August 2026

Dear Morris Hills High School Community,

All grade 9 students and new entrants to Morris Hills High School are required to have a comprehensive physical examination which includes examination of their ears, nose, throat, heart, lungs, abdomen, and back. Additionally, an examination for hernia and scoliosis are included. This examination should be completed at the student's doctor's office or medical clinic by the healthcare provider of your choice.

The results of the examination conducted must be documented on the district Medical Examination Form. The examination is acceptable up to 365 days prior to entry to the school district. Parents/guardians who wish to have this examination completed at their doctor's office or medical clinic must return the district Medical Examination Form which will be kept on file in the Health Office.

The physical examinations submitted for students presently participating on a Morris Hills High School sports team, Marching Band, or Cheerleading do not have to submit another physical examination to meet this requirement. (Please refer to the Morris Hills High School Student /Parent Handbook for more information about sports physicals.)

Please remember that regular physical examinations are important at least once during significant developmental stages such as adolescence (grades 7-12) to help ensure that your son/daughter maintains good health.

All paperwork with regard to physicals must be housed in the Health Office.

Please select "Health Forms" located under the "Links" tab to secure the forms on the school's website.

In the Spirit of Partnership,

Todd M. Toriello
