

Seventh Grade Math

Mrs. Johns, Room 140 & Ms. Huntley, Room 128

bjohns@gcboe.us/hhuntley@gcboe.us

Welcome

Welcome to sixth grade math at Bridgeforth Middle School! We are very excited to begin working together to master the standards and objectives that have been set by the state for 7th grade math. This class will be engaging and fun! Every child will have the opportunity to learn every day!

Grading

All assignments are equally counted toward the quarterly and semester grade; therefore it is important to turn in each assignment in a timely manner! When absent, please see your teacher the day that you return in order to obtain your make up work.

State Standards

The state standards are divided into 5 categories:

- Ratios and Proportional Relationships
- The Number System
- Expressions and Equations
- Geometry
- Statistics and Probability

Within each category, the standards identify the specific skill and depth to teach within this grade level.

Remember that math builds; therefore, all content will include skills that your child has previously been taught.

All lessons will be directly tied to one or more Tennessee State Mathematics Standard.

MATH

Expectations

- be on time
- bring your required supplies
- gum and snacks are not permitted in the classroom
- water bottles will stay in backpacks or have a designated place to keep within the classroom
- respect yourself, your peers, the school staff and property
- take responsibility for your own learning by participating in the lesson and completing homework assignments

Grading Scale

90-100	A
80-89	B
70-79	C
