Guidance

Disability

Under Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act Amendments Act (ADAAA) of 2008, “a person with a disability” means any person who has a physical or mental impairment which substantially limits one or more major life activities, has a record of such impairment, or is regarded as having such an impairment. According to the ADAAA, most physical and mental impairments constitute a disability.

Major life activities include, but are not limited to, caring for one’s self, performing manual tasks, seeing, hearing, eating, sleeping, walking, standing, lifting, bending, speaking, breathing, learning, reading, concentration, thinking, communicating, and working. Major life activities also include the operation of a major bodily function, including but not limited to, functions of the immune system, normal cell growth, digestive, bowel, bladder, neurological, brain, respiratory, circulatory, endocrine, and reproductive functions.

U.S. Department of Agriculture (USDA) regulations require reasonable modifications to school meals to accommodate children with disabilities when the disability restricts the child’s diet. Modifications will be determined on a case-by-case basis.

State Licensed Healthcare Professional is a professional who is authorized to write medical prescriptions under State law. Please refer to the Medical Association of Georgia, *Georgia Prescribers Chart*: <http://www.mag.org/sites/default/files/downloads/georgia-prescribers-chart.pdf>. The decision to permit medical professionals other than licensed physicians to complete and sign a medical statement is at the discretion of the local school food authority.
