

ARTIFICIAL INTELLIGENCE

The North Middlesex Regional School Committee acknowledges the growing influence of artificial intelligence in education. The North Middlesex Regional School District is committed to preparing our students for their futures.

Therefore, our students need to develop fluency with digital technologies and critical-thinking skills while also honoring their commitment to academic integrity. The NMRSD will follow the NMRSD Artificial Intelligence Guidelines and ensure that they are shared with all administrators, instructional staff, and families.

Such guidelines will be reviewed annually, revised as needed, and approved by the committee.

Adopted by the NMRSD School Committee:
