Shawnee Mission School District
RFQ 26-010 – Architectural Services – Future Construction Projects
July 27, 2026

Addendum No. 1

The following response addresses question(s) submitted by vendor(s) on July 23, 2026; responses to the question(s) are indicated in **bold**. If you feel that a question has not been addressed, please contact Reed Beebe at purchasing@smsd.org as soon as possible.

1. As this RFQ is for Architectural Services, should we limit just our qualifications to just our Architectural team, or would you like for us to include a full A/E team with engineering consultants?

   The RFQ anticipates that selected architectural firms will either provide engineering services directly or via partner engineering firms. A firm can provide information about its available engineering service resources in response to the Exhibit A Questionnaire (for example, Question #5, or other questions that may be applicable to engineering services).

2. Our strengths are in the 1) tech school, 2) athletics facilities and 3) miscellaneous improvements. Just want to make sure it's acceptable to submit on selected aspects of the bond package.

   While the District intends to engage with multiple firms offering a robust range of architectural services that address the project needs outlined in the RFQ's Exhibit B, the District understands that some firms may have service specialties that are better suited to select projects. A firm's interest in providing services for particular projects, based on its service specialties, is not disqualifying from consideration, although firms that are able to provide services for all the projects listed in Exhibit B may be scored higher by District evaluators in the QBS process

3. Can you provide more detail on the tech high school rebuild? Some sense of the types of programs/curriculum to be housed in the new facility.

   Programming for the new career technical center will be finalized during the 2026-27 school year through the District's ongoing Real World Learning Implementation Team and Strategic Plan Action Team initiatives. No decisions regarding expanded or future pathways have been made at this time.

4. Can you provide more detail on the types of projects and upgrades envisioned for the athletics facilities?

   Currently anticipated athletic facility work for the 2027 Bond includes the following:
   - **Cycle athletic field turf replacement**
   - **Installation of tracks and sports lighting at 5 middle schools**
   - **Installation of sports lighting at 3 high schools**
   - **Soccer Complex renovations**
   - **High school and middle school competition gym renovations**
