

Dakota Hills Middle School
Locker Room, Locker and Lock Information

New for 26-27

New this year, no students will be allowed to put a lock onto any locker room locker before school starts.

The DHMS physical education teachers will educate and manage any access and use of personal locks on lockers. This will occur in the first 1-2 weeks of school.

Students should have and use a personal dial/disc lock (like a Master lock) to use a gym locker only for the single class session for storage of their items. **Students will need to be in a habit of bringing phy. ed. clothing/items in a tote with a lock if they wish to secure items in a locker room locker during their phy. ed. class.**

Background Info: There are not nearly enough lockers in the locker room for each student to be assigned one of their own. The locker room and phy. ed. locker availability are designed for hour-to-hour use of lockers.

Any lock left on a locker may be cut-off without notice.
