Federal Funding Descriptions

(for reference only)

Title I, Part A (Title I) of the Elementary and Secondary Education Act, as amended (ESEA) provides financial assistance to local educational agencies (LEAs) and schools with high numbers or high percentages of children from low-income families to help ensure that all children meet challenging state academic standards. Federal funds are currently allocated through four statutory formulas that are based primarily on census poverty estimates and the cost of education in each state.

Title II, Part A provides funds intended to increase academic achievement by improving teacher and principal quality., primarily through professional development. This program is carried out by increasing the number of highly qualified teachers in classrooms; increasing the number of highly qualified principals and assistant principals in schools; and increasing the effectiveness of teachers and principals by holding LEAs and schools accountable for improvements in student academic achievement.

Title III, Part A provides funds intended to assist schools with language instruction, specifically for Limited English Proficient students. Funds June be used for professional development and language instruction programs.

The Individuals with Disabilities Education Act (IDEA) is a law ensuring services to children with disabilities throughout the nation. IDEA governs how states and public agencies provide early intervention, special education and related services to more than 6.5 million eligible infants, toddlers, children and youth with disabilities. Children and youth (ages 3-21) receive special education and related services under IDEA Part B.

IDEA Part B Sections 611 and 619 funds must be used only to pay the excess costs of providing special education and related services to children with disabilities, such as costs for special education teachers and administrators; related services providers (speech therapists, psychologists, etc.); materials and supplies for use with children with disabilities; professional development for special education personnel; professional development for regular education teachers who teach children with disabilities; and specialized equipment or devices to assist children with disabilities.
