Dear Parents and Guardians,

Over the past few years, the District has been using a single sign-on platform called Classlink. This resource is meant to provide students with access to many of our instructional resources in one place. These resources include subject-specific online learning platforms, library databases, digital creation tools, and access to specific websites. The best part is that this platform can be accessed by your child from anywhere, using the Internet.

To sign into Classlink, students can go to <https://launchpad.classlink.com/hwps>. The Chrome browser is recommended for use with Classlink. You may be prompted to install the Classlink Chrome extension in order to utilize all of the resources.

Students can sign in two different ways. One is through using their username and password. Their username is their first and last name, without a space. For example Jane Smith would be janesmith (there are a few exceptions to this due to multiple students having the same name). Your child will have their password. If you have any difficulty signing in from home, please contact the IT office.

Students can also sign in with Google. Their District Google username is the same username as above with @hwps.net at the end (Example: janesmith@hwps.net). The password is the same as their network password.

Each building has a unique profile in Classlink. The specific resources and apps in Classlink are based on the student's grade and courses. We will continue to add valuable resources to this platform.

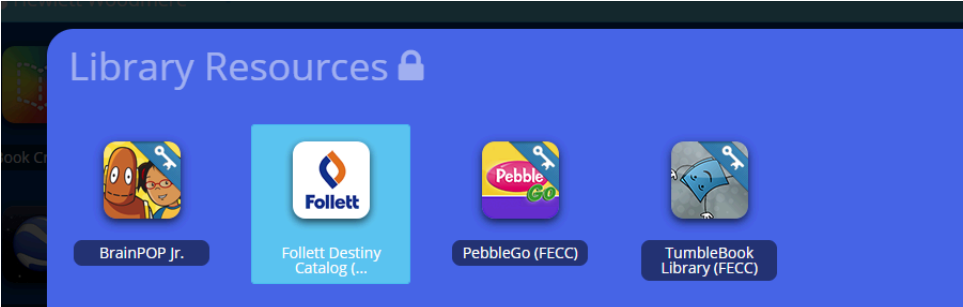

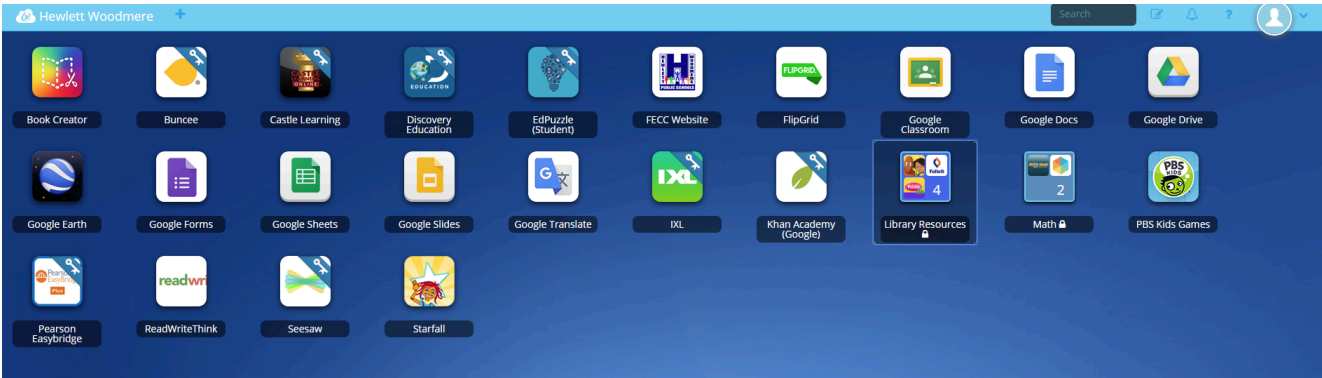

Sincerely,

Krista Albrecht

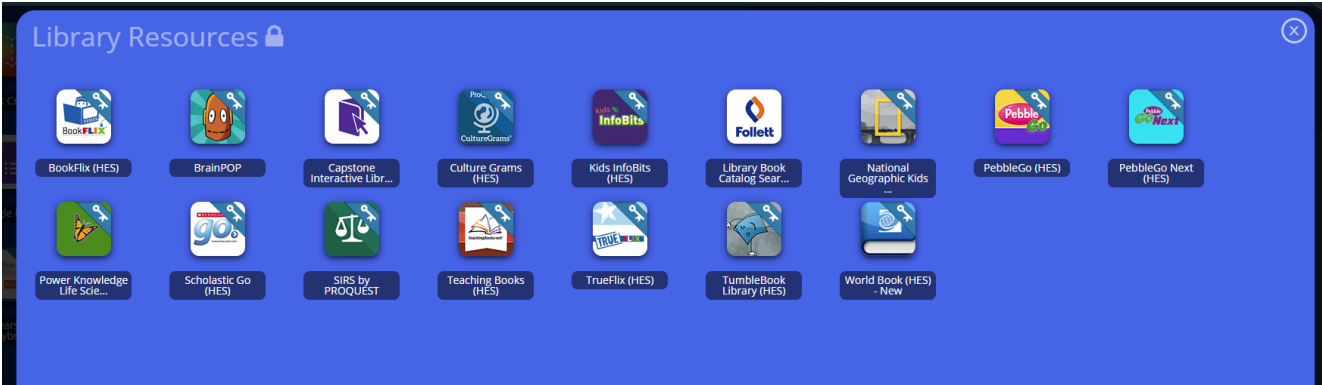

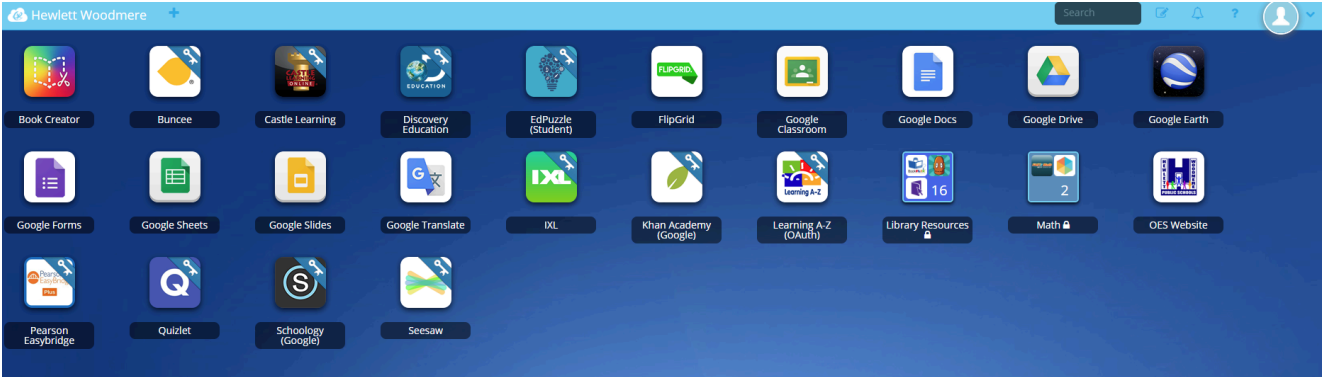

**See sample homepages for each of the buildings on the following pages.

Empowering the next generation for success in life.
