STUDENT AI USE GUIDELINES

AI use varies by assignment. Follow your teacher's instructions regarding how AI may be used.

TIER 1 — NO AI USE

AI may not be used on the assignment or assessment, at school or at home. The work is completed entirely without AI assistance.

TIER 2 — AI EDITING

AI may be used to check spelling, grammar, citation format, or to give feedback on organization. AI may not create content for the assignment. The final work is entirely student-created.

TIER 3 — AI PLANNING

AI may be used to brainstorm ideas, build outlines, or guide research. AI may not generate draft language. The final work is entirely student-created.

TIER 4 — AI + STUDENT COLLABORATION

AI may be used to explain concepts, critique student drafts, or generate working text and content. Students check for accuracy, rewrite AI content in their own words, and cite all AI use. The final work is entirely student-created.

TIER 5 — AI EXPLORATION

AI may be used for exploration, innovation, and problem-solving with students evaluating and critiquing AI outputs throughout. Content that is AI-generated may appear in the final work with teacher permission and proper citations.

Student AI Use Responsibility: *I follow my teacher's AI expectations, use approved AI tools, check AI-generated content for accuracy and bias, cite all AI use, and protect personal information. I am responsible for my final work and can demonstrate meaningful understanding of all AI-influenced content.*
