PARENT TECHNOLOGY INFORMATION

SCS Warrior Parents!

We will continue our one-to-one technology this upcoming school year and distribute school-issued devices to multiple grade levels. For the most up-to-date technical information and links, please refer to the website under MySCS; Parent Resources.

K-2: Parents and students will not be using one-to-one devices during the school year. Small banks of devices are in each classroom for special projects, to be used under teacher direction. Students are not expected to use Canvas during the school year.

Grades 3-6: School issued devices, login information, and Canvas/Office 365 credentials will be distributed during scheduled technology classes. Grades 3-5 will store devices in their classroom at school. However, grades 4-5 may be taking their devices home periodically throughout the school year, per teacher directed assignments and projects. Students in grade 6 are responsible for transporting their fully charged devices to and from school, unless otherwise directed by their classroom or technology teacher.

Please log in to Canvas with your student(s) to review what was learned during their technology classes. This also allows you to see what they can see as a student. You can now set up your own Canvas Parent account. While many Elementary parents prefer to work with their students in the Student Canvas account, there are additional benefits of having a parent account.

- You can view multiple students with one account
- Email communication from teachers directed to parents come from Canvas
- Ease of use via the Canvas App

Grades 7-9: Students will receive their school issued devices, login and Canvas/Office 365 email information during the first week of school. As a requirement for classroom learning, students are expected to bring their fully charged laptop and charger to school each day. Students should not bring a personal device to school.

Grades 10-12: Students will receive their Canvas/Office 365 email & login along with their class schedules. If your student has a new-to-the-building device, please make certain they reach out to the technology department to get proper connectivity to the school network. Students continue to use the BYOD program. Please refer to the Device Policy for more details. If your student has requested to check-out an SCS device, they will receive their device during the first week of school.

If you have not already done so, please set up your own Canvas Parent account. P*arents have a different login site and must use their personal email to set up this account*. Please use this with your student to connect to their Canvas pages.

As a reminder, please refer to the website under MySCS; Parent Resources for the most up-to-date information. You can also contact your students office or technology department with any questions.
