

Summer 2026

Dear Dansville Families:

Computer technology empowers our students and gives them a competitive edge. Over the past couple of years, Dansville educators and students have emerged as leaders in technology for learning. Maintaining our mobile 1:1 is very important to us in the district and to the community. Chromebooks are an essential part of student learning and communication with teachers and school. Damages can significantly impact student learning and we want to minimize that to the greatest extent possible.

To maintain the ongoing 1:1 program, we make all efforts to minimize damage. We ask for your help in ensuring access for all students continues by joining with us in ensuring students take exceptionally good care of their Chromebooks. Be sure to review our Acceptable Use Policy which is included with this letter. This can also be found in the Master Technology Plan (this can be accessed on our website: www.dansvillecsd.org under Departments, Computer Technology: [Master Technology Plan](#)).

We recognize that things happen, and there can be damage, loss or theft. Please report all such incidents immediately to your building office or the IT Department (335-4010, ext 1012). You can also contact IT at tecreg@dansvillecsd.org. The IT Department will work to get students alternate devices. Please be aware that we do not have unlimited reserves of Chromebooks and damage may result in students not having access to a device for a time while repairs are made. In addition if the damage is determined to be from misuse or neglect, we will send you a letter notifying you of this. Second and third such damages in the same school year will result in another letter explaining the situation to you and a request that you reimburse the district.

Understanding all the technology used in the district presents a challenge to families as well. Please visit our [DCS Technology Page](#), Computer Technology under Departments on the DCSD website: www.dansvillecsd.org for helpful resources. If there are other resources you need to help you with accessing and understanding technology, please contact your building library media specialist, my office or the IT Department.

If you have any questions or concerns regarding technology, please feel free to contact me. My contact information is below

Sincerely,

Michael Birmingham
