AI TOOLS AT SVSD

A list of AI tools available to SVSD staff & students

K-12 & Staff

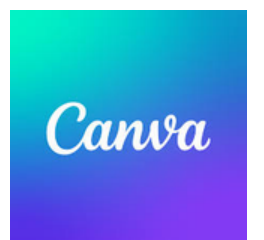

BRISK

USAGE: Free extension for teachers and educators to enhance daily tasks using artificial intelligence. Acts as a digital teaching assistant by embedding directly into tools educators already use (such as Google Docs, PDFs, Schoology, etc.)
DATA PRIVACY: FERPA & COPPA compliant and does not collect or store student data.

K-12 & Staff

CANVA

USAGE: Free program used to create a wide range of visual content such as presentations, marketing materials, classroom posters, lesson plans, and video editing.
DATA PRIVACY: FERPA & COPPA compliant and limits data disclosure to educational purposes only.

K-12 & Staff

COLLEAGUEAI

USAGE: AI tool that enhances teaching, learning, and school management through intelligent automation and personal assistance. Commonly used for lesson planning, assessments, instant tutoring, and personalized learning.
DATA PRIVACY: FERPA, COPPA, GDPR, & SOC 2 compliant ensuring strong data protections for students and educators.

Age 13+ & Staff

COPILOT

USAGE: AI-powered assistant designed to automate tasks, generate content, and provide intelligent insights. Uses include image creation, lesson planning, grading, writing help, and summarizing readings.
DATA PRIVACY: FERPA, COPPA, & GDPR compliant. All data stays within regional boundaries and user data is not used to train the AI models.

K-12 & Staff

GEMINI

USAGE: A multimodal AI model designed to work with text, images, audio, video, and code and is deeply integrated into Google's ecosystem.
DATA PRIVACY: FERPA and GDPR compliant and COPPA compliant. There is no training on personal data and activity is auto-deleted after 18 months by default.

K-12 & Staff

SNORKL

USAGE: Classroom-focused tool designed to give instant feedback on student thinking through verbal and visual explanations. Used for whiteboard recording, instant feedback, multimodal learning, and teacher dashboard.
DATA PRIVACY: FERPA & COPPA compliant. Received a 93% privacy rating from Common Sense Privacy Seal. Student inputs never used to train AI models.
