Annual Notice of General Monitoring of Electronic Data

July 29, 2026

Dear Parents:

Ohio Revised Code Sections 3319.325-.327 require school districts to provide an annual notice to parents in any school year when it will generally monitor or electronically access school-issued devices. School-issued devices means hardware, software, devices, and accounts that the school district, acting independently or with a Technology Provider, provides to an individual student for the student's dedicated personal use.

As is standard practice at school districts across the state, the Big Walnut Local School District ("District") will either directly or through a Technology Provider, monitor and/or access electronic data on school-issued devices for this school year.

Pursuant to the law, the District will not electronically access or monitor any of the following on a school-issued device unless one of the exceptions set forth below apply: location-tracking features; audio or visual receiving, transmitting, or recording features; and student interactions, with a school-issued device including but not limited to, keystrokes and web-browsing activity contained on a school-issued device.

Monitoring may occur for the following exceptions:

1. The activity is limited to a noncommercial educational purpose for instruction, technical support, or exam-proctoring by District employees, student teachers, staff contracted by the District, a vendor, or the Ohio Department of Education and Workforce;
2. The activity is permitted by a judicial warrant;
3. The District or Technology Provider is notified or becomes aware that the device is missing or stolen;
4. The activity is necessary to comply with federal or state law;
5. The activity is necessary to participate in federal or state funding programs; or
6. The activity is necessary to prevent or respond to a threat to life or safety, and the access is limited to that purpose.

Additionally, we are required under the law to disclose a list of all technology providers that have access to the District's students' educational records for the purpose of providing curriculum, testing, or assessment services. That can be found on the district's website at www.bwls.net/StudentDataPrivacy.aspx

Sincerely,

Ryan McLane
Superintendent
