

ST. CLAIR ELEMENTARY SCHOOL

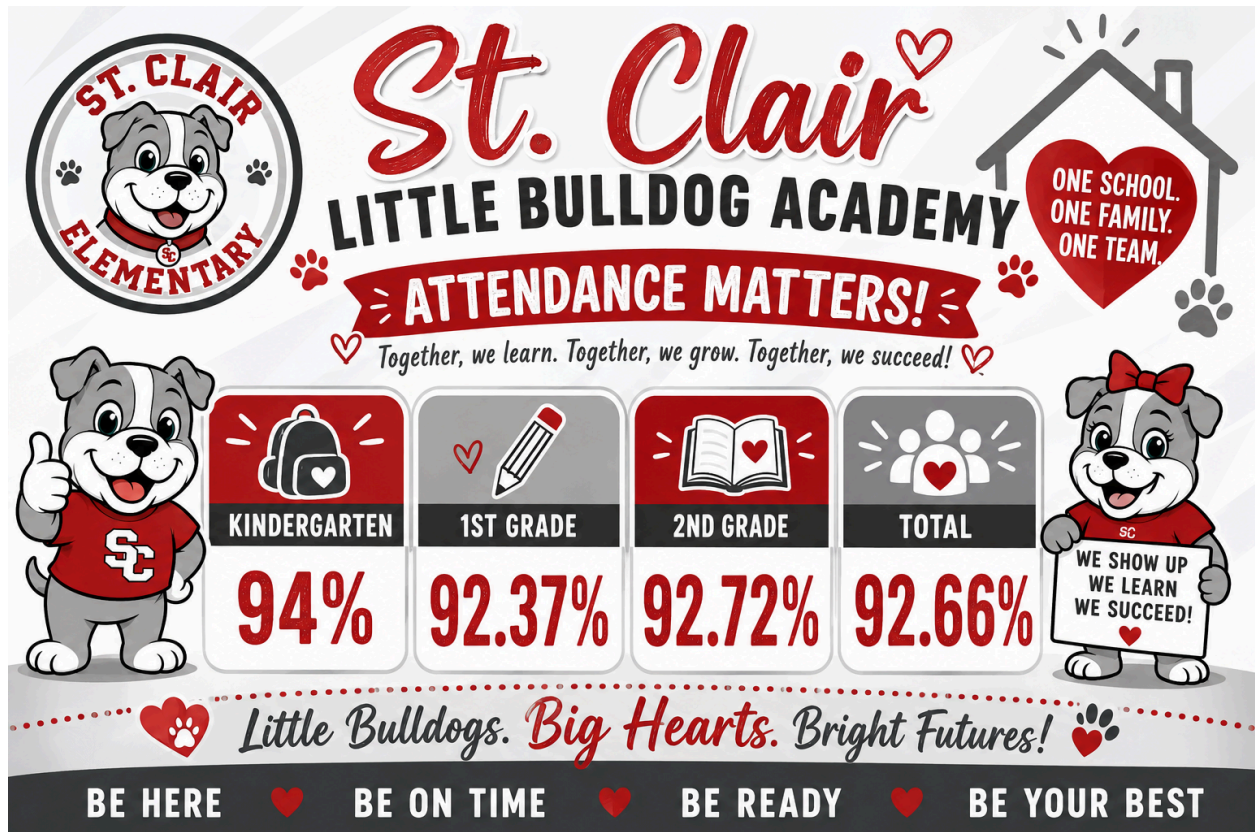

Board Report prepared by:
Dr. Julie Hume
Principal

ST. CLAIR R-XIII SCHOOL DISTRICT

June 25, 2026
2025-2026 School Year

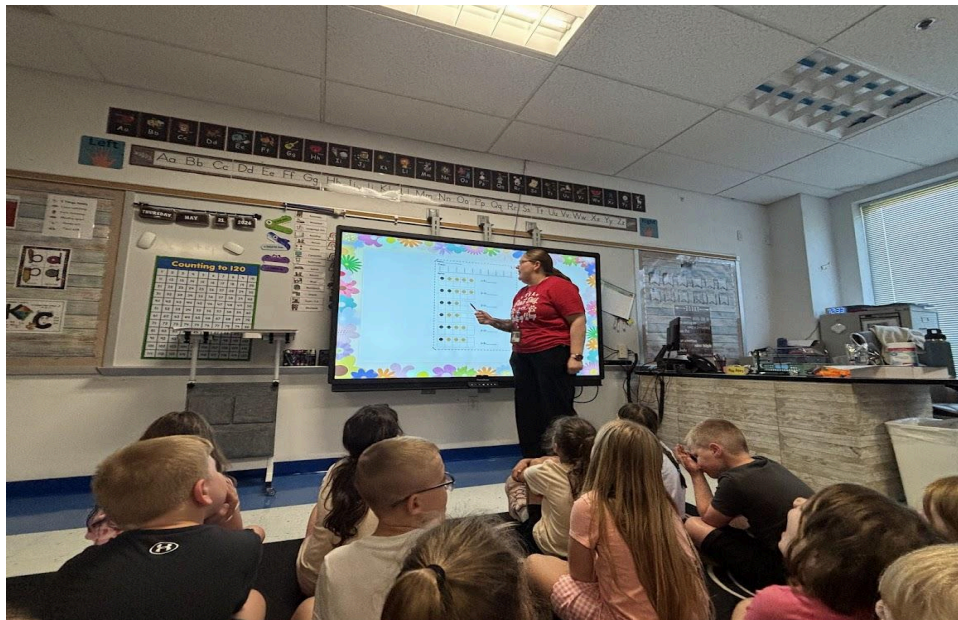

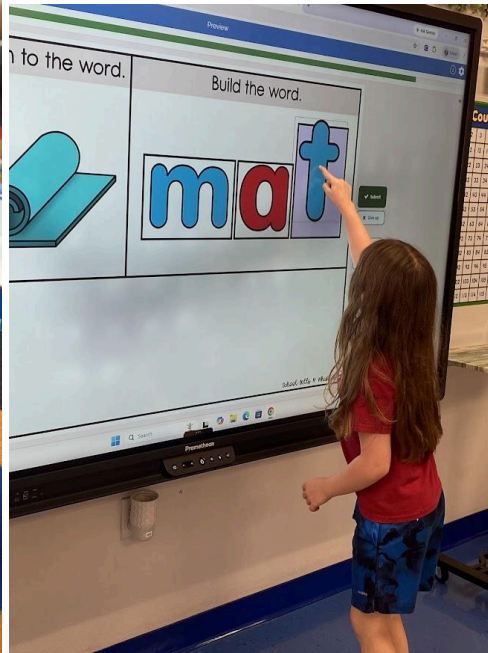

Focus for the 2026-2027 School Year

We are very busy planning next school year even though it is only June. Next year, we are especially excited to continue our PBIS Tier 1 (Positive Behavior Intervention and Supports) System and to put an intentional focus on increasing student achievement within our Tier 2 Process, which will offer even stronger support for our students. We will be holding weekly PLC meetings for teachers to track their instructional progress of not only formal assessments, but also weekly informal assessments to ensure students are making adequate progress. We will continue to utilize our special area teachers, reading teachers, and intervention teachers to offer individual and small group instruction. We are excited about this instructional focus and look forward to sharing more with you at our August Board meeting with specific plans.

Summer Academy Classroom Instruction

Kindergarten has been working on setting expectations, learning the Bulldog Way, and being a good listener who works hard every day. They have been exposed to letters, numbers, and beginning sounds of words. First and Second grade students are participating in a variety of math and reading activities that fill gaps from the 2025-2026 school year. Students have PE every week and have an opportunity to participate in STEM activities in the library.

Summer Academy Field Trips

During Bulldog Summer Academy, students participated in several field trips. All students walked to the St Clair Scenic Regional Library throughout Summer School. They had stories read to them based on themes and then they participated in a hands-on activity related to the books. Students also played outside in the sound garden. First and second grade students took a trip to Orchard Park to play on the playground and play outdoor games with friends. First grade students enjoyed Grant's Farm and second grade enjoyed the Missouri Botanical Garden. Both first and second grade students went to Emmenegger Nature Park to experience birds and outdoor activities with Powder Valley Nature Center.

New Sound System

Thank you to our community who purchased items from our Fall Fundraiser in September 2025! We purchased a new Sound System for our gymnasium and it was installed in May. We have already begun using it during Summer Academy! We are looking forward to utilizing this system for our morning meetings, instructional purposes during physical education, class, and many other events at SCES. Again, thank you to our community for purchasing fall fundraiser items which made this possible.

"Welcome Summer" PTO Event June 2026

Congratulations to SCES!

St Clair Elementary School received the 2026 MO-SW PBS Award of Excellence in May and we were surprised with a cake and balloons. On June 8th, Mrs Wall, MS Barringhaus, and Mrs. Powers received our recognition award and participated in professional development that they will share with our staff during our Welcome Back Staff Professional Development days.
