Juniors and Seniors Not Registering for a Math Course

I have been advised that the Montana University System has math proficiency standards that require a C or better in 4 years of high school math (or a 22 ACT Math Score). I am waiving the recommendations of the CHS counseling and math departments to sign up for the next sequential math course in the college-prep curriculum. I have been informed that all remedial math classes at the 2 and 4 year colleges will be for no credit and at the full tuition rate. Final math class placement will be determined after 2nd semester grades are finalized.

Plan for the Future

A diploma is not enough.....

Graduates with an associates degree enjoy an average of \$145 more per week than full-time wage and salary workers holding a high school diploma.

<http://www.guidetocareereducation.com/articles/getting-started/education-degrees>

U.S. Census Bureau data proving the substantial value of a college education in the United States. Workers 18 and over sporting bachelors degrees earn an average of \$51,206 a year, while those with a high school diploma earn \$27,915. But wait, there's more. Workers with an advanced degree make an average of \$74,602, and those without a high school diploma average \$18,734.
