

Roanoke Valley Governor's School for Science and Technology

ABOUT RVGS

We are a regional public school committed to providing an unsurpassed educational environment that prepares students for meaningful, long-term success. We proudly provide rigorous STEM learning opportunities to students from Bedford, Botetourt, Craig, Floyd, Franklin, Roanoke City, Roanoke County and Salem. RVGS serves over 270 students in grades 9-12, with an average class size of 16 students.

OUR MODEL

Our program structure is centered on meeting our unique instructional mission. Students attend RVGS for half of their school day, taking technology-infused science and math classes, along with a research elective. Remaining classes are taken at the student's home school. Our daily schedule is designed to maximize lab opportunities and real-world applications. RVGS emphasizes a school-wide growth-mindset and actively creates opportunities for social-emotional learning.

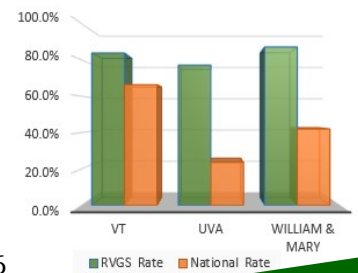

STUDENT RESEARCH

Experimental research is a way of life at RVGS. We support students in expanding their skills and experience within a range of scientific and technological fields. Our January Intersession period provides students with the opportunity to conduct impactful and cutting edge research projects. Our students consistently receive top awards in science fairs from local to international levels.

STUDENT IMPACTS

We prepare graduates for acceptance to competitive universities and success in their future academic & professional pursuits. The past three years of graduating classes have been offered scholarship awards averaging over \$6 million dollars

College Acceptance Rates
Multiyear Average

APPLYING

Interested students and families must attend one of the five evening RVGS information meetings held in January to obtain an application.

Scan the QR code or visit the website below for a schedule of this year's informational meetings.
