Casa Grande Elementary School District's mission is to provide a quality education in a safe learning environment and to prepare our students for the future. CGESD has consistently met the needs of a growing student population while being fiscally responsible. The District is asking our community to pass the budget override continuation which has been in place since 2000.

These funds support the District in recruiting and retaining a high quality staff, providing necessary support and services for our students in special education, and offering competitive pay to draw new employees to the district. CGESD is committed to students by maintaining class sizes within our established guidelines and ensuring that we continue specialized programming for all students.

Having strong schools is important to the quality of life in our community as it protects property values and reduces crime. This budget continuation is not a tax increase but maintains the level of funding that CGESD has had for the prior 20 years.

We are grateful for the past investment from our Casa Grande community and ask for your support by voting yes for the budget override continuation.

Sincerely,
Casa Grande Elementary School District Governing Board
