# SOUTH POINT LOCAL SCHOOL DISTRICT WELLNESS/DPIA PLAN 2026/2027

SWSF PLAN

South Point Local receives student wellness and success funds (SWSF). We utilize our funds to pay for things such as but not limited to the following: We partner with the ESC of Lawrence County to provide training and support for South Point Local Staff Members and district students. South Point Local Staff Members in turn provide various types of support to our students, including but not limited to mental health, physical health and financial and educational. Physical health services are provided by nurses. Mental health services are provided with counselors and a school psychologist. An extended school day is provided. School safety is provided. Dropout prevention is also provided as well as instructional technology.

DPIA PLAN

South Point Local also receives Disadvantaged Pupil Impact Aide. We partner with the ESC of Lawrence County to pay for a truancy officer. The truancy officer gets referrals from different buildings administrators when students are absent without excuse or have acquired and excessive amount of unexcused absences or tardies. The truancy officer is an integral part of the South Point Local School Districts attendance plan. The work of the officer helps building administrators meet the needs of absence intervention team in order for them to create a plan to mitigate absences and tardies. This all contributes to the South Point Local School Districts attempt to mitigate dropouts which is shown by data to be directly related to attendance. We direct some of our funds to support salaries for nurses and the South Point Local School District Resource Officer as well. We also provide an extended school day and mental health services.
