

Mr. Flint's Lesson Plans
7th Grade Social Studies
Week of August 3-7

Date	Objective	Activities	Assessment
8/3/26	We are learning all the new and exciting things that Desert Sky has to offer , what the expectations are in social studies, the supplies we will need to be successful, and starting to get to our classmates.	Students will be welcomed to Desert Sky and social studies class. We will introduce ourselves, discuss ways to get involved at Sky, and start to go over class expectations.	Be thinking about having needed supplies (list sent home) to be as successful and prepared as you can
8/4/26	We are learning all the new and exciting things that Desert Sky has to offer , what the expectations are in social studies, the supplies we will need to be successful, and starting to get to our classmates.	Students will ask day 2 questions, speak a little about their first day, and start the “ Future in the palm of their hand” ice breaker.	Get into good habits- charge your chromebook tonight, start to dial in when you will have your supplies for class or if you need something from me.
8/5/26	We are learning all the new and exciting things that Desert Sky has to offer , what the expectations are in social studies, the supplies we will need to be successful, and starting to get to our classmates.	Students will receive their chromebook, go over CB expectations, and finish ice breaker- Future in the palm of your hand.	Make sure to be prepared tomorrow- Chromebook charged , charger in your bag please. We will begin unit 1 - Scientific Revolution 8/6.
8/6/26	We are learning how science was practiced during medieval times and the discoveries made by scientists during the 1600's/ 1700's.	Students will begin the process of taking key notes on medieval science practices and discoveries that would change how people were looked at when sick or in need of health care.	Review new vocabulary, add 2 other meanings for each key vocab term.
8/7/26	We are learning how science was practiced during medieval times, the discoveries made by scientists during the 1600's/ 1700's, and how scientists work supported earlier theories.	Students will create a deeper sense of the key notes, concepts, and begin to explain how scientific discovery would create changes in universal thinking, as well as society, culture, and gov't	Have a great weekend! Reminders- charge chromebook every night, be prepared for class, and always try to do your best.

Please Note- Weekly lesson plans are subject to change.
