Access to Technology

Greene County Public Schools is dedicated to empowering our community's children for life-long success by providing students with an education that focuses on the knowledge, skills, and abilities needed to excel in a globally competitive world. Access to technology is essential for preparing all students to be successful in the 21st Century.

Google for Education
Students in grades 3-12 are given a Greene County Schools Google account which includes Gmail plus a variety of applications provided by G Suite for Education. These applications include Google Docs, Slides, Sheets, Classroom, and more.

Google for Education provides a safe, secure environment for a student's introduction to the world of the Internet. Our Google Administrators can modify security settings, providing the strictest, most secure settings for our younger students to a less restrictive environment for our high school seniors who are communicating with agencies outside of the District.

Students who log into their Google account when not on campus still have access to all of their files and schoolwork. All safety measures are still in place. This includes the GCPS filtering system and Google security settings.
1:1 Chromebook Initiative

Take Home
Greene County Public Schools is providing a Chromebook to each of our 8th-12th grade students to promote anytime, anywhere learning. Students, who have met the requirements, will be assigned a Chromebook to use both in and out of School.

In the Classroom
Students in grades k-5 have 1:1 access to Chromebooks throughout the day. The use of technology in the classroom has had a powerful impact by engaging all students through learning that is innovative, personalized, and relevant.

Community Internet Access
Stanardsville Campus
Outdoor Internet access points have been added to the Stanardsville campus. You can now connect to the Internet when attending athletic and community events.

Greene County Library
222 Main St, Stanardsville
Greene County Library is part of the Jefferson-Madison Regional Library system and provides free Internet access. The Greene Library website can be accessed here.

Low-cost Internet
The following links will take you to programs that provide low-cost Internet access to qualifying families:
Internet Essentials from Comcast
Cox Connect2Compete Program

Greene County's Broadband Initiative
In March of 2017, the Greene County Board of Supervisors identified the expansion of quality broadband access and service throughout the County as a high priority within the County's overall strategic plan. In order to facilitate this needed expansion, with a goal of reaching all areas of our County, we have assembled an interagency committee charged with the task of addressing this most important issue to our citizens, students, visitors, and business community.
