

## Community Care in Action: Foster with Children's Wisconsin

As a school community that cares deeply about the well-being of children, we want to share an important need affecting families across our area. **Children's Wisconsin**, a trusted child-serving agency, is seeking additional treatment and respite foster homes to support kids who are facing challenges.

### What Are Treatment Foster Homes?

Treatment foster homes provide structured, **developmentally supportive care** for children who need extra help with a variety of treatment needs—whether medical, developmental, behavioral, or emotional. Foster parents in these programs receive specialized training and ongoing support from Children's Wisconsin to help meet each child's unique needs.

### What Are Respite Foster Homes?

Respite foster homes offer **short-term care**—often for a weekend or a few days—to give foster families time to rest, recharge, or attend to personal needs. This temporary care helps maintain long-term placement stability and ensures children continue to receive consistent, nurturing care.

### Why This Matters

Both treatment and respite foster homes play a **vital role** in helping children heal, grow, and stay connected to caring adults. Even one new foster family can make a meaningful difference.

### How Families Can Learn More

If you've ever considered fostering—or if you simply want to understand what's involved—Children's Wisconsin is ready to answer questions and provide information about training, requirements, and available support.

**Thank you for being a community that consistently shows up for children. Your interest, curiosity, and compassion truly matter.**
