

DCJESD Wireless Onboarding – Windows & Mac OSX

1. Connect to the **DC-Guest** wireless network
2. Open a new browser window if one does not open automatically. If the page does not open automatically load, visit (e.g. cnn.com). Note for Chrome devices, if the page comes up as untrusted or not private, navigate to the bottom and select **Advanced** and **Proceed to...** to continue.

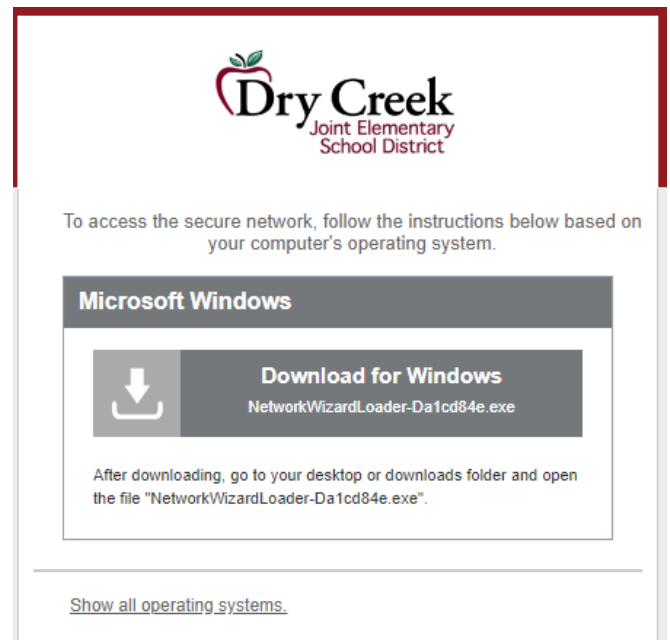

3. Click Accept and Continue to accept the Terms and Conditions to begin browsing the Internet.
4. The following instructions will place your device within our secure network. Open a new browser window and go to cloudpath.drycreek.k12.ca.us.

5. Select **DCJESD Users** to continue.

6. Enter your district email credentials and tap **Next**.
7. Click the **down arrow** to download the application file.

8. In most cases the application downloads to your **Downloads** folder. Browse to the saved file location and click the **NetworkWizard** file for Windows, or **Cloudpath.app** for OS X, to begin the configuration process.

The following prompts may display requesting authorization to install the application:

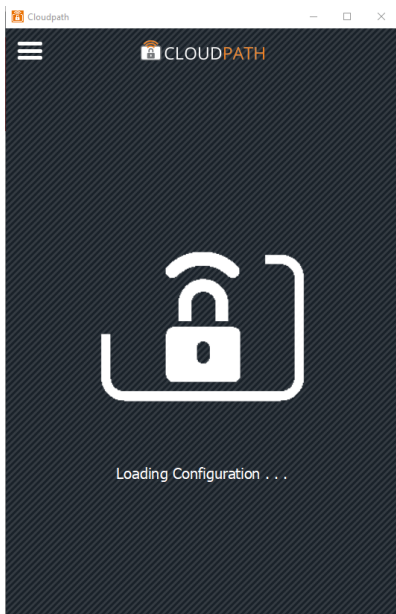

- Windows 7
 - User Account Control – Click **Yes**
- Windows 10/11
 - User Account Control – Click **Yes**
 - Search for app in the Store? – Click **No**
 - Windows Defender Smart Screen – Click the **More info** link and then **Run anyway**
- Mac OS X
 - Cloudpath.app – Click **Open**
 - Certificate Trust Settings – Enter password and click **Update Settings**
 - Install Helper Tool – Enter password and click Install Helper
 - Configuration Profile Tool – Enter password and click **OK**

Troubleshooting Steps

Websites display as unsecure or untrusted:

- Browse to [Securly.com/SSL](https://securly.com/SSL) and verify that the certificate has been installed on the device
- Sign out of the Chrome browser and sign back in using a DCJESD email address
- Reboot computer

For additional assistance please contact the Technology Department at <https://dcjesd.mojohelpdesk.com/> or ext. 1500

9. When the configuration wizard completes, connect your device to the **DCNet** wireless network to begin browsing the internet through the district secure network.

10. Install the Securly certificate for accurate content filtering. Open a browser and type **Securly.com/SSL**. Click on the large Windows or OS X icon that displays and follow the prompts to install the Securly Certificate.
