Notice Concerning Use of Pest Control Materials

Our school utilizes a licensed, professional pest control service firm for the prevention and control of rodents, insects and other pest in and around the school's buildings. Their program consists of:

1. inspection and monitoring to determine whether pests are present, and whether any treatment is needed.
2. recommendations for maintenance and sanitation to help eliminate pests without the need for pest control materials.
3. utilization of non-chemical measures such as traps, caulking and screening; and
4. application of EPA-registered pest control materials when needed.

Pests can sting, bite, cause contamination, damage property, and spread disease; therefore, we must prevent and control them. The long-term health effects on children from the application of such pest control materials, or the class of materials to which they belong, may not be fully understood. All pest control materials are chosen and applied according to label directions per Federal law.

An estimated schedule of interior pest control inspections and possible treatments is available for review or copying at the Main Office. A similar estimated schedule is available for application of herbicides and other materials to school grounds. Parents of students may request to receive, at their expense, prior to notification of any application of a pest control material, should such as application be deemed necessary on a day different from the days specified in the schedule.

Estimated Schedule of Pest Control Service Visits

Note: This form has been created to comply with M.S. 123B.575, Subdivisions 1-14. It should be filled out and maintained in the office of every school building in which regular pest control service visits are scheduled. It is recommended that a new form be filled out at the beginning of each school year.

For: Little Falls Public Schools

Our district utilizes a licensed, professional pest control service firm for the prevention and control of rodents, insects, and other pests in and around the district's buildings. Their program consists of:

1. *Inspection and monitoring* to determine whether pests are present and whether any treatment is needed;
2. Recommendations for *maintenance and sanitation* to help eliminate pests without the need for pest control materials;
3. Utilization *of non-chemical measures* such as traps, caulking and screening; and
4. Application of EPA – registered pest control materials when needed (this means pest control materials are not necessarily applied on every service visit).

Pests can sting, bite, cause contamination, damage property and spread disease; therefore, we must prevent and control them. The long-term health effects on children from the applications of such pest control materials; or the class of materials to which they belong, may not be fully understood. All pest control materials are chosen and applied according to label directions per Federal law.

Service visits are scheduled during the weeks starting with the dates listed below:
