effectively closing the achievement gap for AVID elective students. NUSD AVID instructors are trained to use AVID strategies and attend ongoing professional development to enhance instructional skills. NUSD provides each secondary school with class sections to support AVID program and unduplicated students. The percentage of unduplicated pupils meeting the A-G requirements and the percentage of unduplicated students enrolled in advanced courses is not equitable among all students. Unduplicated students are not meeting the A-G eligibility requirements at the same rates as non-unduplicated students and other subgroups.	NUSD provides AVID sections as a research-based, nationally recognized best practice to support students in developing executive functioning, organizational, and study skills that are critical for success in rigorous coursework. While all eligible students may participate in AVID, the program has been intentionally maintained and expanded over time because it has proven to be especially effective in improving academic performance and A–G eligibility rates for unduplicated students. By providing structured support, mentoring, and strategies for college readiness, AVID helps close opportunity gaps and ensures that more unduplicated students are prepared to graduate college- and career-ready.	A-G eligibility rates, College and Career Readiness Indicator, state and local testing data

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	Scope: Schoolwide		
1.7	**Action:** Provide credit recovery options, staffing, and summer school for high school students through an online platform. **Need:** Unduplicated students in our district consistently meet A–G eligibility requirements at lower rates than their peers, due in part to credit deficiencies and limited access to recovery opportunities during the regular school year. This directly impacts graduation rates and postsecondary options. We have selected summer school and credit recovery as a targeted action because our experience has shown that when unduplicated students are provided with structured opportunities to make up credits, their rates of graduation and A–G completion improve significantly. This is an area of major concern for the district, as early course failures often compound and limit future opportunities. By investing supplemental dollars in summer school, we are intentionally directing resources to our highest-need students, addressing opportunity gaps, and focusing energy on an intervention that has proven to yield results in both immediate credit recovery and long-term student success. **Scope:**	Credit recovery and summer school provide students—particularly unduplicated students—with the opportunity to recover credits, maintain A–G eligibility, and stay on track for graduation. Research and district experience confirm that summer school is one of the most effective means of improving graduation outcomes, reducing dropout risk, and increasing college and career readiness. While all students may access these opportunities, the program is especially critical for English Learners, students with disabilities, and other underserved groups who disproportionately face credit deficiencies. This action does not stand alone but works in coordination with other intervention strategies, including the implementation of IXL as a diagnostic and progress-monitoring tool to target student needs. Together, these actions form a systemic, districtwide approach designed to provide a safety net of supports for our most at-risk students, ensuring equity, access, and improved long-term outcomes. As a result, we anticipate improved graduation rates, higher A–G completion, and more students graduating college- and career-ready.	The percentage of students earning A-G eligibility and graduation rates for unduplicated pupils.

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	Schoolwide		
1.8	**Action:** Provide a districtwide College and Career Specialist to support Novato High School, San Marin High School, and consult with Hill Education counseling staff. **Need:** Unduplicated students in our district graduate at lower rates and achieve A–G eligibility at significantly lower percentages compared to their peers. This limits their access to CSU/UC admission and reduces long-term postsecondary opportunities. To address this persistent gap, the district has established a College and Career Counselor position to provide targeted guidance, resources, and supports for unduplicated students. We selected this action because, over time, we have observed that direct, individualized college and career counseling is one of the most effective strategies for improving A–G completion, supporting financial aid application completion, and increasing postsecondary enrollment. By centralizing information and providing intentional outreach, the College and Career Counselor ensures that unduplicated students receive the access and support necessary to graduate ready for college and career success. **Scope:** Schoolwide	The establishment of a districtwide College and Career Specialist will centralize critical information and resources, ensuring that unduplicated high school students have equitable access to college and career guidance. This position will provide targeted strategies to support postsecondary readiness and success. As a result of this action, we anticipate increased FAFSA/CADAA completion rates, higher rates of A–G completion, and improved postsecondary enrollment. Progress will be measured through metrics such as graduation rates, college and career indicator data, and financial aid application completion.	Percentage of unduplicated students earning A-G eligibility and graduation rates of unduplicated percentage of students.

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
2.1	**Action:** Increase school counselors to provide additional academic and social emotional supports to unduplicated students. **Need:** Unduplicated students are not experiencing similar rates of A-G completion and school connectedness as their peers. The additional school counseling staff will support unduplicated students in a variety of ways including a greater focus on A-G completion, additional adult contact to foster student well-being and social emotional health, and additional adult support on campus to increase the number of trusted adults with whom students may develop positive relationships. **Scope:** Schoolwide	The addition of school counselors will strengthen student progress monitoring, build positive relationships between staff, students, and families, and improve communication. This action is principally directed to unduplicated students who are experiencing higher rates of chronic absenteeism, school avoidance, and social conflict. By addressing social-emotional needs early, students will benefit from timely interventions that support school engagement and long-term academic success, with the ultimate goal of positively impacting A–G readiness in later grades. This action will be measured over time through chronic absenteeism rates, attendance data, survey results, and other indicators of student engagement. Based on our experience, we know that unresolved social issues often persist and can significantly affect student success and future progress, making early intervention critical.	A-G completion rates, increased percentages of students responding positively on the Youth Truth surveys regarding belonging and adult support, decreases in chronic absenteeism.
2.2	**Action:** Continue to provide mental health supports to ensure student well-being and social-emotional competency development. **Need:** Unduplicated students are not meeting A-G completion rates at the same level as their peers, and student discipline data for unduplicated students is higher than their peers. There has been an increase in students struggling with peer relationships, anxiety, and social conflict.	The addition of mental health counseling supports will provide students with greater opportunities to process personal and social-emotional concerns, helping them remain engaged and successful in school. This action is particularly important for unduplicated students who may face higher barriers to accessing outside mental health services. By offering timely, school-based support, we anticipate improvements in student well-being, increased attendance, reduced behavioral incidents, and stronger academic outcomes. The effectiveness of this action will be measured through chronic absenteeism rates,	Decreased discipline rates for unduplicated students and increased student response rates for unduplicated students reporting they have a supportive adult on campus on the Youth Truth survey, decreases in chronic absenteeism.

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	Scope:	suspension/discipline data, student and family survey results, and overall academic performance. If successful, these supports will contribute to greater student engagement, stronger connections to school, and improved readiness for long-term success.	
2.3	**Action:** Partner with the North Bay Security Group to provide services to increase school safety, reduce chronic absenteeism and suspensions, and administer restorative practices. **Need:** Our district partners with North Bay Security Group to address the pressing need for increased campus supervision and positive student engagement, particularly for unduplicated students who experience higher rates of chronic absenteeism, school avoidance, and disciplinary incidents. These students often require additional adult support and conflict mediation to feel safe, connected, and engaged in school. North Bay Security staff provide a consistent and visible adult presence, building relationships with students and families while helping de-escalate conflicts before they become disciplinary matters. This proactive support reduces negative behaviors, strengthens school connectedness, and creates safer learning environments, ensuring that our highest-need students have equitable access to the conditions necessary for academic and social success. **Scope:**	Partnering with North Bay Security Services increases adult presence and supervision on campuses, creating more opportunities for positive engagement and conflict mediation. This partnership helps build stronger relationships with students and families while reducing disciplinary incidents. While all students benefit from these services, they are principally directed toward unduplicated students who experience higher rates of chronic absenteeism and discipline. By providing additional adult support, we anticipate decreased suspension rates, improved attendance, and stronger school connectedness. The effectiveness of this action will be measured through chronic absenteeism and discipline data, as well as student, staff, and family survey results. Based on our observations, this partnership has proven invaluable in fostering safer, more supportive school environments that directly contribute to improved student engagement and long-term success.	Decreased discipline rates for unduplicated students and decreased rates of chronic absenteeism for unduplicated students.

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	LEA-wide		
2.4	**Action:** Contract with Project "The Turn" to provide additional supports to ensure students are making informed decisions related to attendance, peer conflict, and academic engagement. **Need:** Unduplicated students in our district experience disproportionately higher rates of chronic absenteeism and discipline. While services and supports are available to all students, we have intentionally prioritized partnerships and interventions for unduplicated youth because they represent our highest-need population. These students often face significant barriers that impact school engagement, attendance, and behavior. By directing resources such as counseling, mentoring, and community partnerships toward them, we aim to reduce absenteeism, improve behavior, and increase long-term academic success, while still maintaining access for all students. **Scope:** LEA-wide	The partnership with The Turn provides unduplicated students with access to Community Specialists who work directly with youth to build problem-solving skills, strengthen decision-making, and foster positive connections to school. The Turn's model offers culturally responsive mentoring and guidance, which has been shown to reduce school avoidance and help students re-engage academically. This support is particularly valuable for students who face barriers outside of school and benefit from consistent, trusted adult relationships. As a result, we anticipate improved attendance, stronger academic performance, and a reduction in discipline incidents for unduplicated students. The effectiveness of this partnership will be measured through chronic absenteeism rates, academic progress indicators, discipline data, and student survey responses. The rationale for partnering with The Turn is grounded in their expertise and success in providing targeted support through Community Specialists, who serve as positive role models and connect families and schools in meaningful ways.	Decreased discipline and chronic absenteeism rates for unduplicated students and increased academic performance on state and local testing data for unduplicated students.
2.5	**Action:** Behavioral Health Coordinator **Need:**	The Behavioral Health Coordinator will provide training, coaching, and direct support to staff focused on Tier 1 behavioral interventions, restorative practices, de-escalation strategies, and inclusive classroom supports designed to reduce	Suspension and discipline referral rates Chronic absenteeism rates Student engagement and school climate survey data

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	Unduplicated pupils, including English Learners, low-income students, foster youth, and other at-risk student groups, often experience higher rates of behavioral referrals, exclusionary discipline, disengagement from instruction, and unmet social-emotional needs that impact academic success and school connectedness. Staff identified a need for increased proactive behavioral supports, trauma-informed practices, and consistent de-escalation strategies to ensure students remain engaged in learning environments and have equitable access to instruction and support services. **Scope:** LEA-wide	unnecessary classroom removals and exclusionary discipline practices. This action supports unduplicated pupils by increasing staff capacity to respond proactively to behavioral and social-emotional challenges while helping students remain engaged in instruction and connected to school. This action is provided on an LEA-wide basis because behavioral and social-emotional needs exist across all school sites, and unduplicated pupils are enrolled throughout the district. The district expects that the improved behavioral support systems, trauma-informed practices, and increased staff capacity resulting from this action will principally benefit unduplicated pupils by improving access to instruction, increasing school connectedness, and reducing barriers to academic success.	Classroom removal and behavioral incident data PBIS and restorative practice implementation data Staff participation in behavioral support and de-escalation trainings Student attendance and connectedness indicators
3.5	**Action:** Additional ELPAC testing support will be provided to ensure timely assessment administration, minimize instructional disruptions, and support accurate monitoring of English Learner progress. **Need:** English Learners require timely and accurate assessment of their English language proficiency to ensure appropriate instructional placement, targeted language supports, and progress monitoring. The district identified a need to increase assessment capacity to support efficient ELPAC administration while minimizing disruptions to instructional time.	Additional ELPAC testing support will increase the district's capacity to administer state-required English language proficiency assessments efficiently and accurately. This action supports English Learners by ensuring timely identification of language development needs, monitoring progress toward English proficiency, and informing instructional decisions and support services. The action is provided on an LEA-wide basis because English Learners are enrolled across multiple school sites and all eligible students must participate in ELPAC assessments.	ELPAC assessment completion rates Timeliness of ELPAC administration English Learner progress toward English proficiency English Learner reclassification rates Reduction in instructional time lost due to assessment administration English Learner academic achievement and growth data

Goal and Action #	Identified Need(s)	How the Action(s) Address Need(s) and Why it is Provided on an LEA-wide or Schoolwide Basis	Metric(s) to Monitor Effectiveness
	Scope: LEA-wide		

Limited Actions

For each action being solely provided to one or more unduplicated student group(s), provide an explanation of (1) the unique identified need(s) of the unduplicated student group(s) being served, (2) how the action is designed to address the identified need(s), and (3) how the effectiveness of the action in improving outcomes for the unduplicated student group(s) will be measured.

Goal and Action #	Identified Need(s)	How the Action(s) are Designed to Address Need(s)	Metric(s) to Monitor Effectiveness
1.2	**Action:** Maintain English Learner Specialists to support English language development and instruction for English Language Learners. **Need:** NUSD has a number of unduplicated students who have not completed the A-G requirements. There is a concern with the number of students who have not been redesignated therefore increasing the number of English Learners who are categorized as Long Term English Language Learners (LTELs) or At Risk of Becoming Long Term English Language Learners (ARLTELs) **Scope:** Limited to Unduplicated Student Group(s)	The hiring of English Learner Specialists is designed to support staff in providing targeted language development to increase English language proficiency, support newcomers and their families with transitioning to a new school system, and support staff with data to assist in progress monitoring for both English Learners and reclassified English Learners. Support Assessment Track and analyze student assessment data to set goals and support student outcomes	Increased percentage of students reclassified as proficient in English Increased percentage of English learners meeting A-G requirements Increased percentage of English learners meeting standards on local and state assessments Decrease in number of students identified as LTEL or ARLTEL. An increase in the percentage of students being reclassified as proficient in English an increase in the percentage of English Language

Goal and Action #	Identified Need(s)	How the Action(s) are Designed to Address Need(s)	Metric(s) to Monitor Effectiveness
			Learners meeting A-G requirements and meeting standards on state and local testing, and a decrease in the number of students who are categorized as LTEL or ARLTEL.
1.3	**Action:** Provide expanded English Language Development (ELD) Sections to maintain smaller class sizes to support language development and instruction for English Language Learners. **Need:** English Language Learners, Long Term English Language Learners (LTELs) and At Risk of Becoming Long Term English Language Learners (ARLTELs) require additional targeted support based upon redesignation rates and state and local testing metrics. **Scope:** Limited to Unduplicated Student Group(s)	The smaller class sizes will decrease the teacher to student ratio allowing for additional targeted support and individualized attention to achieve language acquisition goals.	Increased percentage of students reclassified as proficient in English Increased Reclassification rates, state and local testing metrics, A-G eligibility rates
1.5	**Action:** Retain a Multilingual Learner Coordinator to provide direction and support for staff to ensure English Learners are developing language proficiency and receiving appropriate content instruction to maintain grade level standards. **Need:**	The Multilingual Learner Coordinator will provide the oversight, guidance, training, and support to enable staff to improve and implement improved instructional strategies to support English Learners and Dual Language Learners in English language acquisition and proficiency.	State and local testing data, Redesignation rates, A-G eligibility

Goal and Action #	Identified Need(s)	How the Action(s) are Designed to Address Need(s)	Metric(s) to Monitor Effectiveness
	English Learners are not experiencing academic success at the same levels of their English speaking peers. The A-G eligibility rate and state and local testing data highlight the discrepancies among the students. There is a significant number of LTELs and ARTELs at the secondary levels. **Scope:**		
1.6	**Action:** Provide professional development for Lynwood Elementary School, San Jose Middle School, and district administrators to increase and promote English language proficiency development for English Learners and academic support for the Dual Language Instruction program. **Need:** Supporting English Learners to develop proficiency in both their native Spanish language and English. **Scope:** Limited to Unduplicated Student Group(s)	The increased percentages of English Learners becoming bilingual/biliterate through building teacher capacity with professional development and coaching.	State and local testing data, Redesignation rates, A-G eligibility.
1.9	**Action:** Provide an English Learner Specialist to support with ELPAC testing, monitoring of student data platforms for English Language Learners, and support for the English Language Development courses. In addition, provide additional hourly duty pay to fund extra support and monitoring for ELPAC testing.	The additional support for testing and the English Learner Specialist are warranted to help monitor English Learner progress, ensure ELPAC testing is completed within the necessary timelines, and address compliance needs. The specialist provides essential clerical support to ensure the smooth and secure administration of the ELPAC. This includes managing critical	ELPAC scores and Reclassification rates/Numbers of students reclassified will be used to monitor and assess effectiveness

Goal and Action #	Identified Need(s)	How the Action(s) are Designed to Address Need(s)	Metric(s) to Monitor Effectiveness
	Need: The number of English Learner students across the district require additional supports for ELPAC testing which occurs throughout the year and monitoring of English Learner progress. **Scope:** Limited to Unduplicated Student Group(s)	organizational and logistical tasks throughout the entire testing process—from preparing materials and monitoring test completion within the assigned timeframe to collecting and securely destroying materials after testing. The specialist trains and NUSD ELPAC examiners to ensure accurate assessment administration, including the proper application of test accommodations and correct interpretation of student responses. The English Learner Specialist also manages the distribution of student score reports to families, identifies students who may be eligible for reclassification as proficient in English, and provides district teaching and administrative staff with the necessary documentation to process reclassification.	
1.10	**Action:** Provide an additional two Dual Language Immersion Teachers to support the Dual Language Immersion programs at San Jose Middle School and Lynwood Elementary School. **Need:** Ensuring English Learners participating in the dual language immersion program have ample opportunity and instruction to be redesignated as proficient in English by the time they matriculate from fifth grade. **Scope:** Limited to Unduplicated Student Group(s)	The district has placed a high priority on ensuring students throughout the district have the opportunity to become billingual and biliterate. The importance of establishing a strong foundation and understanding of both English and Spanish is fostered at the elementary level. To ensure students are well prepared, and English Learners have ample opportunity to be redesignated by the time they promote to middle school, the district maintains smaller class sizes at Lynwood Elementary.	CASSPP scores, Reclassification rates, Local data from benchmark scores
3.2	**Action:**	School community liaisons build bridges between schools, students, families, and the wider	Increased student and family participation in

Goal and Action #	Identified Need(s)	How the Action(s) are Designed to Address Need(s)	Metric(s) to Monitor Effectiveness
	Provide Community Liaisons to support unduplicated families to ensure school connectedness and engagement. **Need:** The District has a significant Spanish speaking population. To ensure family involvement and connectedness to the District and sites, translation services and other supports are essential. **Scope:** Limited to Unduplicated Student Group(s)	community to improve student success, acting as communication links, providing support for families, and connecting them to essential resources and programs. Liaisons can serve as a central point of contact, translating information and fostering dialogue between teachers, students, parents, and community organizations to ensure everyone is informed and connected. The Community Liaisons address translation needs and increase student and family engagement.	District and school activities as determined by sign in sheets and rosters. Improved student and family responses on the Thought Exchange survey in regards to belonging and the establishment of a welcoming school environment.
3.3	**Action:** Provide translation services to support communication and engagement with non or limited English speaking families. **Need:** Supporting families who require language support to access information regarding their student's academic experience and need. Welcoming families to partner with the District and school sites so that language is not a barrier to participation. **Scope:** Limited to Unduplicated Student Group(s)	The additional translation services provide the necessary opportunities for families to be involved in their student's education and progress.	Increased participation of non or limited English speaking families in all school activities, meetings, and events.

For any limited action contributing to meeting the increased or improved services requirement that is associated with a Planned Percentage of Improved Services in the Contributing Summary Table rather than an expenditure of LCFF funds, describe the methodology that was used to determine the contribution of the action towards the proportional percentage, as applicable.

N/A

Additional Concentration Grant Funding

A description of the plan for how the additional concentration grant add-on funding identified above will be used to increase the number of staff providing direct services to students at schools that have a high concentration (above 55 percent) of foster youth, English learners, and low-income students, as applicable.

Novato Unified School District does not receive LCFF Concentration Grant Funding

Staff-to-student ratios by type of school and concentration of unduplicated students	Schools with a student concentration of 55 percent or less	Schools with a student concentration of greater than 55 percent
Staff-to-student ratio of classified staff providing direct services to students	1:40.3	N/A
Staff-to-student ratio of certificated staff providing direct services to students	1:16.7	N/A
