

Programs and Services for Children with Disabilities

Envision Science Academy, in conjunction with the parents, determines the type and intensity of special education and related services that a particular child needs based exclusively on the unique program of special education and related services that the school develops for that child. This program is called an Individualized Education Plan—the IEP—and is different for each student. An IEP Team consists of educators, parents, and other persons with special expertise or familiarity with the child. The participants in the IEP Team are dictated by IDEIA 2004. The parents of the child have the right to be notified of and to be offered participation in all meetings of their child's IEP Team. The IEP is revised as often as circumstances warrant but reviewed at least annually. The law requires that the program and placement of the child, as described in the IEP, be reasonably calculated to ensure meaningful educational benefit to the student. IEPs generally contain: (1) a statement of present levels of academic achievement and functional performance; (2) a statement of measurable annual goals established for the child; (3) a statement of how the child's progress toward meeting the annual goals will be measured and when periodic reports will be provided; (4) a statement of the special education and related services and supplementary aids and services and a statement of the program modifications or supports for school personnel that will be provided, if any; (5) an explanation of the extent, if any, to which the child will not participate with nondisabled children in the regular class and in activities; (6) a statement of any individual appropriate accommodations that are necessary to measure the academic achievement and functional performance of the child on State and school assessments; and (7) the projected date for the beginning of the services and modifications and the anticipated frequency, location and duration of those services or modifications. Special education services are provided according to the educational needs of the child, not the category of disability. Related services are designed to enable the child to participate in or access his or her program of special education. Examples of related services that a child may require include but are not limited to: speech and language therapy, transportation, occupational therapy, physical therapy, school nursing services, audiologist services, counseling, or training. Related services, including psychological counseling, are provided at no cost to parents. Envision Science Academy ensures that children with disabilities are educated to the maximum extent possible in the regular education environment or "least restrictive environment". To the maximum extent appropriate, students with disabilities are educated with students who are not disabled. Special classes, separate schooling or other removal of students with disabilities from the general educational environment occurs only when the nature or severity of the disability is such that education in general education classes, even with the use of supplementary aids and services, cannot be achieved satisfactorily. For more information on IEP services, please contact the Exceptional Children's Director.
